The University of Maryland 1807—1856—1920

IN 1920, by Act of Legislature of the State of Maryland, the present University of Maryland was founded by the merging of the Maryland State College and the University of Maryland, Baltimore, forming the strong institution now known as the University of Maryland.

The three major dates in the history of the University of Maryland are imbued with a story of progress that reads like a romance. In 1807, the College of Medicine of Maryland, Baltimore, fifth oldest in the country and the progenitor of the University of Maryland, was organized. Its beginning marked a great step not only in the history of the State, but one well in keeping with the vast progress of the nation in education. The first class was graduated in 1810.

The Baltimore Infirmary (now the University Hospital) and the School of Law were built in 1823. A Department of Dentistry was added in 1882, and a School of Nursing in 1889. In 1904, the Maryland College of Pharmacy, (1841) and third in the U. S., was merged with the University of Maryland, and in 1923, the Baltimore College of Dental Surgery (1840—the oldest dental school in the world) was amalgamated with the School of Dentistry, University of Maryland.

1856 marked the chartering of the Maryland Agricultural College at College Park, second agricultural college of the Western Hemisphere.

Enrollment for the year of 1936-37 was 1,998 undergraduates in College Park, 1,265 in Baltimore schools, 277 in Graduate School, College Park, 1,077 in Summer School, and 2,-312 in Short Courses.

Total enrollment (less duplication) 6,513.

Senator Tydings, '10, Defends Military Program

Senator Millard E. Tydings, '10, delivered a very impressive extemporaneous talk before the Rural Women's Short Course held at the University this summer. Speaking about the military program of the United States, he explained rather clearly just why we should have an adequate system of military defense in this era of economic and world unrest. A wise defense is necessary for this counrty. The Senator said, "We all want Peace —let us be tolerant as to the way to attain it. No one," he said, "has a patent on the best way."

The Senator accompanied Mrs. Tydings to the University who was on the Short Course program to speak on Government. Another speaker on this occasion was Miss Jeanette Rankin, first woman member to Congress and now legislative secretary of the National Council for Prevention of War.

Nearly a thousand people were on hand for the program of which eight hundred were registered for the week's course under the auspices of the University's Extension Service. Practically every county in the State was represented.

●

Col. Calvert Re-Elected

Colonel George H. Calvert, Jr., '92, has been re-elected for the tenth consecutive term as president of the Maryland Society of Washington. He has also been chosen vice-president of the Southern Society of Washington representing the State of Maryland.

Colonel Calvert made an address at the recent "Maryland Day" meeting of the Democratic League of the District of Columbia held at the Grafton Hotel in Washington. He was introduced by Mr. Arthur Clarendon Smith, president of the league, as a candidate for the Democratic nomination for governor of Maryland.

Campus Visitor

When the boxing team went to the University of Wisconsin a year ago, they were entertained by Hamilton Rocke, '24, a faculty member at Wisconsin. Recently, Hamilton returned that visit but unfortunately found none of the boxers on the campus. Not being surprised, as school was over, he began his rounds looking for familiar faces among the faculty.

At Wisconsin, Hamilton is a faculty member in the Department of Animal Husbandry, and in addition, has charge of the 700-acre experimental farm which joins the campus. Another of his jobs is the feed supply of the Department.

The University of Wisconsin has an enrollment of 9,000 and the campus is practically a part of the city of Madison. It is bounded on one side by the city and the lake on the other.

"It was a good feeling," said Hamilton, "to see the Old Line campus, with the many improvements and the A.T.O. fraternity house of which he is a member.

●

Employment

The Western Union Telegraph Company is offering opportunities to graduates in Business Administration who wish to enter the communication field. The company's personnel manager writes as follows: "It is a practice of the company to recruit each year a limited number of graduates from various universities in business administration and who have obtained an A. B. degree. These employees are assigned to sales work and are given an opportunity for a career in the field of telegraphic communication."

Male students are preferred and those interested should write the Alumni office immediately.

●

Pennsylvania—William Leasure, '37, has gone to New Kensington, Pa., where he has accepted a position. Bill was a graduate in the College of Engineering, was a member of the Engineering Society, the American Society of Mechanical Engineers, and is a member of Phi Sigma Kappa social fraternity.

Our Dental Museum » » » »

(Note: *Excerpts taken from articles written by Clark Beach, '27.*)

THAT there is a dental museum in Baltimore is known to few persons. It is out of sight in the sub-basement of the dental school of our University. Its existence is no secret, but the museum is so informal as yet that the school has not opened it to the public.

An official of the dental school called attention to it in connection with the celebration of the one hundred and thirtieth anniversary of the University. National Youth Administration students, directed by the faculty, arranged and catalogued the exhibit two years ago.

Teeth of Kings

Side by side in the museum lie the teeth of two kings. When Dr. Robert Wooffendale was called to soothe the royal toothache of George IV of England, he pulled the offending molar. As he had an American headquarters at Long Island, New York, and knew the Maryland dentists, years afterward he sent the tooth to the school here.

The other one was extracted from the jaw of King Amadeo I of Spain by Dr. J. C. Gardner, and this dentist dispatched the keepsake to his alma mater. He was a graduate of the Baltimore College of Dental Surgery, class of 1863.

Pearl Inlays

There is a skull on the teeth of which a German dentist about forty years ago performed nearly every type of dental work known at that time. Pearls are inlaid in some of the gold fillings. Two upper front teeth have adornments which were considered nifty in Germany in those days—round gold fillings in perfectly sound teeth, with a pearl inlaid in the middle of one of these fillings. The skull, grinning with its mouth full of gold and pearls, would teach Hamlet more than Yorick's did about human vanity.

Smallest Mouth

Here also can be found the impressions of the smallest mouth (Mrs. Tom Thumb's) and the largest (General Winfield Scott's) recorded by the school.

Those instruments used by a pioneer in the profession, Dr. Chapin A. Harris, also a co-founder of the Dental School, are on exhibit. The cabinet and the dental instruments were sent to the school several years ago by Dr. Harris' only surviving child, Mrs. M. Barrett-Lennard of Kent, where his family moved after his death in 1860. Mrs. Barrett-Lennard presented the property to the Dental School for preservation.

Dr. Harris, a resident in the 300 block of North Charles Street of Baltimore, founded the Dental School with Dr. Horace Hayden in 1841. At that time it was called the Baltimore College of Dental Surgery. Later it was merged with the University of Maryland Dental School. It was the beginning of the oldest dental school in the world.

Washington's False Teeth

Much interest is centered on exhibits of historical nature, chief among these are the false teeth, carved from hippopotamus ivory, worn by George Washington. One of John Greenwood's letters to his patient, dated December 28, 1798, figured in a controversy during the prohibition era.

With the letter Greenwood sent back a repaired set of teeth, which "was very black, occasioned either by your soaking them in port wine, or by your drinking it—I advise you to either take

Dental School and Pharmacy School Building

Alumni Board Holds Meeting

A meeting of the Alumni Board was held July 1 in Baltimore City at which time several matters of importance to the Association for the coming year were discussed.

Outstanding was the appointment of two committees, the first was for a plan of organization in soliciting contributions for membership, endowments, and scholarship fund, also to arrange for the disposition of these funds. Of this committee we have C. Walter Cole, '21, Chairman, Ruth Miles, '31, and Reuben Brigham, '08.

Organization Committee

Another committee was appointed to set up a system for organizing more alumni groups throughout the State. Those appointed were: Charles Vinton Koons, '29, Chairman, Mrs. Edith Burnside Whiteford, '29, and George Weber, '33.

A committee will be appointed at a later date to serve with the "M" Club Committee on making arrangements for the fifteenth annual Homecoming to be held October 30, at College Park. On this date the University of Florida will be the visiting football team.

Mid-winter Reunion

The Board appointed George Weber and G. F. Pollock to confer with the Alumni head of the other Associations in Baltimore as to the desirability of having a mid-year Reunion of All Alumni in celebration of the founding of the University.

A plan for class reunions at the Annual Alumni Day in 1938 was approved with special emphasis being placed on the five-year reunion of each class. In 1938, the class of 1888, of which Melvin C. Hazen is a member, will celebrate their fiftieth anniversary.

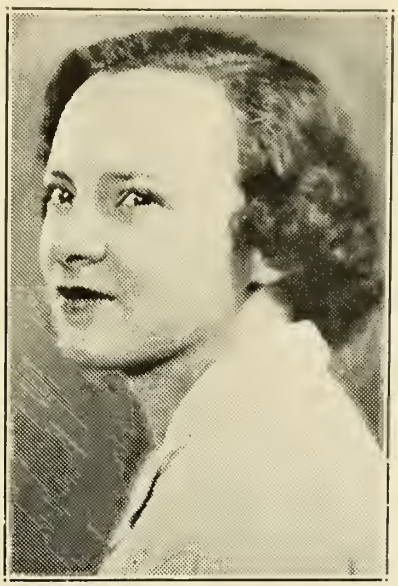
Miss Ruth Kreiter, '37, secretary of her class, was present and expressed the desire of her class to begin immediately with its alumni organization.

The meeting was quite a success and President Zalesak said that another meeting would be called early in the fall.

●

Chemist—Norman Hobbs, '37, a graduate in the College of Arts and Science, is now working as a laboratory chemist with the Parke & Davis Company in Detroit. Norman was a member of the Men's League, Scabbard and Blade, and was on the rifle team for four years when a student at the University.

SECRETARY OF '37



RUTH KREITER

DEAR CLASSMATES:

When you marched out of the Ritchie Coliseum that memorable hot morning of June 5, did you feel that you were leaving behind something?—something that you couldn't quite explain but you knew it had been the nucleus of your interests and activities for the past four years. And didn't you feel, although you wouldn't admit it even to the one who walked beside you for fear of being stamped "chicken," that somehow you couldn't swallow quiet so well? Well, I did. And that something was our "Maryland conscience" that had been so much a part of us.

So we each left and went our separate ways, tucking away in a corner of our hearts tender memories of days we thought we had to leave behind. And it was not until the night of July 1 that I realized such a feeling was unwarranted. It was on that date that I had the privilege of attending a dinner and meeting of the Alumni Board at the Longfellow Hotel in Baltimore. It was not until then that I saw what a going concern the Alumni Association is and how expertly its course is steered by those intensely interested and active members who make up its Board.

I won't go into the details of the meeting but I would like to tell you one remark that was made. A discussion was being held of the attendance of classes varying as it does and one member declared: "Newer classes never show as much interest. They are never as well represented."

Not having any statistics on hand to bear me out, I didn't like to contradict him, but I felt, as you would have felt, that surely he must have the wrong slant. So, come one, classmates, let's show the Alumni Association that the class of '37 is behind them. Let's remain "Maryland conscious" even if we can't still loiter about its campus. Then next year at Alumni Day, let's be the one class to have 100% attendance.

I'll be seeing you,

Ruth Kreiter,
Secretary, Class of '37.

When the Baseball Team Went North

When the baseball team went on the Northern trip, following the close of school, they were met by several alumni. At the game with Yale in New Haven, Conn., Frank Baldwin, '33, of Orange, Conn., and Dr. Frank DiStasio, M.D., '34, of New Haven, were on hand.

When the team arrived at Temple University in Philadelphia, they were met by A. Moulton McNutt, '04, president of the Philadelphia Group, J. P. Mudd, '07, secretary, accompanied by Robert N. Todd, '15, Lawrence J. Stabler, '22, Harry O. Yates, '24, Harry Heward, '97, Jim Harlow, '23, A. Moulton McNutt, Jr., W. P. Fusselbaugh, '22, and G. M. Parsley, '22, all of Philadelphia, Pa.

Geary Eppley, '18, and Professor J. E. Metzger, both well-known to many alumni, accompanied Burton Shipley, '14, coach, on the trip. Despite the loss of all games it was a splendid trip.

●

The Reunion of '17

When President H. B. "Hobby" Derrick of '17, called the class to order, eighteen members answered to the roll call in celebration of the 20th anniversary of their class. The minutes of the previous meeting ten years ago were read by Ferdinand Korff, secretary. Next, each member was asked for his experiences since graduation. This, reports the president, was exceedingly interesting. Absent members were talked about, and should be present at the next reunion to defend themselves. The next general class reunion was called for 1942 when their twenty-fifth reunion will be held. At that time a general reunion and banquet will be part of the program.

Gerneaux Hall Becomes French House

There was established last year at the University's summer session a French School, under the direction of Dr. W. F. Falls, acting head of the Department of Modern Languages. The objective of the school was to create a center where at a minimum expense students of French, isolated for six weeks from contact with English, could effectively devote their efforts to perfecting their knowledge of the written and spoken language, of French literature, history and civilization.

As a supplement, the French House has been established with Gerneaux Hall and the Home Economics Practice House serving the purpose. The women will room in the former and the men in the latter house. They will, however, eat together in Gerneaux Hall.

The French House will again be under the direction of Miss Margaret Herring, Fellow in French, University of Pennsylvania, assisted by the other members of the teaching staff, which includes three natives of France: M. and Mme. Pierre de Chauny, of Poitiers, and M. Andre Liotard, of Paris and Washington, D. C.

All those taking the course pledge themselves to use the French language for six weeks as their sole medium of expression.

The members of the staff hold themselves at the disposal of the students at mealtimes, during special study periods, evening gatherings or picnics. They will devote themselves to creating an atmosphere favorable to the rapid development of their guests' knowledge of French.

●

Fenton-Quinn

Louise Fenton, '35, a member of Kappa Kappa Gamma, and Edward Quinn, '34, a member of Theta Chi, were married June 17. Mrs. Quinn is a graduate in Education with first honors. Edward was a trackster of fame, president of the Student Government Association, and a graduate in Physical Education. The newlyweds reside in Washington, D. C. Ed is now going to summer school. In the winter he teaches at Takoma-Silver Spring Junior High School.

●

"But will you love me when my hair has turned to silver?"

"Why not? Haven't I stuck with you through brown, red, and black?"

BOARD MEMBER

CHARLES V. KOONS, '29

Charles V. Koons, '29, was elected as representative of the College of Engineering to serve on the Alumni Board for a term of three years. "Dinty," as he is familiarly called by Sigma Nu's, is an attorney-at-law with offices at 1331 G St., N. W., Washington, D. C. He has been active in the affairs of the Alumni Group of Washington, serving as Secretary-treasurer of the group.

Alumnae At May Day

Unintentionally omitted in the last issue of the NEWS were the names of some alumnae who attended the May Day festivities. Miss Stamp, Dean of Women, recalls from memory some of the alumnae who were present for the annual affair: Mrs. Eleanor Freeney Adams, '29; Miss Frances Wolfe, '25; Mrs. Lillian Ernest Wilson, '24; Mrs. Elizabeth Hook Day, '20; Mrs. Esther Williams Newell, '22; Mrs. Betty Amos Bull, '26; Miss Minnie Hill, '23; Mrs. Katherine Appleman Longridge, '29; Miss Catherine Barnsley, '30; Miss June Barnsley, '36, Mrs. Helen Conner Ditman, '27.

●

Chemist—Paul Beach, '35, a graduate in Industrial Chemistry, is now employed as a chemist by the Catonsville Milling Company, Catonsville, Md. Paul is a member of Alpha Chi Sigma, honorary chemistry fraternity.

Rev. J. L. Showell, '06, Honored

Old Fields Hall, near Hughesville, was the scene of a surprise party on May 18. More than a hundred of the leading parishioners gathered from the Trinity and Old Fields congregation in honor of Rev. and Mrs. John Letcher Showell, who after 10 years of service, are returning to Virginia. Rev. Archbold, D.D., Rector of St. Paul's Parish, Aquasco, paid tribute to the work of the rector and his wife, assuring them that the esteem and affection of the people would always follow them. At the conclusion of Dr. Archbold's address, the curtains on the stage were opened, showing displayed on a table a handsome, imported China dinner service presented to Rev. Showell by St. Alban and St. Agnes Guilds.

Glancing through the pages of the *Reveille*, 1906, we find that "Shike's" greatest ambition in life was to be a preacher, and we see that his ambition was fulfilled to his greatest expectations.

"Shike" was well-known on the Maryland campus for his splendid mezzo-soprano-falsetto voice which was the envy of all his classmates. He was secretary of the Athletic Association, Assistant Business Manager of the *Reveille*, and was on the Reception Committee for the June Ball.

●

Architect-Engineer

William Elliott, '29, of Easton, Md., engineering graduate, returned to his native county and began the practice of consulting engineer and architect. When the WPA came along, Elliott entered the service and was later promoted to Resident Engineer in charge of all work on the Shore. Recently, he found too much demand being made for his time as an architect, so he resigned his position with the WPA and again entered his original field of endeavor. Bill has built up a tremendous clientel which keeps him constantly busy.

●

Surgeon Insley, '33

Assistant Surgeon at the Salisbury Hospital is Dr. Phillip A. Insley, '29, M. D., '33. A native of Eastern Shore, Dr. Insley returns to serve his people. At College Park he was very active in extra-curricular activities, taking part in Student Government, Yearbook, Chorus, and many others in addition to track. He is a member of Sigma Phi Sigma social fraternity and O. D. K. honorary.

Chinese New Year » »

By P. L. PEACH, '03,

Federated Malay States.

I AM WRITING THIS LETTER on what we call here the "Chinese New Year Day." (This year it is February 11.) It is an ancient holiday of the Chinese; wherever the Chinese go in the world, if they can get together a few of their countrymen, they will celebrate. In this country there are thousands of them, so they have no difficulty in getting up a good-sized celebration, firecrackers, cakes, jelly, red packages, tea, love letters, and a large amount of good friendship to anyone who calls at their home on this day. I am going out this morning to make New Year calls on a group. I will probably keep going until late afternoon without a stop and then I will start out tomorrow and finish the list. On the staff of my school there are twelve Chinese teachers, and I will get to their homes if possible. An interesting thing about this Chinese New Year is that the new Government of the Republic above us has banned it and officially stopped it. But it has such a place in the life of China that it is very hard to get it stopped, so it is practiced, of course, in many places. I have heard that in order to keep it up and at the same time keep faith with the new Government, the people now call it "The Coming of Spring." Quite clever. You see, it comes near to the Springtime in the temperate zone and so particularly in South China it fits very well with that season. Leave it to the Chinese to think of some clever way to get their own way.

In conversation with one of the doctors who visited with us yesterday at the Rotary Club, I learned, of all races, the Chinese seem to get the worst cases of leprosy. The medical profession do not yet know why. They will find out some day. I am hoping some day to take down my file of private letters over a period of twenty years in this land and write out some findings. One that I expect to have in prominence is the "Mystery of the Chinese Mind." I have had cases of personal problems with Chinese about morals, money, education, home life, politics, religion, and after long inquiry I find that I have never gotten to the bottom. There is always a hidden path that is unrevealed. One must constantly watch for it, just like the scientist in the laboratory watches his test tubes for the unknown reaction. To deal with such people requires patience of a type that is not written in books. They are a wonderful people.

We who love our home land have felt very deeply for those who have suffered in the floods of late. We watch the papers daily for news that tells of relief. We have followed with intense interest the move of our President in reform of the Judicial System. I wonder *How* that will come out. Leaving out the real pathos and suffering caused by the floods, the news that really *Was* news came when we began to read of the possible union of the Warfield family of Maryland with the British Throne. That *was* news. In our American Home here we got it at least a month before anyone in this British Colony had the slightest notion of such. The British Press had rigidly cut it out. When it did get out, our telephone rang very often to know what it was all about, and when they found out that the Peaches' were from Maryland and that I had been in college with one of that family, (Josh Warfield) then the Britishers "lived" on our doorstep for weeks. Who is this Mrs. Simpson, where did she get to know Edward, etc., etc.,— we had a great time. But down deep we have felt for the English, for they are very distressed over the way matters have gone and they feel that Edward has "let them down" badly.

I must close, and go a'visitin', as Uncle Remus says.

Best to all on "The Hill."

PEACH.

Methodist Boys' School, Kuala Lumpur, Federated Malay States.

●

Helping Each Other

Frequently, alumni hear of opportunities in employment or the possibility of improving a position in which they are not interested but in which a fellow alumnus would be if he knew about it. When alumni hear of any open positions, notify the Alumni Office. There may be the name of an alumnus on file who would be interested in the opportunity. By this method there never should be any Maryland alumnus unemployed or working out of his or her profession.

It is one of the fundamental principles of the Alumni Association to cooperatively help fellow alumni.

Birch—The Magician

Under the auspices of the Alumni Association, Birch The Magician will stage a show at the University of Maryland on the evening of November the eleventh at 8:00 o'clock. All profits from the show will be for the Alumni Association's scholarship fund. Birch has gained a national recognition by the famous act of making the pony disappear, sawing the woman into four pieces, and escaping from the sealed box. It has all indications of being a real show. Write the Alumni office for tickets.

●

Research

Franklin B. Wise, '35, a former member of the *Diamondback* editorial staff, has announced his affiliation with Washngton Services, an organization specializing in economics research, publicity, and legislative representation. Frank was active in extra-curricular activities and was president of the Pi Delta Upsilon honorary journalistic fraternity, and a member of A. T. O. social fraternity.

●

Iowa—Charles H. Cunningham, '34, a graduate in the College of Agriculture, and a member of Alpha Gamma Rho fraternity, is now located at Ames, Iowa.

●

(*Announcement*)

Aviation Training

In the conquest by man of the problems of complex modern civilization, one of the outstanding phases, still in its youth, is aviation. In the development of this science, trained, intelligent minds, and physically perfect bodies are equally needed. Both are required of the Naval and Marine Corps aviator, whose training is second to none. This career-training is now made available to those young men psychologically, educationally, and physically qualified, at the expense only of their devoting the required time for study and practical training, and of being earnest in desire for this science. This advantage has come through the needs of the Navy to provide an adequate, trained Reserve force of competent aviators, and the entire facilities of Naval Aviation are utilized in developing the accepted applicants to the highest degree of knowledge and proficiency.

Address all inquiries to: Commanding Officer, U. S. N. R., Aviation Base, Anacostia, D. C.

« OLD LINE ATHLETICS AT A GLANCE »

By W. H. ("Bill") Hottel

SWIMMING was the only pastime that really lured when this was written and about all there is in sports at the University now is verbal.

In the final competition of the year, Bill Guckeyson, now at West Point, made his last appearance under Maryland colors by taking fourth place in the javelin throw in the National Collegiate Athletic Association meet at Berkeley, Calif., and Edwin Miller tied for third in the high jump of the Junior division of the National A.A.U. games at Milwaukee.

Guckeyson tossed the spear 203 feet 6⅜ inches, while Miller leaped 6 feet. Both of these marks were under their top performance. Guckeyson has bettered 208 feet while Miller has done 6 feet 3⅜ inches.

Guckeyson left a brilliant record in football, track, baseball and basketball back of him at College Park and should be a national figure for the Cadets. Miller has two more years at Maryland.

Dobson Takes Trip

FRANK DOBSON, football coach, is getting in trim for the next campaign by a trip across the country that will wind up with a stay in California. He will be back the latter part of August to get things in shape for the opening of practice on September 1.

Labor Day used to be the official time for beginning workouts under the Southern Conference rules but September 1 was made the date at the last meeting of the organization. This means four actual days will be gained this year as Labor Day does not come until September 6.

Considering the losses, Dobson will have plenty to think about. Another blow also hit the outlook recently when Frank DeArmey, 1936 center, who had been drilled all spring as a blocking back to fill the shoes of John Gormley, was operated upon for hernia. DeArmey will not be of any use on the gridiron until the middle of October at the earliest.

BECOMES A Ph.D.

DR. JOHN E. FABER

Jack to us, despite his scholarly achievements. He still will coach the Varsity lacrosse team and help with football and basket-ball.

MARINE OFFICER

JOHN J. GORMLEY, '37

Marines Get Gormley

SPEAKING of Gormley, we are pleased to report that he has been named a second lieutenant in the Marine Corps. In addition to being a football and boxing ace at Maryland, Gormley was an exceptional student and high officer in the Reserve Officers Training Corps.

There was only one thing about the Marine Corps appointment that didn't sit well with John. It was the stipulation that he could not marry within two years. And John's most recent expenditure was for a diamond ring for a certain College Park girl.

Pick Terp Stickmen

MEMBERS of Maryland's lacrosse team, that held on to its national collegiate title by having an undefeated 1937 campaign in collegiate ranks, dominated the all-State selections of Craig Taylor of the *Morning Sun* and of Paul Broderick of the *Evening Sun*.

Jack Kelly, goalie; Bud Meade, second defense; Rip Hewitt, center; Charlie Ellinger, out home, and Bon Nelson, in home, were first team selections and others were on the second outfit.

However, the boys seem to have overlooked Parker Lindsay, first attack, a self-effacing, great team player and next to Ellinger probably the most valuable asset to the Old Liners. Ellinger undoubtedly was tops.

Meade, who has played just a little lacrosse one year at Tome, showed the greatest advancement.

Grid Schedule Changed

WHEN this was written the football schedule was in the process of undergoing a little change that meant that Western Maryland would be played at College Park next fall and that Virginia would be met at Charlottesville.

Originally the tilt with the Terrors was booked for the Baltimore Stadium and the Cavaliers at College Park. However, Virginia found herself in a

(Continued on Page 9)

LOST TO MARYLAND

MAJ. FRANK WARD

R. O. T. C. officer who has been assigned to Army Staff School at Fort Leavenworth after four years of efficient duty at the University.

Excerpts from a Speech by Dr. H. C. Byrd

Over Station W.F.B.R. of Baltimore

"As citizens of the United States it is our duty to protect our land from aggression. God grant that in the performance of this we may never be called upon again to resort to arms. God grant that all differences which other nations have with us may be settled by peaceful means, but with our finite minds we know not the future and we must recognize that other nations of the world apparently are not yet ready to accept our political philosophy, our ideals of religious life, our conception of the rights of the individual. We do not believe that our Army or Navy should ever be developed beyond that point of efficiency and power necessary to protect our country and our people, but we do believe that any American citizen who advocates the reduction of one ship or one soldier below this point of protection is guilty almost of treachery to his country. Our national defense is of paramount importance to every loyal citizen. Not an Army or Navy for purposes of aggression, not for a show of power, not for sentimental glory, but to provide for us a reasonable security, and to preserve for our children the ideals and conditions of living that mean so much to us.

"Let us work for peace. Let us inculcate in our children the thought that peace and contentment go in hand with security, and let us, with that thought in mind, so develop our resources that we may defend our nation and perpetuate our ideals until such time as other nations are willing to accept the teachings of the Prince of Peace, which, only, can we ever attain full understanding among men and nations."

Old Line Athletics At A Glance

(Continued from Page 8)

position of making two trips in a row and not having enough home games and was very anxious to have the shift made.

As matters now shape up, the Maryland schedule will be as follows:

September 25—St. John's (Annapolis) at College Park.
October 2—Pennsylvania at Franklin Field, Philadelphia.
October 9—Western Maryland at College Park.
October 16—Virginia at Charlottesville.
October 23—Syracuse at Baltimore Stadium.
October 30—Florida at College Park. (Homecoming)
November 6—V. M. I. at Lexington. (11 A. M.)
November 13—Penn State at State College.
November 20—Georgetown at Griffith Stadium, Washington.
November 25—Washington and Lee at Baltimore Stadium. (Thanksgiving)

A mere reading of this list shows that the Terps have their work cut out for them next fall and if they can win half of those ten games they will have done a good job.

Faber Now Is Ph.D.

IT is Dr. John E. Faber now. Jack, whose main job is teaching bacteriology, got his Ph.D. in this subject at the recent commencement, but he still will stick to his athletic berths—head coach of lacrosse, assistant grid mentor and basket-ball aide. He's good at all jobs and getting better all the time.

Will Miss Major Ward

MAJ. FRANK WARD, who gave Maryland its first collegiate rifle championships—both varsity and freshman this year—has left for the Army Staff School at Fort Leavenworth, where he has been assigned. No officer ever to serve at Maryland has been more popular and he will be missed in many ways, while it is unlikely that a rifle coach of his caliber will be found to take his place.

●

Married—The marriage of Miss Gladys M. Bull, class of 1931, and Mr. Victor H. Baumann of Union, Ill., took place in Cumberland, Md., on June 19. The bride has been a member of the faculty of Fort Hill High School, having taught in the Allegany County schools for six years. Miss Evelyn Miller, '33, was maid of honor. Mr. Baumann, who was graduated from Grinnell College, Iowa, is the music director at Fort Hill High School, Cumberland, Md. The couple will make their future home in that city.

●

New Jersey—Mr. and Mrs. Charles Wesley Fouts, '32, are now living in Flemington, N. J.

●

Dorothy Miles Blood, '36, has been ill in the hospital but now is recovering nicely.

Campus News

Indiana—Rebecca Fouts, '36, has moved from Washington, D. C., to Camden, Ind.

○

Loans—Carroll Lowe, '11, is in Easton as a deputy for the Home Owners Loan Corporation.

○

Attorney—States Attorney for Talbot County is a Maryland Law School graduate, Oliver S. Mulliken, '25.

○

Judge—Chief Judge of the Circuit Court of Eastern Shore is Shehan W. Mason, a Maryland Law School graduate in the class of '96.

○

Married—Marjorie Willoughby, '33, married Mr. W. E. Tilghman of Cambridge. Mrs. Tilghman is active in the social service work for Somerset County.

○

Hardware—Fritz Bartlett, '36, the well-known boxing manager, has returned to Eastern Shore and entered the hardware business with his brother at Centreville, Md.

○

Married—Walter M. Eiker, '36, and Miss Doris Lyman Drew of Washington were married June 24 last. Walter, a graduate in the College of Agriculture with honors, is a member of Alpha Zeta honorary fraternity and participated in several extra-curricular activities.

○

Birth—Mr. and Mrs. Charles E. Habich announce the arrival of Karen Louise on May 27, 1937. Mrs. Habich was formerly Miss Helen Beyerle, class of '27 and a member of the Kappa Kappa Gamma Sorority. She graduated in Home Economics, was president of the Senior Women's Honor Society and took a very active interest in many extra-curricular activities. For three years, Helen served as a representative of the College of Home Economics on the Alumni Board.

○

Married—Mr. John Ward Savage, '32, married Miss Dorothea Elizabeth Burruss of Washington on May 21. "Jack," as he was better known, was a member of the Old Line Cross Country team, was very active in extra-curricular activities, and for four years a member of the track team. He was a member of the "M" Club, Sigma Nu social fraternity, and Pi Delta Epsilon and Kappa Phi Kappa honorary fraternities. The newlyweds will reside in Rockville, Md.

Employment Chances Best In Seven Years

Employment prospects of this year's college graduating classes are only a little less favorable than those of the 1929 graduates, and substantially better than the June, 1936 classes experienced. This evidence of continued employment is revealed in announcement of the results of a survey just completed by Investors Syndicate, of Minneapolis.

Engineering, business administration, teaching and general business classifications are offering employment in greatest volume, according to J. R. Ridgway, president of Investors Syndicate, in announcing the results of the study. Law, journalism and investment banking are near the foot of the list, he said.

These conclusions are based upon analysis of questionnaires returned by 218 leading colleges and universities which account for nearly half of the total enrollment of male and coeducational institutions.

In volume of recruiting among this year's graduates, General Electric Company, DuPont, Proctor & Gamble, Westinghouse and various American Telephone subsidiaries are leading.

Scholarship, personality, campus activity and popularity, character, leadership and general ability, in the order named, were most frequently given as qualifications being sought by prospective employers.

Our Dental Museum

(Continued from Page 4)

them out after dinner—or clean them with a brush and some chalk, scraped fine."

In answering, Washington inclosed $15.00, and wrote: "I feel obliged for your attention to my request, and for the directions you have given me."

Exhibit at World's Fair

These teeth have been exhibited in many places, having done more traveling out of the mouth of their wearer than they ever did inside. During his lifetime the first commander-in-chief of the United States Army often complained of these teeth interfering with his work, and historians have wondered as to their effect on the course of history.

Of almost as much historic interest is a collection of some of the dental instruments used a century ago. Among them is a group of "keys" so called from their resemblance to the large, old-fashioned door key. These were used for extractions, being the forerunners of the modern forceps, and were wielded something like a modern bottle opener.

There are more than 1200 items in the museum's collections. Diplomas given to those first graduates are being preserved by the school, which is headed by Dr. J. Ben Robinson, a member of the class of 1914.

●

Robertsons In Easton

Mr. and Mrs. Harold Robertson are located in Easton, Md., where Mr. Robertson is Food and Drug Inspector for the Board of Health. Mrs. Robertson was formerly Miss Dorothy Chaflin of College Park and a member of the class of '33. Harold graduated in '32.

Bob Poole In Air Conditioning

Since Robert Poole, '35, an A. T. O., graduated in engineering, he has been with the Air Conditioning, Incorporated, of Baltimore, as service engineer. During this time he has serviced hotel, department store and funeral parlor jobs, as well as many smaller ones.

Bob is now going to Newark, N. J., to take a 10-week training course in estimation and installation under the Carrier Corporation, 850 Frelinghuepen Avenue, Newark, N. J.

●

Palestine—Miss Elizabeth E. Haviland, M. S., '36, now is located at the Friends Girls School at Ram Allah, Palestine.

Personal Pencilings

Dentist—Gordon Scott (Willie) Pugh, '33, former outstanding athlete from Maryland and all-American lacrosse player, has completed his course of study at the Dental School and opened offices in the Medical Arts Building, Baltimore. Honors go to "Willie" for his leadership and ability in editing The Mirror, a Dental School year book. "Willie" is sure to be a success in business.

o

Railroad—Parks Patterson, '37, and Harold Kelly, '37, both graduates of the College of Engineering, are working for the Pennsylvania Railroad in Washington. Parks was a member of Scabbard and Blade, the Latch and Key Society, business manager of the *Old Line*, a member of the Engineering Society, the American Society of Civil Engineers, Phi Delta Theta social fraternity, and Pi Delta Epsilon honorary journalistic fraternity. Harold was also a member of Scabbard and Blade and was colonel in the R. O. T. C. He was also a member of the Engineering Society and the American Society of Civil Engineers. He was on the varsity boxing squad for three years.

o

Nursery—Samuel Hemming, '30, and Robert S. Johnston, '29, are in the nursery business near Easton, Md. Both are members of Alpha Gamma Rho and took an active interest in extra-curricular activities in the College of Agriculture.

Steel—Wilson Clark, '37, left recently for Bethlehem, Pa., where he accepted a position with the Bethlehem Steel Co., having been selected from the University for this position. Wilson was a member of Scabbard and Blade, a captain in the R. O. T. C. and was a member of Tau Beta Pi honorary engineering fraternity.

o

Singing—Miss Clara Mae Tarbett, '37, has been to Chautauqua, N. Y., where she attended a concert given by the A Capella Choir. Miss Tarbett has recently been elected to two honorary fraternities, Phi Kappa Phi, and Alpha Psi Omega. She was active in the Opera Club while in the University.

o

Exchange—Johnny Hebb III, '37, is with the Physicians' Exchange in Baltimore. Johnny was editor-in-chief of the 1936 *Terrapin*, a member of Omicron Delta Kappa honorary fraternity, and Pi Delta Epsilon honorary journalism fraternity.

o

Insurance—Mr. Maurice Sinsheimer, '37, is affiliated with the Biggs-Darby organization of the Massachusetts Mutual Life Insurance Company, located in the Calvert Building in Baltimore. Maurice graduated in the College of Arts and Sciences and was a member of the Rossbourg Club.

o

F. B. I.—Herbert Allison, '35, a graduate in the College of Arts and Science, is now with the Federal Bureau of Investigation in Washington. "Herby" was editor-in-chief of the Old Line, worked on the *Diamondback* staff for four years, was president of Pi Delta Epsilon, honorary journalistic frater-

nity, a member of Omicron Delta Kappa honorary fraternity, and Alpha Tau Omega social fraternity.

O

Representative—J. Donald Kieffer, '30, was present for the University of Maryland at the College-Vocational Night exercises of the Lawrence High School at Lawrence, N. Y.

O

Birth—Mr. and Mrs. Norman I. Shoemaker announce the arrival of their second son, Thomas Linden, February 16, last. Mr. Shoemaker is a member of the class of '28.

O

Health—H. D. Slade, '35, M. S., '36, was with the Baltimore City Health Department as senior bacteriologist since last June. He recently returned to the University as a commercial research assistant.

O

Fishery—H. E. Crowther, M. S., '34-35, is still engaged in commercial bacteriological research in fishery by-products. He was in California a large part of last summer and last winter was in Boston.

O

Philippines—Col. O. H. Saunders, '10, secretary of his class and ardent supporter of the Alumni Association, has been assigned to the Philippines for two years. For the past year he has been at Fort Benning, Ga.

O

To China—Mrs. L. King Quan (Alice R. Lee), M. S., '35-36, visited the department this spring just before sailing for China. She can be reached there at 524 North Szechuon Road, Shanghai, China, c/o Mr. Y. K. Huang.

O

Minnesota—A. P. Dunnigan, Ph.D., '36, accepted a position in the laboratory of the Minnesota State Department of Health last summer and his address is the Division of Preventable Diseases, University Campus, Minneapolis.

O

Represented—Dr. C. F. Williams, '99, superintendent of the South Carolina Hospital at Columbia, S. C., was the University of Maryland representative at the inauguration of President L. J. McKissick, University of South Carolina, on April 6.

O

To Fly—Lyman McAboy, '35, the 155-pound versatile Old Ringman, has turned his thoughts to the air. Recently, "Mac," who is now athletic officer for the Marine Reserves, took his baseball team by plane to Connecticut for a game. He now is applying for admission to the U. S. Naval Aviation School at Pensacola, Fla.

"Mac" has been tutor of the freshmen ring team at the University for the past two years. At the present he is assistant safety engineer at the Greenbelt Project of the Resettlement Administration.

O

Married—Miss Edith Gram, a sophomore in the College of Arts and Science and one of the well-known girl cheerleaders stepped into the matrimonial world on June 16, with Mr. John Poole of Washington. Edith is a member of the A. O. Pi sorority and her presence will be missed next fall.

O

Moves—Horace Richard Higgins, graduate of the class of 1933 (Mechanical Engineering), is back in Washington working as an engineer with the U. S. Bureau of Standards, having left Knoxville, Tenn., where he was working as an engineer for about a year, with the Fulton Sylphon Company.

Higgins address is 322 Fifteenth Street, N. E., Washington, D. C.

O

To Wed—Dr. Edward King Morgan, '21, of Brooklyn, New York, will be married during the summer, it is said by a former school mate. Dr. Morgan was well-known on the University campus as Eddie. He was in charge of the activities at the University dining hall and today he is a prominent physician in Brooklyn.

Microphone Technique

Announcement was made today by Professor Charles S. Richardson, head of the Public Speaking Department, of a new course in microphone technique, unique in that it is the only one of its type in the world, to be offered here next year under the joint management of the University and the Columbia Broadcasting System.

Professor Ray Ehrensberger will hold the course in cooperation with Mr. John Willard, Columbia Broadcasting System engineer; both men will deliver one lecture a week. The course will meet twice a week and will be given two-hour credit.

It's a Maryland Tradition!

After the game, in the evening, at lunch, at any and all times Marylanders get together you'll find them at the Varsity Grill—newly renovated. Your school spirit cannot be par until you are a regular patron.

O

Fire Prevention Instructor Appointed

Another service for the people of Maryland has been added to the program of the University. R. C. Criswell, former instructor of Ohio and West Virginia firemen, has been appointed by Dr. H. C. Byrd, president of the University, as professor of fire prevention, a new chair created by a recent act of the Legislature.

Announcement of Criswell's selection for the post followed a conference between Dr. Byrd, S. S. Steinberg, dean of the College of Engineering, and members of the Fire College Committee of the Maryland State Firemen's Association.

The instructor in fire prevention will be assigned to the College of Engineering. The Legislature appropriated $10,000 for the service. Criswell will assume his duties with the opening of the fall term.

●

Kappa's New House

Kappa Kappa Gamma, national sorority, is building a new home in College Park. The new location is just around the corner from their previous home on College Avenue. Cornerstone laying was held early this summer and work has been progressing at a rapid pace with the hope that the new home will be ready for occupancy by the time school opens in the fall. It is a large brick construction of colonial design. It is expected to accommodate between 35 and 40 girls with apartment quarters for the house mother.

Maryland Alumni News, issued monthly by the University of Maryland Alumni Association at College Park, Md., as second-class matter under the Act of Congress of March 3, 1879.

Annual Alumni Association dues are $2.00. One year's subscription to Alumni News, 50 cents.

Homecoming October 30

A very important date in the calendar of the University is the Annual Alumni Homecoming to be held October 30 this year. On that date—football! ! ! One of the outstanding universities of the South, Florida, will be the Terrapins' opponent. It will be the seventh meeting of the Gators and the Terps. Both are water animals, but here's hoping the game is not all wet!

It is also the fourteenth annual reunion of the old grads on the campus. The program will also include the annual meeting of the "M" Club, the Homecoming Dance and the Alumni Mixer.

October 30 should be marked on your calendar now, right now, as the day you will spend "on the hill."

●

Philadelphia Group Will Meet October 1

On Friday, October 1, the Philadelphia group of the Alumni Association will hold its fall meeting. It is on the evening prior to the gridiron classic between the University of Pennsylvania and Maryland U. at Franklin Field. A. Moulton McNutt, '06, has announced that the Pennsylvania Athletic Club has been engaged for that date and committees are beginning work on the arrangements. Several faculty members and athletic luminaries from College Park and Baltimore will be on hand.

A regular football ballyhoo party is planned. Reservations should be made early with J. P. Mudd, '07, at 173 Manheim Street in Philadelphia, Pa., who is secretary of the club.

All alumni who plan to attend the game cannot afford to miss the rally. Familiar faces, old friends, new folks, and a great time to be had by all.

●

N. Y. A.—Paul Welsh, '35, is with the National Youth Administration with headquarters in Baltimore. Paul is well remembered as organizer and president of the student Democratic Club which he started while attending the University.

Hon. John B. Gray, '75, Oldest Graduate, Succumbs

THE University's oldest graduate, Hon. John B. Gray, '75, died at his home in Prince Frederick, Md., at the age of 84 on August 12. He is the father of three sons who are also Maryland graduates, J. B. Gray, Jr., '14; George B. Gray, '16; and W. Dorsey Gray, '17. Mr. Gray was a native of Calvert County and generously gave his services to his people in many public offices. He was a lawyer by profession and served as State's Attorney for Calvert County. He was chairman of the Board of School Commissioners, and for many years president of the Prince Frederick branch of the County Trust Company of Calvert County. He seldom missed an alumni reunion at College Park. He was always an ardent supporter of the Alumni Association. For years he was an outstanding leader of the Democratic party in Southern Maryland.

Mr. Gray is survived by his wife, Mrs. Maurine Laville Gray, three daughters, Mrs. Charles O. Clemson, Miss Sadie L. Gray, and Miss Marguerite Gray, and his three previously mentioned sons.

Baltimore Group's Mid-Summer Function

Among the outstanding functions of the Baltimore group is the annual mid-summer supper dance. It was held for the second time at the Summit, well-known and popular summer cabaret club of Baltimore.

More than 40 people were present for a social get-together of old friends. Chester W. Tawney, '29, president, spoke, but no formal program was carried out. The Summit provided a very entertaining floor show, and dancing filled the evening.

Mr. Emanuel Zalesak, '25, president of the Alumni Association, was the guest of honor. George Weber, '33, was chairman of the Arrangement Committee.

Others present were Mrs. Chester Tawney (formerly Miss Edith Stinette, '32); Joe Deckman, '31; Mr. and Mrs. James O. McWilliams, '29 and '31; Dr. and Mrs. Buckey Clemson, '21; Robert Kent, '34; Gordon Hammond, '35; Alice Sterling, '36; Dr. Michaels, Mildred Kettler, '31; James Loughran, '32; Josephine Blandford, '27; Mr. and Mrs. Mason Albritton, '23; J. W. Albritton, '32; Howard Tippet, '28; Joseph Crecca, '35; Dr. DeMarco, '28; Paul Welsh, '35; Arthur Van Reuth, '34; Mr. and Mrs. Arthur Kidwell, '35; John Silkman, '35; Joe Harris, '36; Robert Poole, '35, and George F. Pollock, '23.

They will all be there next year. Will you?

From Los Angeles

In a recent letter from Calvin G. Church, '00, now with the United States Department of Agriculture as a chemist and located in Los Angeles, he gives an interesting note which appeared in the *Los Angeles Times*. "Mr. Ed. Durling, columnist, wrote about his tour of the east during which he passed the University. His remarks were that it was one of the most beautiful he had ever seen." Church said that such remarks were gratifying to one so far away from the campus "on the hill."

●

News Items

It has often been said that "News is anything which makes a maiden lady say, 'Well, upon my word,' or 'I'll declare.' "

Alumni, there is much that happens every day that is news for your classmates. Picture yourself for a moment in some distant part of the State, country or world, and the only way you hear about many of your old friends is through news columns; and many times you will make a similar exclamation.

Frequently you have successful achievements yourself as well as hear about others. This is news for the alumni, wherein they may read of former classmates' activities from the Atlantic to the Pacific, from the Great Lakes to the Gulf and even from Singapore to Jerusalem.

Every alumnus is full of interesting items and the ALUMNI NEWS is your paper; make it an interesting publication by sending the editor news.

Medical Honors

Recently, Dr. Charles G. Spicknall, '31, of Hyattsville, Md., passed with honors the Maryland State Board and United States Public Health Board medical tests, making him eligible for a commission in the Public Health Service.

Dr. Spicknall began his interne work last year at the United States Marine Hospital in Baltimore, and he is the only one of the group to remain for a second year of interneship, which makes him assistant to staff eye, ear and throat specialist.

While a student at College Park, he was awarded the James Goddard Memorial Medal for scholarship excellence and moral character among Prince George's County students. He was also awarded the *Diamondback* medal for serving on the school paper. Dr. Spicknall took his medical work at George Washington University.

●

Employment

In an effort to render employment and placement services to our alumni it is essential to have the name and information of each interested alumnus on file in the Alumni Office. This does not necessarily mean that everyone will be placed immediately or assured a better position, but it does mean that if we have your name on file and the opportunity occurs, we can immediately contact the interested parties. The association will, however, make every effort to find employment for all unemployed alumni who are registered.

There have been occasions when an alumnus or University authorities have heard about certain openings calling for immediate recommendation with certain qualifications and experience. Unless your name is on file we are frequently at a loss as to who has the qualifications or would be interested.

To assist the Alumni Association in improving this service, all interested alumni are requested to apply at the Alumni Office for a questionnaire. Also, should you hear of any vacancies, please notify the Alumni Office.

There are some possible vacancies now in U. S. Coast Guard drafting, library work, home economics, fellowships for master's degrees, engineering, agriculture, and economics. WRITE THE ALUMNI OFFICE FOR INFORMATION.

Cairns, LL.B., '26, A Censor » »

YOU have probably never heard of Huntington Cairns, LL.B., '26, but he plays a pretty important part in your literary life, if you have one; you can't buy a foreign book or magazine if Mr. Cairns, in his capacity of special legal adviser to the Treasury Department, has forbidden its importation into the United States. He doesn't make anywhere near as much public stir as John S. Sumner, but he passes judgment on some 600 books a year, deciding whether or not they violate Section 305 of the Tariff Act, which prohibits the entry of seditious literature and obscene books, pamphlets, drawings, etc. Books seized at a port of entry are passed on through the Collector of the Port to the Bureau of Customs, in Washington. The Bureau sends them to Mr. Cairns, who lives in Baltimore. Mr. Cairns reads them and sends his opinion to William R. Johnson, chief counsel to the Bureau of Customs. Most of the time the Bureau takes Mr. Cairns' advice; extremely tricky decisions are referred to Herman Oliphant, general counsel to the Department of the Treasury, whose word is final. After this, the books in question are either burned by the public executioner or handed back to the importer, without apologies.

Never having met a censor, we made a point of calling on Mr. Cairns the last time he was in New York. He's a middle-sized, comfortably built fellow, with a round face and a quick smile. He is only thirty-two, and just misses being a prodigy, having received his LL.B (University of Maryland) at the age of twenty-one. That same year he gave up chess, after having reached a point where he could play Alekhine and the other masters; took up too much time, he told us. Mr. Cairns has held his present post for three years, and before that had a certain amount of experience on the other side of the fence. In 1929, he persuaded the U. S. Customs Court to reverse a ruling against George Moore's translation of "Daphnis and Chloe." He says that it's not so difficult as you might think to differentiate between literature and pornography. Decisions are easy when they involve publications with tiles like "Passions at Play," "Nudists in the Raw," and things of that sort. In dubious cases, Mr. Cairns tries to get a concensus of critical opinion about the piece, and investigates its background, which is sometimes illuminating. For instance, when he was called on for an opinion about Alfred de Musset's "Gamiani," he dug around in libraries until he found a letter from de Musset to his publisher, complaining about the low standard of pornographic books, and saying that he, de Musset, could do much better. That was enough to put "Gamiani" on the *index expurgatorius*. And of course no book, classic or not, is admitted if it's illustrated with feelthy peectures.

You mustn't get the impression that Mr. Cairns is a full-time censor. His real job is law; he's a partner in the legal firm of Piper, Carey & Hall, specializing in corporation and taxation law. Twice a week he lectures on law at the University. Saturday afternoons and Sundays, he's likely to be working on a book; writes things with titles like "Havelock Ellis: An Appreciation," "Our Neurotic Age," and "Law and the Social Sciences." And he reviews books for the Baltimore *Evening Sun*. Secret is that he reads awful fast; read "G. With the W." in one sitting. Mr. Cairns and his wife are two of the three people in Baltimore who play Go, that complicated Oriental game in which each player has 300 pieces, and which is much harder than chess. Mr. Cairns leads a full life, even for a lawyer. A while ago, to assist a psychologist friend with an experiment, he dosed himself for a while with peyote, a drug used in religious ceremonies by the ancient Aztecs. We have his word for it that, if you have never taken peyote, you've never really seen color. —*The New Yorker*, June 5, 1937. (Reprinted by permission.)

●

Maryland Alumni In the Orient

Several Maryland alumni are in the center of the Sino-Japanese conflict. Capt. J. T. McQuade, '24; Capt. John Hough, '25; Capt. Kennett Chappell, '23; Capt. J. R. Lanigan, '26, of the U. S. Marine Corps. All, as far as known, are in the International Settlement at Shanghai.

Saunders To The Philippines

Col. O. H. Saunders, '10, the energetic secretary of his class is near the center of the Far East unrest. He is now stationed at the Philippines for a period of two years.

F. A. C. D. Degree Awarded Dr. Lynch

Dr. Daniel F. Lynch, of 1835 K Street Northwest, Washington, D. C., has been made a fellow of the American College of Dentistry. The fellowship, which is honorary, is considered among the highest distinctions attainable by members of the dental profession.

To become a fellow of the exclusive organization, a dentist must have practiced at least 10 years and have contributed to teaching and research. Fellows are entitled to use the initials "F. A. C. D." after their names.

Only 650 men in the country hold fellowships in the college. This year's list, which was read at the American Dental Association convention being held at Atlantic City, contains 65 names.

The college, which corresponds to the American College of Surgery, established the fellowships in order to encourage high standards of research.

Dr. Lynch, who is secretary-treasurer of the District of Columbia Dental Society, completed his dental studies at the University in 1925.

●

Colonel Silvester Transferred

Col. L. M. Silvester, '11, U. S. Army, prominent Alumni leader, is now stationed at Fort Benning, Ga. He was formerly at Fort George Meade, Md. Col. Silvester has taken a very active interest in the affairs of the Alumni Association. He served for two years as president of the "M" Club and was general chairman of the 130th Anniversary Banquet held in Baltimore last February. In his college days Col. Silvester was a leader in many student activities. He was a captain in the cadet corps and president of several student organizations. He was an athlete of note having won fame as fullback on the gridiron for three years. He hails from Portsmouth, Va., took a chemical course but liked military life so well that he has made it his career. His classmates wrote about him in the *Reveille* as follows: "He is a soldier fit to stand by Caesar and give directions—Shakespeare." This is the impression of Lindsay Silvester made on his fellow students and the attainment of a high rank in the Army. Today he is Lieut. Col. L. M. Silvester.

State Supervisor Employment Service »

THERESA F. DUNNE, '32, has recently been appointed State supervisor of the Maryland State Employment Service. Miss Dunne is thus placed at the head of one of the most important State agencies dealing with the problem of unemployment. As she assumes her position of State supervisor, it will place her in the administration of the Employment Service.

The service is State-wide, operating employment offices in Baltimore City, Towson, Frederick, Hagerstown, Cumberland, Rockville, Hyattsville, Easton and Salisbury. These offices are all staffed by workers trained in the business of interviewing applicants for jobs, of accurately appraising their employment possibilities, and of finding the right job for them.

Since this organization is financed solely by public funds, Federal and State, no charge for its service is ever made, either to the worker or to the employer.

Private Industry Jobs

Part of its work has been the registration and classification of all relief people, and the selection of workers for WPA and PWA projects, but its operations are by no means limited to these programs.

Indeed, the primary function of the Employment Service is to find its applicants jobs in private industry. To this end, staff members are constantly calling on employers in their district, informing them of the nature of the service and soliciting their employment business.

In Baltimore City, an entirely separate division has been set up to serve commercial and professional applicants. Its attractive office is located in Room 1710 Court Square Building; and most members of our alumni who are looking for work would do well to register there. However, if you are living nearer one of the other offices, you should apply at that one.

During the month of July, 1937, the Commercial and Professional Division of the Baltimore office placed a young graduate electrical engineer with a large industrial concern, filled several sales positions with a business machine company, placed an office manager with a shipping concern, a junior analytical chemist with a large manufacturing company, a traffic manager with a shoe manufacturer, and filled a number of well paid sales positions.

This division also reports that there

MISS THERESA DUNNE

are shortages among its applicants of qualified mechanical draftsmen, mechanical engineers, young male stenographers, and experienced operators of office machines.

But whatever your qualifications are, you are assured of a courteous, understanding, and expert interview if you apply for work at any of the offices of the Maryland State Employment Service. If you want a job, or a better job, go at once to the nearest office and register. The Employment Service will do everything in its power to help you find the right job.

●

Automobiles—John Zebelean, '37, is with the Chevrolet Company of Baltimore. He is connected with the Assembly Plant.

●

Sunday School Teacher—"Dear children, tell me the last thing you must do before going to bed?"

Wise Child—"Put the door key in the mail box for Grandmother."

Traffic Control Course Planned

A special course of instruction in traffic control for police from Maryland, Virginia, the District of Columbia and other states will be given at the University this fall under the auspices of the College of Engineering.

This is the third short course offered by the college. A course for volunteer firemen has been conducted at the University for the last eight years, and last year an instruction course for water and sewage treatment plant operators was inaugurated.

Dean S. S. Steinberg of the College of Engineering said the list of instructors for the traffic control course will include Lieut. Franklin M. Kreml, director of the safety division of the International Association of Chiefs of Police and probably the foremost authority on traffic control.

Course Starts September 20

The traffic course will be given September 20 to October 2. The short course for volunteer firemen from Maryland and several other states will be offered September 7, 8 and 9, and the instruction for water and sewage treatment plant operators September 13, 14 and 15.

The traffic control course will include instruction in traffic accident reporting, court work and presentation of evidence, public speaking, psychology of drivers and pedestrians, law enforcement and similar subjects.

Civic organizations in Maryland, Virginia and Washington are contributing toward the expense of the instruction.

First of Kind Here

This is the first such instruction offered in this region. Besides the civic organization, other groups cooperating in the traffic course include the International Association of Chiefs of Police and various police departments.

Boy's and Girl's 4-H Club Holds 19th Annual Meeting

MORE than 600 boys and girls from every county in Maryland attended the nineteenth annual 4-H Club Week at the University campus, August 5-10. The largest single enrollment from any one county was Baltimore County with 73 boys and girls, Carroll County was second with 72, and Frederick County was third with 54.

One of the outstanding addresses of the week was that given by Washington I. Cleveland, representative of the American Automobile Association, who appealed to the club members to use caution and sanity in driving automobiles. He emphasized that the majority of traffic deaths in the country involved drivers between the ages of

The oldest building in the United States devoted to the teaching of medicine. (1811). *Dissecting was first made compulsory in curriculum here.*

Over 50% of the doctors now practicing in Maryland were trained in the University's SCHOOL OF MEDICINE.

18 and 30, and unless the present death rate is decreased the number killed on Maryland highways this year will be one-third greater than in 1936, when a total of 498 persons lost their lives.

Mr. R. Bascom Broun, Jr., president of the Maryland Bankers' Association, assured the boys and girls that the bankers are vitally interested in their welfare, ambitions and achievements. He said, "We realize that the boys and girls of today will be the leaders of tomorrow and we invite you to secure our help and advice."

One of the highlights of the week was the talk by Dr. H. C. "Curly" Byrd, president of the University of Maryland, who welcomed the young people to the campus Friday morning and described the work and objectives of the University. Dr. Byrd said, "The University of Maryland was never in a better position to serve the people and particularly the youth of Maryland." He advised the boys and girls to pay particular heed to their records in high school, pointing out that upon those records would stand or fall their chances of attending college in later years.

Dr. T. B. Symons, director of the University of Maryland Extension Service, urged the young people to "approach their friends and work in life with open-mindedness." "Education begins," he said, "with an open mind, although it is necessary to discriminate between the good and bad. Any person will go further in life if he forgets his prejudices."

At special consecration services held on Sunday evening, nineteen new members were taken into the All Stars, an honorary organization of 4-H clubs in Maryland. In the morning, special religious services were held and an address was given by Rev. Herbert Payne, Lansdowne Lutheran Church, a former 4-H club member.

The culmination of the week's activities was a Style Revue held Monday morning in which 70 4-H girls took part, styling dresses made by themselves. Miss Marjorie McKnight of Dorchester County was named grand prize winner. Her winning costume was a blue moire taffeta informal party dress. She will represent the State of Maryland in a National Style Revue to be held at the National 4-H

(Continued on Page 9)

School of Medicine

Is the principal source of supply for physicians in Maryland, especially in the counties.

Has provided 929 of the 1,829 practicing physicians in Baltimore, and 453 of 909 physicians in the counties.

Makes a special effort through scholarships to furnish a continuous addition to the number of practitioners in rural Maryland, which in many places is quite too small.

Provides surgical and medical care for a great many indigent poor who are unable to provide that attention for themselves.

In its dispensary, provides services at practically no cost for people who make approximately 100,000 visits annually.

Conducts extension courses in different parts of State for physicians, so that practitioners in rural communities may be kept abreast of the most modern developments in medicine.

Conducts research from which practices are developed that improve health conditions generally and provide new technique for handling cases.

« ATHLETIC PROSPECTS AT A GLANCE »

By W. H. ("Bill") Hottel

ABOUT all that really was certain about Maryland's football squad when this was written was that the griders were to report September 1 and that they would find the athletic facilities at College Park in attractive trim for the 1937-38 campaign.

Summer months have been utilized as clean-up and paint-up time for the athletic equipment, with Athletic Director Geary Eppley directing the operations. Most of the work has been done by football boys and if they do as well on the grid as they did with the brush and tools a winning season should result.

o

Improved and Painted

ALL of the outdoor facilities have been brought up to par, including the football and baseball stands and the board running track. This means all the needed repairs have been made and that a fresh coat of paint was applied in each case.

Improvements include the enclosing of the baseball field as a conjunction to Byrd Stadium and the rehabilitation of the press box on the football field including the installation of lights and protection against bad weather.

Three more acres to the practice and recreational area also will be made available. This ground, on the extreme eastern end of the practice field, is undergoing the needed smoothing, leveling and seeding to put it in usable condition.

Turf on the football field also has been rehabilitated and some bad spots ironed out and a smooth surface should be ready by the time St. John's of Annapolis is met in the opening grid game on September 25.

o

Unexpected Blows Struck

BUT to get back to football, it is our sad duty to report that losses, in addition to graduations that took Bill Guckeyson, John Gormley and seven other letter men, appear to be of a tragic nature. What total of blows definitely will be struck will not be known until the squad assembles, but if certain unexpected losses are increased, as is rumored, then the coaches will have a tremendous job to build up a combination to cope with the difficult 10-game schedule.

It already has been established that John Carliss, ace of the freshman backs, and John Page and Alex Males, reserve linemen last fall, and some lesser lights will not return, and rumors include still others who were figured upon to play an intergral part of the eleven.

Page, who also is a lacrosse star, has gone to work, and Males, 175-pound boxing ace and outstanding javelin thrower, failed to makeup needed grades at Summer School. Page was a tackle and Males a guard.

o

DeArmey Operated Upon

IN addition, Frank DeArmey, center, last year who was shifted to blocking back in Spring practice, has undergone an operation for hernia and will be lucky to get into action by the middle of October, while Adam Bengoechea, a fine quarterback prospect from the 1936 Frosh, fell off a ladder and broke both his arms at the wrists. He probably won't play at all.

Despite these losses, however, the Terps should have a better line than last year, but the backfield surely can't be expected to match last year's, either on offense or defense, the latter being a particularly acute problem.

Jarring Jim Meade, Charlie Weidinger and Waverly Wheeler are the returning lettermen backs. They, with Rip Hewitt, a sweet ball carrier, and Jack Egan offer the veteran offensive nucleus.

Bill Brown and Ralph Albario, recruits from the Frosh, should provide a better pair of tackles than Maryland has had in sometime, while the veterans, Bob Walton, center; Bill Wolfe and Mike Surgent, guards, and Blair Smith and Nick Budkoff, ends, should give a staunch first string forward wall. Line reserves also appear ample.

o

Grid Prices To Be Popular

WHILE the complete range of prices for the home football games this fall, which include the two in the Baltimore Stadium, were not definitely determined when this was written, the scale was certain to be such as to meet with popular favor.

For the opening game with St. John's, all of the grandstand seats will be sold at 75 cents, with end bleachers for school students at a quarter.

It also has been decided that the top price for any seat at any home game will be $1.65 and that the majority of tickets to all of the contests will be $1.10. For the Western Maryland and Florida games at College Park there also will be end bleachers at 40 cents for the schoolboys.

Florida, which will be making its first trip to Maryland since the 1934 clash in the Baltimore Stadium, will be the homecoming attraction and should offer an alluring game.

o

Frosh Grid Games

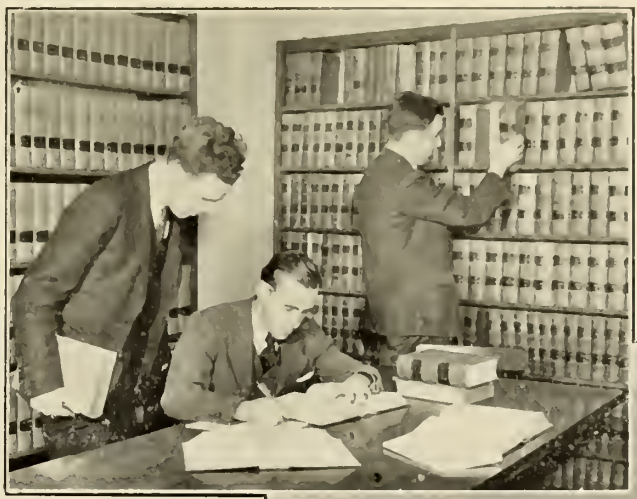
October 15—Georgetown at Washington.
October 22—Catholic U. at College Park.
October 30—B Squad at Tome.
November 5—Western Maryland at College Park.
November 13—Washington and Lee at College Park.
November 20—V. M. I. at Lexington.

FOOTBALL CARD

(Last year's scores in parenthesis)

September 25—St. John's of Annapolis at College Park. (20-0)
October 2—University of Pennsylvania at Philadelphia. (Did not meet)
October 9—Western Maryland at College Park. (0-12)
October 16—University of Virginia at Charlottesville. (21-0)
October 23—Syracuse University at Baltimore Stadium. (20-0)
October 30—(Homecoming) University of Florida at College Park. (6-7)
November 6—Virginia Military Institute at Lexington. (7-13)
November 13—Penn State College at State College. (Did not meet)
November 20—Georgetown University at Griffith Stadium, Washington. (6-7)
November 25—(Thanksgiving) Washington and Lee at Baltimore Stadium. (19-6)

Snapshots From The Law School » » »



Sometimes it takes ten days of preparation for one hour in court.

A practice case before the dean. →

Some practice cases are heard before members of the Baltimore judiciary so that a senior student may learn what a judge will expect of him.

Some Outstanding Graduates

THERE have been more than 4,000 to graduate in law since 1869. Among them are some outstanding men in the profession who have served State and nation. The following are just a few of the leaders:

Hon. Nevitt Steele, 1830, the undisputed leader of the Maryland bar for many years and one of the outstanding lawyers of his time in the country.

Hon. Albert C. Ritchie, 1898, Governor of Maryland and one of the most prominent figures in the political history of the country during recent years.

Hon. Millard E. Tydings, '13, U. S. Senator from Maryland and a leading figure in the national politics at the present time.

Hon. William Cabell Bruce, 1882, former Senator from Maryland who attained national prominence while serving in the Senate and is also widely known for his writings on various subjects.

Gen. Amos W. W. Woodcock, '10, formerly director of U. S. Bureau of Prohibition under President Hoover and now president of St. John's College.

Hon. John C. Rose, 1882, formerly judge of the U. S. Circuit Court of Appeals for the Fourth Circuit; generally regarded during his lifetime as one of the ablest Federal judges in the country and prominently mentioned for appointment to the U. S. Supreme Court several times.

Hon. Charles A. Boston, 1886, one of the leading lawyers of the country at the present time and former president of the American Bar Association.

Hon. Carroll T. Bond, 1896, chief judge of the Maryland Court of Appeals and also widely known for his writings in the field of legal history.

Hon. George L. Radcliffe, '03, senior vice-president of the Fidelity Deposit Company; now U. S. Senator from Maryland.

Hon. Morris A. Soper, 1895, judge of the U. S. Circuit Court of Appeals for the Fourth Circuit and generally regarded as an outstanding member of the Federal judiciary at the present time.

Boy's and Girl's 4-H Club Holds 19th Annual Meeting

(Continued from Page 7)

Club Congress in Chicago this fall. In addition to Dr. Byrd, '08, and Dr. Symons, '01, other alumni who were active in the Club Week program were: Mylo S. Downey, '27, assistant in club work; O. R. Carrington, '28, assistant extension editor; Harry W. Beggs, '28, assistant county agent; Charles Remsberg, '26, assistant county agent; Sherard Wilson, '31, assistant county agent; Wheeler Ensor, '33, assistant county agent; Elizabeth Johnson, '35, assistant home demonstration agent.

Correction

In the July issue of the NEWS an error was made in a note about Fitz James Bartlett. Bartlett is not in Centreville, Md., but at present is working on his master's degree at the University of Florida. He has a fellowship in the entomology and plant pathology department.

In a letter calling attention to the error "Fitz" sent his best wishes to the football team for a good season but sorry they are not playing in Florida this fall.

Personal Pencilings

Science Teacher—Miss Elizabeth McFarland, '36, a graduate with first honors in the College of Education, has been appointed to the faculty of the Fort Hill School of Cumberland, Md., as a science teacher. Miss McFarland also gained her Master of Arts degree this year. She is a resident of Cumberland.

O

Married—Lieut. Arthur Browning House, '33, and Miss Miriam May Shaw, were married July 17 at the Baldwin Memorial Church at Severns Cross Roads, Md. Bridegroom's brother, Dr. Hugh House, '24, was best man. Lieutenant House is the son of Dr. Homer C. House, Professor of English at the University. A reception at historic Sun Inn was held after the church ceremony.

O

Wedding — Lieut. Julian Fairfax Walters, U. S. M. C., '35, and Miss Mary O. Gettings, both of Rockville, Md., were married July 3, at Pensacola, Fla. Lieutenant Walters was formerly Lieut. Colonel of the R. O. T. C. Cadets. He entered the Marine Corps following his graduation, and he is now stationed at the Naval Air Training Base at Pensacola.

O

Meat—Jack Downin, '37, is with the Corkran and Hill Meat Packing Co.

O

Birth—Mr. and Mrs. Norman E. Prince, '33, announce the arrival of Norman Evans, Jr., July 1. Six pounds, a future Maryland half-back. Mrs. Prince was formerly Miss Eleanor Bray, '34, of Chatham Hall, Va.

O

Insurance—Theodore Erbe, '37, a graduate with second honors in the College of Arts and Sciences, is representing the Travelers Insurance Company now. "Ted", it is understood plans to attend law school this fall.

O

Marriage—A *Diamondback* romance culminated in the wedding of Marion Parker and William C. Needham on September 1, 1937. Mrs. Needham was formerly Associate Editor of the *Diamondback* in her junior year, 1935, and Bill was Editor of the *Diamondback* the previous year. Since graduation, Marion has been with the Aluminum Company of America in Washington, D. C. Bill has been spreading the news with the Associated Press in Baltimore. The newlyweds will reside in Baltimore.

O

Marriage—On August 11, Dr. Edward King Morgan, '22, took the anticipated matrimonial step and married Miss Janet Fleming Potter of New York. Dr. Morgan is a noted physician in Brooklyn, New York. Following an extended honeymoon the newlyweds will reside at "The Towers", in Brooklyn, New York.

O

Football Official—By the grape route it has been learned that Gomer Lewis, '25, former center on the 1924 eleven, is now a football official in the Southwest. Gomer is with the Mountain States Telephone Company in Arizona.

O

Law—Charles Bittinger, '37, a graduate in Business Administration, will enter Harvard Law School this fall. He was formerly with the Berkshire Insurance Company, in Baltimore.

O

Elkton—Mary Boyd, '34, of Perryville, Md., resigned her position with the Home Owners' Loan Corporation in Baltimore to take a position with the Conowingo Electrical Company at Elkton, Md. Mary, a member of Kappa Delta, was a representative on the Pan Hellenic Council and a member of the student congress.

O

Military—Samuel Gordon Wood, '37, has entered the one-year training period for the United States Army. He is stationed at Fort Myer, Virginia.

O

Entomology—Price Piquett, '37, a former member of the University R. O. T. C. Band, is on duty as inspector for the Bureau of Entomology for the United States Department of Agriculture with headquarters at Towson, Md.

O

C. C. C.—Capt. Roswell R. Boyer, '29, of the Coast Guard Artillery, has been on active duty as Captain of the C. C. C. camps at Reedsville and at Blain, Pa.

O

Marriage—Laura Nevius, '30, married Mr. Donald McLaughlin, on April 18. The newlyweds are now residing in New York City at 56 7th Avenue, Apartment 10 H.

O

Military—Capt. Robert N. Young, K. A. of '22, has been transferred from Fort Benning, Ga., to Fort Leavenworth, Kan. While on leave during the summer, Bob spent a few days visiting among his friends in Washington. He visited the campus for a short time.

O

Insurance—William H. Garrott, '35, is with the Insurance Company of James S. Hemper, in Baltimore.

O

Engineering—Ray Chapman, '35, is now employed by the Moore Steam Turbine Corporation at Wellsville, N. Y.

O

Trainees—Maryland is well represented in the McCormick Company by four trainees who are expected to learn the business from the ground up. Al Ireland, '37, a Theta Chi, is now learning the art of blending tea. Addison W. (Pete) King, '36, is in the mailing department. Ed Daly, '37, a former grid performer, is in the selling department. John Bell, '37, can be located in the stock room.

O

Military—W. Robert Beall, '36. Bob is with the C. C. C. Camp at Mifflinburg, Pa., as Lieutenant Beall. While at Maryland he was a member of Omricon Delta Kappa, honorary leadership fraternity.

O

Engagement — Jean Barnsley and Donald C. Bradley are engaged, according to an announcement by Mr. and Mrs. T. A. Barnsley of Olney, Md. Jean is a member of the Kappa Kappa Gamma sorority, and was very active in student affairs.

O

Wedding—Miss Ruth Lord, '35, was married to Mr. Clyde J. Korth Carlstrand of Baltimore, Md., at the Central Presbyterian Church in Washington, D. C. On their return from their honeymoon they will live at 3736 Winterbowne Road, in Baltimore.

O

Military—Irving Mendelsohn, '37, and Harry Dosch, Jr., '37, are taking a year's training in the Army, working for active commissions, at Fort Meade. Irving, a graduate in the College of Agriculture, was the winning captain in the annual military company drill competition and is a member of Tau Epsilon Phi social fraternity. Harry Dosch, Jr., a graduate in the College of Arts and Science, was active on the Old Line staff, was a member of the Latch Key Society and Phi Delta Theta social fraternity.

Marty Director Milk Control

On June 15, Mr. Ivan M. Marty, '25, was promoted to the position of Director of the Bureau of Milk Control of Baltimore City to fill the vacancy caused by the resignation of Mr. John M. Lescure, '23.

Subsequently Marty specialized for four years in the study of milk production and milk handling at the University. In 1930, after five years of experience in the dairy industry, he joined the City Health Department as an inspector assigned to the supervision of the pasteurization and ice cream plants in Baltimore. In 1933 he was promoted to the position of dairy plant supervisor and was placed in charge of the pasteurization plants in the city. For the past year Marty has also served as acting assistant to the Director of the Bureau of Milk Control.

Alumni Association Sponsors Magic Show

Under the auspices of the Alumni Association a nationally famous magic show will be presented at the University, November 11, for the benefit of the Scholarship Fund. Birch, the famous Magician, will present his show of spectacular magics. He is proclaimed as outstanding among America's greatest young magicians. He is accompanied by a young and charming artist, Miss Mabel Sperry, an accomplished Xylophonist.

Birch, is widely known for the famous acts of making a 150-pound pony disappear, shooting a live canary into a burning light bulb and many other astonishing magics. Reserve the date November 11 at College Park.

It's a Maryland Tradition!

After the game, in the evening, at lunch, at any and all times Marylanders get together you'll find them at the Varsity Grill—newly renovated. Your school spirit cannot be par until you are a regular patron.

The Varsity Grill

E. F. ZALESAK, '25, Proprietor

CAMPUS NEWS

Journalism—James Andrews, '31, of Cambridge, Md., the first editor of the *Old Line*, the student body humorous publication, has had an unfortunate experience.

With a desire to study journalism, Jimmy began making plans and saving pennies for a course at Columbia University this past year. Prior to his entering Columbia, he had to be operated on for appendicitis, and the after-effects kept him down for some time. After Christmas, he entered Columbia but the strain was too much, causing him to return home for a complete recovery; however, he plans to reenter Columbia this fall.

We are all for you, Jimmy, so stick to it.

Insurance—Charles Bittinger, '37, of Washington, is representing the Berkshire Life Insurance Company with headquarters in the Union Trust Building in Washington. Charles was a member of the Pershing rifles and for three years was connected with the *Diamondback*.

Medicine—Samuel C. White, '35, a member of Lambda Chi Alpha, now is a junior in the School of Medicine. His home is in Towson.

Steel—Dale Patterson, '37, graduate in the College of Arts and Science, is now working with the Bethlehem Steel Company, Bethlehem, Pa. Dale was active in extra-curricular activities, playing varsity baseball three years. He was a member of Scabbard and Blade, business manager of the *Diamondback*, a member of the Intra-fraternity Council, president of Phi Sigma Kappa social fraternity, a member of Pi Delta Epsilon, Beta Alpha Psi, and Omicron Delta Kappa honorary fraternities.

H. C. Byrd, Jr., '36, is now working in Boston, Mass., with a construction company.

Motors—Mr. Daniel Drake, '37, and Mr. John Zebelean, '37, are with General Motors Company in Baltimore. Dan graduated in the College of Arts and Sciences and was a member of Kappa Alpha social fraternity and Beta Alpha Psi honorary accountancy fraternity. John is a member of Phi Sigma Kappa fraternity and took part in several extra-curricular activities, playing varsity lacrosse for three years.

Arizona—Frances Maisch, '29, former secretary to Miss Stamp, Dean of Women, has completed a course at Syracuse University in personnel and student management. Frances now goes to the University of Arizona as head resident of the dormitory for girls and as student councilor for the Dean's office.

Washington County: Hon. Henry Holzapfel, Jr., '93, President, Hagerstown, Md.; L. G. Mathias, '23, Secretary, Hagerstown, Md.

HISTORY NOTES

» » » »

It was during the month of October in 1813 when the University of Maryland conferred upon the Marcus de Lafayette, Revolutionary hero, the honorary degree of LL.D. in the Anatomical Theatre of the University located in Baltimore at Lombard and Greene Streets.

Lafayette was on his second and last tour of the United States since the close of the Revolutionary War. He was on his way to Washington by stage coach and his overnight stop was the Rossbourg Inn, the oldest building on the campus at College Park.

Cover Picture

The picture appearing on the cover of this issue is of the old stately English elms standing in front of the old Rossbourg Inn opposite the Ritchie Coliseum. As far as is known, these elms were brought from England and planted at the time of the erection of the Rossbourg Inn. This was nearly 150 years ago. They stand today as one of the oldest landmarks on the College Park campus.

Education

By DR. H. C. BYRD, '08,
President of the University

One can have no more valuable attribute than an education. It is the only wealth which is lasting and of which one can never be dispossessed. It is the kind of wealth which should enable one to get the most out of life, because it is that which enables one best to advance his own interests and at the same time render the greatest service to the greatest number of people. Stocks and bonds may fall in value, money may be lost in business ventures, property may go by mortgage foreclosure, but no one can take away from the educated man his perspective of life, nor his ability to grasp the fundamentals of progress, nor destroy that mental equipment which is the solid foundation on which he can ever build anew.

To fulfill its real function in American life, education must be something more than a stereotyped process of imparting and receiving information. Besides the knowledge of material things necessary to earn a living, education must develop in one the highest spiritual ideals. It must provide the student with the essential tools to attain a high degree of material achievement, and at the same time help him to find the place in life that he can fill with satisfaction to himself and to his fellows.

The American form of government is successful only in proportion to the intelligence of the citizens responsible for it. It follows, then, that education is essential to the welfare of the Nation.

Alumni Meeting In Philadelphia » » »

NOT SINCE 1923 when the University gridiron Terrapins defeated the University of Pennsylvania 3 to 0 at Franklin Field have the alumni of Philadelphia had an opportunity to welcome the Terps to the Quaker City and to have a jubilant rally over their coming.

Under the leadership of A. Moulton McNutt, '06, the alumni of Philadelphia will hold a regular football rally on Friday evening, October 1, at the Penn Athletic Club. They have also invited alumni from the northeast section of Maryland, Delaware, New Jersey and New York City to join in this assembly of old grads. Dr. H. C. Byrd and Professor Charles S. Richardson, long remembered for their active part in the athletics of the University, are expected to be the orators for the occasion. Plans are being made to have tickets on sale at the rally in the Maryland section for the game.

A. MOULTON MCNUTT
1906

Committee

Mr. McNutt is being ably assisted in making arrangements by the well-known John P. Mudd, class of '07, former president of the Alumni Association and a very active alumnus. Others to assist are W. P. Fusselbaugh, '22; Lawrence J. Stabler, '22; R. N. Todd, '15; D. P. Perry, '21; James H. Harlow, '23; H. H. Heward, '97, and C. Mervyn Young, '06.

More than 100 alumni, faculty members and friends of the University are expected to meet in a glorious get-together in honor of the boys. This meeting of the alumni inaugurates the year of alumni gatherings which is expected to be the largest in the history of the Association. Anyone who plans to attend the Penn game should include the meeting in their program. For reservations and tickets to the game write to J. P. Mudd, 173 Manheim Street, Philadelphia, Pa. The season is on and we want to see the Terps go! !

Homecoming Saturday, October 30

The big day on the Alumni Calendar for the fall, is Homecoming, Saturday, October 30, at College Park, Md. All "Terrapins" turn their steps toward the campus "On the Hill" where they will meet other "Terps" of by-gone days.

Plans are being arranged for a gala day. Headquarters for the registration of old grads will be the Ritchie Coliseum where tickets for the game, mixer and dance will be on sale. Come early and attend all functions.

The big attraction is naturally the football classic between the "Gators" of Florida and the "Terps" of Maryland. Another colorful float parade will be again presented by the fraternities and sororities. Prizes will be awarded for historical, comic and attractive floats.

Immediately after the game the annual "M" Club meeting will be called to order by Lewis W. Thomas, '28, president. The place will be announced later.

Following the game a buffet supper and mixer will be held for the old grads where they can meet and mix with many old friends of by-gone days.

The final frolic of the day is the Homecoming Dance in the Ritchie Coliseum, the proceeds of which go to the "M" Club scholarship fund. This affair deserves the support of every loyal alumnus.

Another Banner Year

The University appears headed for another banner year in attendance, according to W. M. Hillegeist, '12, Director of Admissions. Indications such as advance reservation of rooms, acceptances for admission, and general inquiries about enrollment point to an increased attendance this year.

With the pride that arises from this increased use of the University's facilities there comes a thought of regret by the old boys that the student body is getting too large for everybody to know everybody else. Alumni who were students a few generations ago recall the pleasure of an almost campus-wide acquaintanceship. Frequently these alumni express the wish that a small student body might still be the rule.

But with the expanded student body the individual contact for the average freshman with the faculty has actually increased. Now a corps of faculty advisers, each corresponding in his relationships with students to the former dean, counsels students individually in a way that the former system of a single dean could not provide. There wasn't enough time for one dean to look after personnel relationships of all students in his college.

There is an increase in the faculty both in number as well as outstanding men in various professional fields. This is all possible with a large student body in state institutions. It all means that the University of Maryland continues to increase its efficient services to the people of the State.

●

Home Economics

Many of the graduates of 1937 in Home Economics have met with success in securing assignments for employment. It has been learned that Jeanette Chatham, a Kappa Delta, will be located at Hughesville, Md.; Martha Giles of Theta Gamma will be at Farmville, Va.; Marjorie Higgins, an Alpha Omicron Pi, will be at Mt. Rainier; Elsie Stratmann of Kappa Delta will be at Denton, Md.; Carolyn Young of Alpha Xi Delta goes to Glastonbury, Conn., and Lorna Sween will be at Cumberland. All will teach Home Economics in the high schools at their respective places. Elizabeth Norris, a member of Kappa Kappa Gamma, returns to the University on a fellowship in Home Economics.

Pharmacy Convention

When the 85th annual meeting of the American Pharmaceutical Association was held in New York City this summer, many representatives of the University were a part of the program. Three University of Maryland men were members of the council, Dr. Robert L. Swain, Dr. H. A. B. Dunning and Dr. Andrew G. DuMez.

Papers on many subjects of interest to the pharmacist of the country were presented. Some twenty-five alumni and faculty of the Universtiy of Maryland were among those to present technical papers.

Among the distinguished visitors at the Convention was Dr. George Urdang of Berlin, Germany. While in America he also paid the Pharmacy School a visit.

Dr. A. G. DuMez, Dean of the College of Pharmacy, has several important assignments on the educational development of pharmacy as a part of the Association's program.

Maryland Law Review

In December, 1936, there was inaugurated the "Maryland Law Review," a legal journal devoted to Maryland law and matters of interest to Maryland lawyers. During the 1935-36 term the Junior Bar Association of Baltimore City gave the impetus calling for such a legal journal. They were supported heartily by Maryland State Bar Association, the Bar Association of Baltimore City and the Law School of the University.

The "Review" will be published at the University Law School by the Maryland Law Review, Inc. The Board of Trustees of the corporation is composed of the Hon. Carroll T. Bond, Chief Judge of the Court of Appeals; Messrs. George W. Williams, Robert R. Carman, and Herbert M. Brune, Jr., who were the respective presidents of the State, City and Junior Bar Associations when those organizations authorized funds for the establishment of the "Review"; Dean Roger Howell of the Law School; and Messrs. John Ritchie, III, and John S. Strahorn, Jr., Business Manager and Faculty Editor of the "Review," respectively.

Four Sections

The "Review" shall consist of four sections, leading articles, editorial matter, case notes and comments, and book reviews.

The section for leading articles will contain signed essays or monograms discussing definite areas of the law or specific legal problems.

The editorial section will be devoted to announcements, news of the Bar Associations, news of the Law School, editorials, and miscellaneous contributions.

The section for case notes and comments will contain notes on recent or leading Maryland or Federal cases and other contributions not long enough to merit inclusion among the leading articles.

The book review section will be devoted to reviews of books concerning the Maryland law as well as other books which may be of interest to Maryland lawyers.

While the "Review" is being published at the Law School yet both the "Review" and the Law School wish to emphasize that it is being published for the members of the Maryland bar. To that end the scope of the "Review" will be confined to matters thought of interest to them.

Alumni Homecoming Loyalty

The development of our institution, since it was chartered 75 years ago, has gone far beyond the vision of its founders or the anticipation of its most optimistic promoters. Today finds the educational facilities and opportunities broader; the physical plant bigger and the student body larger than was predicted by the enthusiasts of 20 years ago.

The secret of this development centers in the spirit of loyalty of the student body and alumni. The future depends upon the policies and program built by the alumni and the loyalty with which they dedicate themselves to its purposes and prosecution.

Every alumnus has a duty and obligation to himself, to future students and to his State to visit the college frequently, keep in intimate touch with its development and help formulate its policies and programs. This is one way the alumnus can help repay the State for its contribution to his education. Every former student should make an extra effort to be at College Park on October 30. See the new buildings, campus improvements and renew friendships. Make it a day full of profit and pleasure for yourself, your friends and the University.

●

Scholarship Fund Aid Solicited

To aid some worthy student desiring to attain a college education, the Alumni Office will handle the solicitation of magazine subscriptions to any and all magazines. All revenue derived will be placed in the Scholarship Fund.

Alumni, faculty members and friends of the University are requested to send their subscriptions to the Alumni Office, University of Maryland, College Park. Any rates offered you by other solicitors can be met through this office. Subscriptions to all magazines will be received.

This is an opportunity to be of aid to a worthy cause with no additional expense to the subscriber. Send in the names of your present list of magazines and the date they expire as well as the names of any other in which you are interested. Prices will be quoted immediately.

President's Message

FELLOW ALUMNI:

As this is my first general letter to you I want to take this occasion to express my gratitude for the honor conferred upon me at the annual meeting in June. Already a meeting of the Alumni Board has been held at which time several things of importance to the association were started.

New members elected to the board have entered into the spirit and work of the association with lots of enthusiasm and we look forward to good results.

Homecoming

We are now approaching another football season for the galloping "Terps." An outstanding game on the schedule has been designated for the Fourteenth Annual Homecoming of old grads. The 'Gators from the University of Florida will be the visiting team.

Many other colorful features have been planned for the entertainment of returning old grads.

I personally urge every alumnus to drop the daily toil and give your old friends a treat by greeting them on the campus Saturday, October 30. The University looks forward to your return.

The sound of the band, the "plunk" of the pigskin, a slap on the back and a "hello" from "Bob," "Jim" and do not forget "Mary," will bring back many a fond memory.

It's the day of days for old grads and it is up to each alumnus to make the day a memorable one.

Sincerely yours,

E. F. ZALESAK, '25,
President, Alumni Association.

Did You Know

1608—The Chesapeake Bay was explored by Captain John Smith?

1634—March 25 was the first landing of the Colonists in Maryland?

1635—April 23—The first naval battle by white men in America was fought on the Little Pocomoke river, Eastern Shore of Maryland, between Claiborne's pinnace *Long Tail* and Governor Calvert's two pinnaces, the *St. Margaret* and the *St. Helen*?

Lord Baltimore's First Colony » » »

By George Fogg, '26

FOLLOWING back the footsteps of Lord Baltimore takes one to unusual places. During the summer just past I undertook to locate the site of his first colonial enterprise. Although he spent nearly half a million dollars in establishing a colony in southeastern Newfoundland nothing now remains. Every local authority has a different notion of the place where the colony originally sat, and all that can be identified is a small collection of old cannons and the arms of Lord Baltimore in a small church.

Even today the reason for this failure is not hard to find. Newfoundland is about as little adapted to human habitation as any place in the American continent. A thin layer of sod and soil covers the rocky base of the island, and trees never quite succeed in rising above a few feet in height. Wheat cannot be grown locally; the rocky base provides such quick drainage that most parts of the island do not have regular enough water supply to permit any agricultural crops at all. Fish, sheep, cattle, potatoes and cabbage keep the inhabitants alive.

Crossing the island on the railroad (there is no highway) reminds one of the descriptions of American railroads written by travelers in the 1870's. The train takes 27 hours to cover 547 miles. It stops frequently and long, and during the stops the passengers often get off to pick the blueberries on the right of way. The narrow gauge Pullmans are ancient wooden cars with numerous brass knobs indicating a type which has not been seen on American railroads for 50 years.

Natives tell stories of the train having been stuck in the snow for three or four days in the winter, and this is not hard to believe. Numerous villages on the island are entirely cut off from communication with the world for five or six months at a time and if father forgot to order the groceries the family is in for a hard time.

From most places on the island communication with England is more frequent and cheaper than communication with the United States. Numerous freight ships ply regularly between Newfoundland and Liverpool and carry eight or ten passengers each.

Life on this frost-bitten rock must have been hard indeed for Lord Baltimore with his gentle-bred colonists from the south of England. It speaks well for His Lordship's determination that he was willing to expend his money and his time in another colony after the disaster of Avalon in Newfoundland.

Brief Sketches of Leading Gridders » »

ENGINEERING STUDENTS lead among the outstanding players on the Maryland football team, there being eight among the 18 who appear likely to do most of the battling this fall.

Ten of the 18 are letter men and four of the others are last year's reserves, leaving only a quartet of sophs. However, others up from the yearlings, notably Beamer, an end, may come through before the season is over.

A brief bit about each of the leaders follows:

Letter Men

Blair Smith, senior in College of Education. End. 6 feet 1. Good all-round end and excellent pass receiver. Played only one year in high school. 1936 regular. Good boxer.

O

Nick Budkoff, junior in College of Engineering. End. 5 feet 11. Weighs 186. Strong and hard charger. 1936 reserve. Weight man in track.

O

John McCarthy, senior in College of Arts and Sciences. End. 6 feet 1½. Weighs 197. 1936 reserve. Basket-ball player.

O

Mike Surgent, senior in College of Education. Guard. 6 feet. Weighs 186. All-State last year. Probably Maryland's best lineman. Regular second baseman in baseball.

Bill Wolfe, senior in College of Education. Guard. 5 feet 10. Weighs 186. Strong and aggressive. Regular last year. Defense man in lacrosse.

O

Bob Walton, senior in College of Engineering. 5 feet 8. Weighs 164. Capable in every department and smart. Regular on boxing team. Never played football before entering Maryland.

O

Jim Meade, junior in College of Education. 6 feet 1. Weighs 190. Triple-threater and earned the name of "Jarring Jim," from the way he tackles opposing backs. Unusually good kicker.

O

Charlie Weidinger, junior in College of Education. 5 feet 10. Weighs 170. 1936 reserve. Exceptionally clever passer. Good kicker and runner. Will call most of signals. Baseball pitcher.

O

Waverly Wheeler, senior in College of Education. 5 feet 9. Weighs 163. 1936 reserve. Good runner, pass catcher and good on defense. Third sacker in baseball and basket-ball regular. Never played football in high school.

O

Frank DeArmey, senior in College of Engineering. 5 feet 11. Weighs 193. Played center for two years but has been shifted to blocking back. Retarded this season by hernia operation in mid-July.

Other than Letter Men

Bill Bryant, end, senior in College of Engineering. Reserve for two seasons. Will play a lot this year. Outfielder in baseball and guard in basket ball.

O

Bob Brown, tackle, soph in the College of Agriculture. 6 feet 1. Weighs 212. Appears sure to be a regular. Fast and aggressive.

O

Ralph Albarano, tackle, soph in the College of Engineering. 6 feet. Weighs 185. Making strong bid for regular berth and is certain to play a lot.

O

John DeArmey, tackle, junior in College of Engineering. 5 feet 8. Weighs 187. Played as reserve guard last year and is battling it out with Albarano for starting job.

O

Fred Hewitt, back, junior in College of Engineering. 5 feet 11. Weighs 161. Unusually capable ball toter, developing into fine passer and is fair kicker. Star center in lacrosse.

O

Pershing Mondorff, back, soph in College of Agriculture. 5 feet 11. Weighs 185. Fairly fast and rugged he is a great kicker, learning it from soccer as he never played football before entering Maryland. Unusually effective on kick-offs and placements. Born in war year (1918) he was named for General Pershing. Basket-ball and baseball player.

Grid List For 1938

WITH TEN GAMES on the schedule again, the Maryland football card for 1938 will be practically the same as this fall. There is only one actual change.

Pennsylvania, which will be battled this year on October 2 in Philadelphia, is not back for 1938, with University of Richmond being on the card instead.

There has been some change in the alignment of the contests. Richmond provides the opener on September 24 and St. John's, usually the foe for the first tilt, the fourth clash, offering a respite after two big northern games.

Maryland will have seven home battles next fall, with five at College Park and two in the Baltimore Stadium. Georgetown, of course, remains on the list.

Jaunts to Penn State, Syracuse and Florida are the three games away.

The dates:

September 24, University of Richmond.

October 1, Penn State at State College; 8, Syracuse at Syracuse; 16, St. John's; 22, Virginia; 29, V. M. I.

November 5, Western Maryland, Baltimore Stadium; 12, Florida, Gainesville; 19, Georgetown; 24, Washington and Lee, Baltimore Stadium.

Outlook Is for 50-50 Grid Season » »

MARYLAND, playing its opening football game against St. John's, as usual, was to hop off on a rough journey on September 25 with the Annapolitans invading College Park.

While the Johnnies never are setups, the Terps went into the game looking ahead to Pennsylvania on October 2 at Philadelphia, Western Maryland at College Park on October 9 and the seven battles that come afterward.

With a tough schedule and numerous holes to plug in the regular line-up and reserves to be developed, a 50-50 outcome of the season would be a worthy accomplishment.

Not Singing Blues

FRANK DOBSON, head coach, while he realizes his problems, is not singing the blues, but is spending his time doing a lot of hard work with a squad that packs plenty of spirit. He is being aided by Jack Faber and Al Heagy, former Terp stars. Al Woods, another ex-Maryland ace, is handling the freshmen.

Maryland's team is built around 10 letter men: Blair Smith, Nick Budkoff and John McCarthy, ends; Bill Wolfe and Mike Surgent, guards; Bob Walton, center; Jim Meade, Charlie Weidinger, Waverly Wheeler and Frank DeArmey, backs.

Bill Bryant, end; John DeArmey, tackle, and Rip Hewitt and Jack Egan, backs, are the other leading leftovers from 1936.

Francis Beamer, end; Bob Brown and Ralph Albarano, tackles; Ed Floyd and George Lawrence, guards; Charles Parvis, center, and Frank Skotnicki, John Boyda and Pershing Mondorff, backs, are the leading prospects from last season's freshman squad.

Remainder of Card

HERE are the tilts that follow the St. John's inaugural:

October 2—Pennsylvania at Philadelphia.

October 9—Western Maryland at College Park.

October 16—Virginia at Charlottesville.

October 23—Syracuse at Baltimore Stadium.

October 30—Florida at College Park (Homecoming).

November 6—V. M. I. at Lexington.

November 13—Penn State at State College.

November 20—Georgetown at Washington.

November 25 (Thanksgiving)—Washington and Lee at Baltimore Stadium.

Prices Are Attractive

POPULAR prices have been decreed by the Athletic Board for all the games. Grandstand seats for the St. John's tilt were 75 cents, with bleachers for school students at 25 cents.

For other games at College Park, the box seats will be $1.65, with grandstand seats at $1.10 and bleachers at 55 cents.

For the Baltimore contests the prices will be $1.65 for box and center grandstand seats and $1.10 for other grandstand tickets.

Tennis Champion

The winner in 12 out of 14 sets, Spencer (Spider) Chase, '34, won the Prince George's Tennis Championship. Spider won the singles and then with Reynor Howard, of Hyattsville, former Naval Academy tennis star, annexed the doubles.

"Spider" is well remembered by all "Old Line" sport fans as the lanky basket-ball and baseball star. In basket-ball he moved unexpectedly and his height bewildered his opponents.

He is a graduate in horticulture and is a member of Sigma Nu Fraternity.

●

The lessons of the past have to be learned anew each year.

Diamondback

This notice is to call the attention of alumni to the annual solicitation of the "Diamondback," the student paper, for subscription. It affords an excellent opportunity to follow the current events of student activities as well as up-to-date news on the athletic activities.

The subscription rate is $2.00 per year, which will be taken care of by sending your remittance either to the "Diamondback" or Alumni Office, College Park, Md.

Notes About Former Terps

Charlie Keller, Terp diamond pro uct, was the sensation of the Inter tional League, during the season ju ended, batting .351 to lead the circ and topping the list in two other lin He also led in number of hits and runs scored.

Keller, who is the property of t New York Yankees, Newark being farm team, was declared to be the be looking rookie since Babe Ruth bro into baseball.

Whether the Yankees will take h up next year or let him spend anoth season at Newark has not been dete mined.

Charlie is coming back to school du ing October to complete his work f his degree, as he left in his senior ye last spring to go to the Newark trai ing camp.

o

Boots Groves, who kicked the thr points that beat Penn, 3 to 0, in 192 was out looking over the 1937 varsi squad recently. It is hoped that th year's team can spring an upset lik the Terps did in that last encounter Franklin Field.

o

Four of Maryland's football form greats are in Shanghai, China, all them captains in the Marines. The are Joe Burger, Tony Hough, Jac McQuade and Pat Lanigan. All a all-time all-Maryland players, excep ing Lanigan, and all were members the team that beat Penn in 1923.

o

Al Woods, who used to play hal back for the Terps, finishing in 193 has a sizable squad of freshmen toi ing, but has not proceeded far enoug to get a line on his charges. Howeve there appears to be more than th usual amount of material in the yea ling ranks, and most of the boys a from within the State.

Al turned out an aggregation la fall that won four games and tied a other and is sure to get the best out the players at hand.

His main job at the University instructor in agronomy.

It should be interesting to the ol grads and others who follow Mary land's athletic teams to know that th game with Penn in Philly on Octobe 2 will be given a wide broadcast.

It will be sent out over WBAL WJEJ, WBRE, WCAU, WCBA WGBI, WHP, WKOK and WPG.

WBAL and eight other stations als will broadcast the Virginia game a Charlottesville, October 16.

harmacy » » »

HE BEGINNING of the practice of pharmacy may be located in the forts of primitive people of all ages counteract diseases or relieve pain. he very earliest literature of l nations gives proof of the udy. Many references in e Scriptures to the medical rtues of leaves and plants e familiar to the readers of e Bible. From the early istories of China, Japan and dia can be found references the practice of aiding the ck with nature's remedies. Not until the 18th century d well passed into history d the pharmacist appear as distinct factor in his unppy struggle for individuity.

In the United States

As far as known no pharacist as such existed in the nited States before the Revution. It was not until 1808 hen the Massachusetts Medal Society published a pharacopoeia, listing drugs for edical use with formulas. he first edition of the United States harmacopoeia was published in 1820, d has been continued ever since, at rtain intervals. It was in 1840 that group of forward-looking young othecaries and physicians then pracing in Maryland, recognized the nessity for more thoroughly educated d better-trained pharmacists if this pidly growing phase of medical servwas to be properly developed. As outgrowth of their endeavors The aryland College of Pharmacy was corporated on January 27, 1841, and e first course of lectures began in ovember. The College continued to erate as an independent institution til 1904, when it amalgamated with e group of professional schools of e University in Baltimore. It became department of the State University en the old University of Maryland as merged with the Maryland State llege in 1920. With but one short termission just prior to 1856, it has ntinuously exercised its functions as teaching institution.

It is a member of the American harmaceutical Association which was ganized in 1852. Today there are proximately 1,500 living graduates, th more than 900 practicing in aryland.

Outstanding Grad

One of the outstanding and early organizers was Dr. J. Faris Moore, a graduate of the Maryland College of Pharmacy in 1847. He was the Secretary of the Maryland College of Pharmacy upon its reorganization in 1858. He was elected Professor of Pharmacy in 1861 and in 1872, president of the Maryland College of Pharmacy, holding that position for three years. He was elected President of the American Pharmaceutical Association in 1863. He served twice on the Committee of Revision of the United States Pharmacopoeia. Much can be attributed to Dr. Moore for the development of Pharmacy in Maryland.

GRINDING DRUG MIXTURES

New Buildings

With the beginning of the new school year there will also begin the construction on several new buildings for which a bond issue of $1,700,000 was authorized at the last session of the Legislature.

The entire plan calls for the construction of nine buildings, one of which will be paid for from several funds, including private bequests.

At College Park plans call for a new infirmary, men's dormitory, an addition to the present group of engineering buildings, home economics building, poultry and general service. An additional sum of $30,000 will be spent on books for the library.

In addition to the major construction, several minor projects, including greenhouses, a model apiary for the entomology department, and new equipment in the dairy and animal husbandry buildings will be added to the University's physical equipment.

Another interesting part of the improvement program is the razing of the old wooden dairy and animal husbandry building near the boulevard.

Each alumnus is vitally interested in the great progress being made. Come to College Park, Saturday, October 30th and spend the day looking things over.

●

Wheaties—As frequently spoken of as "The food of Champions", Wheaties has on its staff a former Maryland Champion, Norwood Sothoron, '34. He is a member of Kappa Alpha and says "Wheaties keep me busy." O. K., Norwood!

A Marylander's Impressions of Japan »

(We get from a Maryland Traveler impressions of Japan.)

UPON entering the harbor in Yokahoma one's impression of Japan is one of awe and facination. But upon docking and entering a taxi for the ride to Tokyo, that impression changes. The streets are crowded, the houses and shops are numerous and crowded and the air is offensive. Pedestrians pay no attention whatever to autos; they just take their own time and the driver has to go around them or just stop and wait.

Tokyo

Upon arriving in Tokyo the above impression changes. The streets are wide and the buildings are comparatively new. Their streets are mostly double with trees and flowers in the center. The women and children in their kimonas are picturesque. Their parks are lovely and in the evening you will find these parks crowded with people trying to get a breath of air and cool off (the time being July).

The Japanese all seem to be a happy people and always give you a smile for which they expect one in return. Their custom of bowing is quite odd, but upon one's stay in this country one will find oneself doing the same and thinking nothing about it.

Shopping

Upon our first shopping tour we were impressed because of their utter

neglect of the buyer. They did not care whether you wanted to buy or not. After a while they would wander down the counter and stand before you with a blank expression on their faces. You would ask "how much" and several clerks would go in consultation and finally say 4 yen 50, or the like. I found the elevator girls the most apt and the most willing to please of anyone in any of the stores. If they could not understand you they would rush off and come back with someone of the force who could speak a few words of English.

The Obi and Kimona market was the place where you were swamped by clerks immediately you entered. They were on all sides of you with either a kimona or an obi trying their best to sell it to you whether you wanted it or not.

Their department stores are lovely. They are not arranged as our stores, for instance the center of their store is all one floor, with each floor opening to this with a show window. Their stairways open to this and one just goes around and around yet each time you ascend one floor without hardly knowing you have done so.

Lights

At night their stores are beautifully lighted. They have lights running around the windows, up and down the building, across the top and everywhere. Each one tries to out-do the other with more lights and more colors. It is really a grand sight at night just to ride around the business section and see the different signs and colors.

Pullman

Upon boarding a Pullman for a night ride one is really frightened. In the first place there is no privacy and in the second, the train is always crowded. You might just as well expect to find yourself in a compartment with a Japanese as not. The compartments are hot, and in the morning you find yourself covered with coal dust. The food is not so good.

A day ride on the trains is terribly dirty and hot, but the views from the window are beautiful. The Japanese use every available portion of land. They do not waste even a walkway. Their rice fields and tea fields are beautiful, lovely little plots of ground well-kept and so very green and three times more women than men working these fields.

Personal Pencilings

Law—With the beginning of the fall term, Charles Vinton Koons, '29, will assume the duties of professor in law at Georgetown University. He will teach common law actions and damages. "Dinty", as he was better known, received his LL.B. degree from Georgetown University in 1934 and his juris doctor degree in 1935, graduating as an honor student. His new duties will be with the late afternoon and evening classes.

O

Military—Joseph W. Sisson, Jr., '36, former lieutenant of the R. O. T. C. was appointed second lieutenant in the Regular Army following the completion of a year's training under the Thomason Act. He is stationed at Fort Howard, Md.

O

Teacher—Miss Florence R. Rea, '36, is a teacher of Home Economics at School No. 43-A in Baltimore, Md. Miss Rea worked for two summers as dietitian at the Chesapeake Biological Laboratory at Solomon's Island before graduating. She was a member of Alpha Lambda Delta and Mortar Board, national honorary sororities, and Delta Delta Delta social sorority.

O

Highways—Levy R. Tindal, '35, formerly with the U. S. Bureau of Public Roads is now with the Virginia State Highways Commission located in Richmond, Va. Tindal was on a W. P. A. project in Virginia soon after graduation, transferring later to the Virginia State Highways Commission.

O

Dietitian—Miss Jeanette R. Merritt, '36, has been studying dietetics at the University of Colorado School of Medicine and Hospitals since graduating a year ago. She plans to return East when she has completed her dietetic internship there. Miss Merritt was a member of Alpha Xi Delta social sorority.

O

W. P. A.—Miss Catherine Moore, '35, is District Supervisor of a W. P. A. project with headquarters at Salisbury, Md. Miss Moore was very active in sports while attending the University and was a member of Alpha Omicron Pi social sorority and Alpha Lambda Delta honorary sorority.

Married—Miss Alice P. Philips, '3 married Dr. Sumner O. Burhoe, facu member of the University in the I partment of Zoology in June, 19 Mrs. Burhoe is a member of Alp Upsilon Chi sorority. They will l in Washington, D. C.

O

Teaching—Wilson Dawson, '35, member of Pi Alpha Epsilon fratern ty, will be a faculty member of t Federalsburg High School at Prest Md., this fall. Other alumni to found at the same place are Kenne Remsberg, '29, and William H. Hende son, '36.

O

Library—At the Carnegie Public L brary in Washington, D. C., will found Mildred Berry, '35, a member the Kappa Kappa Gamma sorority.

O

Photography—On the aerial photo raphy project of the Agricultural A justment Administration, is Charl Orcutt, '37. He is stationed at Ne Brunswick, N. J.

O

Swift—The assistant product man ger of the Washington plant of th Swift Company is Burton M. McFa den, '37, a member of Alpha Gamm Rho. McFadden is inside salesman sp cializing in the sales of dairy product He went with the company on Monda following his graduation and spe three months training in Baltimore.

O

Marriage—Another *Diamondbac* romance results in the marriage of Marshal Mathias, '35, and Ruth Wel ington, '36, September 18. Joe, th former editor of the *Diamondback*, now a reporter for the *Washingto Times*. Ruth was the Women's Ed tor of the *Diamondback* during Joe regime. Good for the *Diamondback*

O

Registrar—Circulation manager o the American Association of Colleg ate Registrars' Bulletin is Miss Alm Preinkert, '23, M. S., now the Regi trar of the University of Marylan During the past year Miss Preinke has increased the circulation ten p cent. In addition to this, she contrib utes articles to the Bulletin on th Registrar's Professional Library.

With the beginning of the scho term this fall, Miss Preinkert will b gin her seventeenth year at the Un versity of Maryland.

OCTOBER 1937

MARYLAND ALUMNI NEWS

Mr. George W. Fogg,
College Park,
Md.

Mary
Has TWO New Dresses

Two dresses for less than her mother used to pay for *one*. Mary's new ready-made dresses, compared with those her mother bought 20 years ago, are in better style, have fast colors, and are chosen from a far wider range of exciting new fabrics.

Why can Mary have *two* new dresses today?

It is because of the amazing progress the textile industry has made in the last two decades. It is because research scientists and engineers have worked to improve processes and to give the public more for its money. More goods for more people—at less cost.

It is because General Electric engineers and research scientists have contributed to this progress. More than forty years ago, they initiated the first use of electricity in the textile industry. Today, every modern loom has its individual electric drive, and electric control which governs the quality of the unrolling yards of fine, sleek fabric. General Electric scientists have perfected instruments to test and match the colors, and to keep the weft straight and true.

Electric equipment—much of it especially designed by G-E engineers for textile applications—increases production, protects expensive machines, prevents delay and spoilage, lowers costs. In short, General Electric engineers are in the "efficiency business," and the economies they help to effect enable millions of American Marys and Helens and Ruths to buy *two* new dresses where otherwise they could buy only one.

G-E research has saved the public from ten to one hundred dollars for every dollar it has earned for General Electric

Fraternities Plan Homecoming Events »

MANY FRATERNITIES and sororities have planned Homecoming reunions for alumni at their respective houses. Each has arranged its functions to help the University Alumni Association welcome Homecoming old grads and to support the Homecoming Dance held for the benefit of an "M" Club scholarship fund.

Sigma Phi Sigma wants to show off the improvement in the house and all the new pledges. They will have a buffet supper for their alumni immediately following the game.

The annual Homecoming for Kappa Alpha is on again and the 24 members in the house will welcome the old boys any time during the day and especially at the buffet supper after the game.

Muriel James, president of Alpha Omicron Pi, announces that big plans

(Continued on Page 5)

Cover Picture

Morril Hall, built in 1892, is known to every former student and should bring to mind many fond memories of college days "On the Hill." Like familiar faces, Morril Hall beckons to alumni to return often and renew old friendships. Homecoming is Saturday, October 30, 1937. A time when all good fellows get together.

Homecoming Program

Registration begins at 9 A. M.—
Ritchie Coliseum,
Alumni Headquarters.

Freshman — Sophomore Tug-o-War,
10.30 A. M., Paint Branch.

Co-ed Play Day,
11 A. M., Girls Field.
Visiting teams, Western Maryland, American University and Wilson Teachers' College.

Lunch 12 Noon
University Cafeteria or Ritchie Coliseum.

Freshman Parade, 1.30 P. M.
Campus to Byrd Stadium.

Football—Florida vs. Maryland,
2.30 P. M.—Byrd Stadium.
Between halves.
Ceremony to honor Dr. Byrd's silver anniversary at the University.
Competitive float parade by student organizations.

Annual "M" Club Meeting,
Ritchie Coliseum—5 P. M.

Alumni Buffet Supper and Mixer—
5.30 to 7 P. M.
Girls Field House.
Entertainment by University Glee Club.

Annual Homecoming Dance—
8 P. M. to Midnight—Prizes.
Ritchie Coliseum.

All University buildings open during the day for Alumni and visitors.

Fraternities and sororities will have open house for Alumni.

Girls' dormitory — conveniences available for the ladies.

Muhlenberg College

Dr. Louis C. LaBarre, M.D., '08, was the University of Maryland's representative at the inauguration of Dr. Levering Tyson as the fifth president of Muhlenberg College, Allentown, Pa. Dr. LaBarre is chief surgeon at the Coaldale, Pa., State Hospital.

PORTRAIT OF CAPT. R. W. SILVESTER

Painted by ALBERT A. ROSE

DOCTOR BYRD DR. R. L. SILVESTER PORTRAIT MR. EDMUND MAYO

Mayo Presents Portrait » » »

THE MEMORY of a man of sterling character was vividly revived before the Faculty and Alumni of the College Park Schools of the University when Edmund C. Mayo, '04, presented to the University a portrait in oil of Captain R. W. Silvester, former president from 1892 to 1912.

It is needless to remind those Alumni who were students under this great man of his many virtues, but for those who were not so fortunate to know him I will give to you the recorded impressions of his dynamic personality.

President 20 Years

Captain Silvester, the son of a Virginia planter, a graduate of Virginia Military Academy and was a teacher in the Charlotte Hall Military Academy before becoming president of the College Park School, then known as the Maryland Agriculture College. He held this position for 20 years before ill health caused him to retire. During that time he brought a dejected and near-depleted institution back to its place of prominence as an institution of service to the people of Maryland.

His influence upon the young men has again and again been brought to light by their acclaim that Captain Silvester was largely responsible for shaping their early training which played an important part in whatever success they have enjoyed.

Mayo's Remarks

The high esteem in which Captain Silvester was held was brought forth by Mr. Mayo, one of his admiring students, who brought a portrait in oil to the campus and presented it to the University in the midst of old friends, faculty members and students connected with the Institution during Captain Silvester's tenure of office.

In presenting the portrait, Mr. Mayo said: "I did not know there was not a picture of Captain Silvester in the Institution until I read the article in the ALUMNI NEWS. I was so deeply touched and immediately interested in the endeavor that I took steps at once to have his portrait painted.

"Captain Silvester was a great influence to me, a friend of mine and a friend of my family. It was he who made it possible for me to come to this Institution in which he laid the foundation for a large part of its growth.

"He was a man of great encouragement and gave me good, friendly advice in his timely talks. Captain R. W. Silvester's influence in developing fairness, friendliness and initiative was largely responsible for much of my success today.

"It is a pleasure and a privilege to present to this great Institution, a portrait of a sterling character, Captain R. W. Silvester."

Mr. Mayo, a native of Virginia, graduated in engineering and immediately began a triumphant rise up the ladder of success. He began his business career in Norfolk, Virginia, and today is president of the nationally known Gorham Manufacturing Compan, specializers in the production of

fine silverware. He is perhaps one of the greatest contributions to the personnel of the business world that Maryland has ever produced. His rise is attributed to his humanitarian feeling for his fellow workers. His motto is "be fair."

Professor Richardson Speaks

Another to speak of Captain Silvester was Professor C. S. Richardson, Professor of Public Speaking. His remarks were as follows:

"This occasion causes for me mingled feelings of sorrow and happiness—sorrow, because it brings poignantly to my mind that in the death of Captain Richard Silvester I lost one of the best friends that I had in all the world; happiness, from the consciousness that there are those who so admired him while he was living, and so revere his memory since he passed away, as to have a master painter place his image on canvas, and present this splendid portrait to the University, that we may have his picture ever before us, as a reminder of this great teacher, counselor and friend.

"Captain Silvester was a prince of men. His home was his castle, and his fireside a sacred shrine, and those who, like myself, were frequently his guests, felt the hospitality and peace of his home settle upon them as a benediction.

"At times Captain Silvester seemed unnecessarily severe in manner, but this was because his fine ideals were so much a part of himself that any semblance of wrong brought the reaction of righteous indignation. This, however, was generally an innocent gesture, for beneath his breast was a heart of gold and no man was ever more ready to admit his own mistakes and to overlook the shortcomings of others.

"There was some subtle power in the character and influence of this man. The impressions he made upon his students were never lost and often have I heard men say, long after they had left college, that the advice and influence of Captain Silvester had helped to make and shape their lives."

Another eminent faculty member, Dr. H. D. Patterson, retiring dean of the College of Agriculture, who had served with Captain Silvester throughout his tenure of office, spoke about his gracious character.

His Son Responds

Captain Silvester's son, Dr. R. L. Silvester, '08, of Washington, D. C., gave an eloquent response to the many fine things said about his father. To Mr. Mayo, he expressed himself as follows:

"It is needless for me to tell you that my heart is too full to attempt to express my appreciation to Edwin Mayo for this gift to the University. It is indeed difficult to put into words my feelings on a subject so near and dear to me.

"To those of you who remember my father in his prime, knew well his sincerity, loyalty, and intensity of purpose, in attempting to stimulate an ideal in a school that has now become one of our foremost State Universities. Here with us I see some of his former students and faculty associates; and it is indeed laudable that one of these has made it possible for a nationally-known artist to enshrine him under the protection of the portals he loved so well.

"What greater goal of success in any vocation could one ask than to realize one's memory would live through the ages because of the love, admiration, and respect of his associates?"

Those who were present for the presentation are recorded in the picture accompanying this article.

The presentation at this time was informal, but a more formal one will be held next spring.

Campus Friends of Captain Silvester » » »

Front row, (left to right)—Prof. W. T. L. Taliaferro, Dr. H. B. McDonnell, '88; Dr. H. C. Byrd, '08; Mr. Edmund C. Mayo, '04; Dr. R. L. Silvester, '08; Dr. H. J. Patterson, and Prof. Harry Gwinner.

Second row—Mr. H. L. Crisp, Mr. Thomas H. White, Dr. T. H. Taliaferro, Prof. H. T. Harrison, Dr. T. B. Symons, '02; Prof. Myron Creese, and Mr. E. I. Oswald, '08.

Back row—Mr. W. M. Hillegeist, '12; Prof. Charles S. Richardson, Dr. E. N. Cory, '09; Dr. W. B. Kemp, '12; Dr. C. O. Appleman, Mr. Brinkley, Dr. J. B. S. Norton, Mr. Stewart B. Shaw, '04, and Dr. L. B. Broughton, '08.

FRATERNITIES PLAN HOMECOMING EVENTS

(Continued from Page 3)

are being made to welcome their alumnae and have them to supper.

All Sigma Nu's are called for the get-together after the game with supper being served at six. It is their nineteenth annual reunion.

"The Delta Sig's have the latch string out," says President MacDonald for all old grads. The old boys will be glad to see our many pledges. Supper will be served in the evening.

Gerneaux Hall will be the location of another K. D. reunion at Homecoming. Many old grads are expected to have dinner with the actives following the game.

Lambda Chi Alpha plans indicate a large return for Homecoming, October 30. Many of the old boys have been dropping in this fall. Supper following the game, so don't forget Saturday, October 30, 1937.

All other fraternities and sororities are having Homecoming functions and will welcome old grads all day long.

Forty-Seven New Faculty Members

FOR THE YEAR 1937-1938 the University appointed 47 new professors to its faculty staff. Five will be new heads of departments. Twenty-four hold the degree of Doctor of philosophy and three have other Doctorate degrees.

President Byrd made several important changes during the summer in his plan for a more coordinated teaching program as well as administrative. This change involved the College of Arts and Sciences, College of Agriculture, Economics, Animal Husbandry, Library, Chemical Engineering and several others.

The new faculty members appointed for the College Park and Baltimore branches are as follows:

New Faculty Members

The new faculty members are:

Dr. Wilbert J. Huff, professor and chairman of the department of chemical engineering.

Dr. W. Mackenzie Stevens, professor and chairman of the division of economics, marketing and business.

Dr. Lawrence H. James, professor and chairman of the department of bacteriology.

Dr. L. V. Howard, professor and head of political science.

Dr. John G. Jenkins, professor and head of the department of psychology.

Dr. Leonid I. Strakhovsky, professor of European history.

Dr. Gaylord Beale Estabrooke, instructor of physics.

Dr. L. I. Highby, associate professor of classical languages and literature.

Dr. Alpheus R. Marshall, associate professor of economics and business administration.

Dr. W. Gordon Zeeveld, assistant professor of English.

Dr. T. C. Byerly, of the National Research Center at Beltsville, Md., professor of poultry husbandry.

Dr. Allan S. Gruchy, associate professor of economics and business administration.

Dr. Gordon William Prange, instructor in history.

Dr. Edwin W. Titt, assistant professor of mathematics.

Dr. Jonathan W. Williams, instructor in chemistry.

Dr. Otis E. Lancaster, instructor in mathematics.

Dr. Oswald K. Sagen, assistant professor of mathematics.

Dr. W. L. Hard, instructor in zoology.

Dr. William J. Svirbely, instructor in chemistry.

Dr. Egbert C. Ingalls, instructor in civil engineering.

Dr. Lindsay S. Dodson of the Resettlement Administration of Washington, D. C., assistant professor of sociology.

Dr. Hugh A. Bone, Jr., instructor in political science.

Dr. Jesse William Huckert, associate professor of mechanical engineering.

Dr. Donald T. Bonney, research associate in chemical engineering.

Dr. Donald M. Dozer, instructor in history.

R. B. Criswell, professor of fire service extension.

Glen D. Brown, professor and head of department of industrial education.

Carl W. E. Hintz, librarian and associate professor of library science.

Kenneth A. Clark, professor of animal husbandry.

William H. G. Gravely, Jr., instructor in English.

Miss Vienna Curtis, assistant professor of art.

Warren L. Strausbaugh, instructor in speech.

Miss Polly Bell Kessinger, instructor in textiles and clothing.

Henry Hunter Smith, instructor in physics.

Miss Mary Emma Barnes, instructor in foods and nutrition.

John Lowe, III, instructor in civil engineering.

Miss Dorothy Middleton, assistant professor of physical education for women.

Eric J. Lindahl, instructor in mechanical engineering.

Miss Evelyn Iverson, instructor in speech.

Walter Volckhausen, assistant in mathematics.

Edmund H. Umberger, Jr., assistant in mathematics.

Additions to faculty in Baltimore Medical School: Dr. William R. Amberson, professor of physiology.

Dr. Dietrich C. Smith, associate professor of physiology.

Dr. Raymond G. Hussey, associate professor of clinical pathology.

Dental School: Marion W. McCrea, instructor in histology and embryology.

Law School: Herbert M. Bruns, Jr., associate professor of law.

Frederick Invernizzi, instructor in law.

Pharmacy School: Dr. Thomas C. Grubb, associate professor of bacteriology.

●

Homecoming

Saturday, October 30, 1937. "Count that day lost whose low descending sun sees; no old friends remembered, no new ones won."

●

He: "What did the old rose say to the young rose?"

She: "I can't guess."

He: "Hi, bud."

Author Munroe Leaf

In the New York Herald Tribune "Book Review," Munroe Leaf, '27, author, receives much complimentary commendation about his new book entitled "Noodles." Already Leaf has established himself as an unusual and entirely different type of author. He wrote "Grammar Can Be Fun," and "Manners Can Be Fun," both of which have been received with much acclaim. Working on the theory that half the battle is won with a child if you can start with a laugh and chuckle, he has exposed and delightfully routed the fundamental bugbears of grammatical lapses and improper behavior on the part of the young. Recently he wrote a book entitled "Noodles," a humorous book for children which is different from his humorous book entitled "Ferdinand's," which was for adults.

About his recent contribution "Noodles," the book review writer remarked, "It is a good, happy little book. It will get itself happily remembered by any child who gets it. I sincerely hope that a great many will."

Leaf was a member of K. A. and the lacrosse squad. He now is a member of the board of directors of the F. A. Stokes Co., publishers, and resides in New York.

●

Public Health Director

Directing the North Dakota Public Health System is Melvin E. Koons, '30, a graduate in bacteriology and a former lacrosse star. Following graduation, Melvin got his Master's Degree at Penn State and then went West, taking with him his bride, Mary Sisson. He was first with the Minnesota State Health Department, later transferring to the North Dakota State Health Department. In June, 1937, he was made director of the State Public Health and this fall was granted leave of absence to get his doctor's degree. He is taking this work at Johns Hopkins in Baltimore. Melvin is a member of Sigma Nu and took an active part in the R. O. T. C., receiving a second lieutenancy in the Reserve Corps upon graduation.

●

Engineering—At Wellsville, N. Y., Ray Chapman, '35, mechanical engineering, has received a promotion in the Moore Steam Turbine Corp. He has been assigned to the engineering department with possibilities of being sent to Washington in the spring.

Homecoming and President Byrd's Silver Jubilee

—By—
W. H. ("Bill") HOTTEL

MARYLAND'S FOOTBALL GAME with Florida at College Park on October 30 will be Homecoming, as most everyone of the old grads has learned by this time, but it will be a much more significant occasion—the twenty-fifth anniversary of the return of Curley Byrd to his alma mater.

Lots has happened in these 25 intervening years at College Park and in the Baltimore schools, too, and it is not necessary to reiterate the part the former athlete, coach, teacher and executive has played in the rise to great prominence of the State institution. That has been told often and is not news to those who keep in touch with their old school. What is in mind now is to pay tribute on the Homecoming occasion to Dr. H. C. Byrd, president of the University, probably the most remarkable personage in the field of education today, but still Curley.

DR. H. C. BYRD, '08

Looking Back 25 Years

THE WRITER, who then was connected with the sports department of the *Washington Post*, vividly remembers one Sunday evening in the late summer of 1912 when Curley walked into his office and announced, "Bill, I am going out to Maryland Agricultural College to coach this fall. Give us a paragraph now and then, will you?"

Curley had just come in from College Park from a pow-wow with the powers back of athletics and had made arrangements to go back to his old school to teach English and coach athletics. And the power behind the throne in those days and the man who had the foresight to engage Curley was none other than Prof. Charles S. Richardson, then head of the Athletic Council and who still is an integral part of that body and of the University.

Other members of the Athletic Council at that time who had to place the O. K. on Curley were Dr. F. B. Bomberger, another landmark of the institution and one of the leaders in its advance, and Prof. H. T. Harrison, still another notable figure in M. A. C. affairs until he left for other fields. Dr. Bomberger was assistant director of the Extension Service when he severed his connection with the University to become president of the Baltimore Bank for Cooperatives, but his home still is just off the campus. Professor Harrison, also, again is living in College Park after a long sojourn in the North.

Has "Sold" the Institution

LIKE MOST OTHERS, the writer had heard little and knew nothing about old M. A. C. at the time Curley asked for those seemingly insignificant paragraphs that night 25 years ago, but we could write the history of the University for the last quarter of a century almost from memory. And it was Curley who "sold" us the school, like he has to countless others, and it has been his personality, perseverance and love for his alma mater, bulwarked, of course, by his great ability, that has sent him and the school amazingly forward.

Unless all plans go astray, October 30 should be a notable day at College Park. Florida, which has played host to Maryland in such fine style during the past two seasons, is joining in wholeheartedly to do its bit. President John J. Tigert, president of that University, and Governor Cone, of the Alligator State, are expected to come as honor guests, and alumni in Washington and hereabout, are getting together to play their part.

Want 1912 Team Back

AS FOR MARYLAND, it has high hopes of accomplishing many things, one of which is to have back every living member of the 1912 team, the first that Curley coached, the first Old Line combination ever to score a victory over Johns Hopkins and which lost only one game.

This team, which was captained by Frank Hoffecker and managed by Ernest Davis, also included Pop Koehler, Country Morris, Burton Shipley, Noisy Willson, J. E. Bowland, Kenneth Knode, E. R. Hindman, C. F. Hunteman, Lynn Loomis, Harry Smith, Henry White, V. P. Pennington, E. P. Williams, Joe Coster, Arthur Eddy, S. W. Ruff, Davis Johnson, G. H. Firor, W. B. Posey and possibly one or two more.

A picture in the yearbook, *The Reveille*, of 1913, showing the team of the previous fall, included only 19 faces but "Ship," who was hurt most of that year was not among them and it might be that several others were missing.

●

'Gators Are Keen Foes

AS FOR THE GAME ITSELF, it should be well worth traveling a long way to see if there were nothing else to attract. Florida and Maryland are not old rivals but they have built up an exceptionally fine relationship and rivalry in a short time.

This year's game will be only the sixth between the schools but it will be the fourth straight, with Florida having won three of the five tilts played. Florida won the first two, the inaugural in 1927 in Jacksonville, 7 to 6, and the next in Tampa in 1931 by 19 to 0. Then Maryland took two, winning in Baltimore in 1934 by 21 to 0 and again the next year, in Gainesville, 20 to 6. The 'Gators gained a 7 to 6 edge on their home field last fall. Both of the contests played in Gainesville were Homecoming affairs and the 'Gators really were perfect hosts, unless you can hold it against them for winning last year's game.

October 30 at College Park should offer everything an old grad desires and those who fail to return for the occasion will be the losers.

There will be some pictures in the "Silver Jubilee" program of October 30 that the old-timers should relish gazing upon.

●

Public Representative

When the District of Columbia Commissioners combed the District for eligible men to appoint as a representative of the public on District Real Estate Commission they selected Aubrey St. Clair Wardwell, '24, an attorney-at-law. Aubrey got his law degree from Georgetown University after which he had several years of experience with the W. C. and A. N. Miller, realtors and builders. During his practice of law he frequently represented insurance companies in real estate investments.

The outstanding function of the board under a recently enacted law will be to issue licenses to all real estate brokers and salesmen. Unless those granted permits conform with ethical requirements laid down by the board their licenses will be revoked.

Aubrey is a member of the Sigma Nu fraternity and was active in athletics, being a member of the football squad.

Experiences in China » » »

(By ED TENNEY, '28)

SEVERAL YEARS AGO while stationed in Shanghai, I was, on an occasion, called upon by the American firm for whom I was then employed, to visit one of their Chinese agencies in a fairly remote sector of Chekiang Province. The least difficult route to the town in which the agency was located lay in a trip by steamer down the Chinese coast and thence by sedan chair from the point of debarkation. The first stage of my journey took me south to Ningpo, another large commercial city, on a fairly large coastal boat commanded by a British skipper. From Ningpo I continued further south on a smaller Chinese steamer, eventually landing at the inner end, or head, of the famous Nimrod Sound.

Leaving the second steamer I proceeded, along with my interpreter and ever-present "boy," to my ultimate destination by sedan chair. Several days later, on returning to the small port on Nimrod Sound, we awaited the arrival of the small steamer to begin our journey Shanghai-ward and it was not long in putting in appearance. Upon boarding the boat, anchored in the clear green waters of the Sound, approximately a half-mile from shore, we were informed that there would be a delay of an hour or so before its departure.

Not having had the facilities for taking a bath during the several hot and sultry preceding days, I requested permission from the Chinese captain, through my interpreter, to take a swim off the side of the vessel. The request was obligingly granted, though the captain shrugged in evident surprise, a fact which I attributed to the usual Chinese amazement at the strange antics of the "crazy foreigners."

After a short time in the water I noticed that the local sampan (small hand-propelled Chinese boat) men and fishermen were doing a rushing business in bringing successive boatloads of obviously excited villagers out to watch my swimming. Knowing that very few Chinese swim, and that a foreigner was rather much of a novelty in this small place, their curiosity was understandable. Even with the above facts in mind it occurred to me, in a vague way, that their excitement seemed greater than the occasion called for. And since both my interpreter and my boy were fairly unfamiliar with this particular section, and had, furthermore, disappeared into the ship's dining room, they could not enlighten me. Nevertheless, I hugely enjoyed myself and ended my swim only when the captain advised me that we were about to weigh anchor.

Over our after-dinner coffee several nights later, on the Ningpo-Shanghai boat, I recounted my experience, and my mild astonishment at the odd excitement of the onlookers, to the British skipper. Almost immediately after I had begun my story his face lighted up in a slow smile, but he heard me through before commenting. He then rather gravely said, "My boy, their excitement was justified; Nimrod Sound is generally filled with sharks."

Even though safely sailing through the then serene waters of the China Sea I had a brief attack of a mild ague before recovering my aplomb.

●

Glee Club At Rockville

The first concert of the season for the University of Maryland Glee Club will be presented Friday, November 12, in the Auditorium of the Montgomery County High School at Rockville, Maryland. So successful were the many presentations by the Club last year that an even greater program is anticipated this year.

With such a large representation of Maryland Alumni in Montgomery County, it is expected that one of the largest audiences of the year will be on hand.

The normal charges are: 30 cents for adults; 20 cents for children.

●

Coaching

A former Terrapin flash, Earl Widmyer, '35, will do the coaching of young athletic aspirants at Hagerstown High School. He was formerly athletic coach at Frederick High School. He will assist Eddie Semler, '23, another star Old Line athlete, with football. Earl is a home town boy who returns with many honors and laurels he has won.

Earl's former post at Frederick High School is being filled by another Old Liner, Warren Evans, '36, also a luminary on the cinder track.

« « OLD LINE ATHLETIC NEWS » »

By W. H. ("Bill") HOTTEL

Terrapin Sport Soup

Charlie Keller, ex-Maryland athlete, followed the feat of leading the International League in batting with an average of .351, by being the star of the playoffs in his circuit and later in Newark's triumph over Columbus of the American Association in the "Little World Series." He hit .500 in the eight playoff tilts and batted .487 as Newark won over Columbus after dropping the first three games in a 7-game series.

o

Pat Lannigan, who played end for Maryland on the great 1923 football team, is back at Quantico after a stay in China. He visited the University a couple days after his return and gave some interesting angles to the situation over there, and also displayed some pictures that were more vivid than words.

Joe Burger and Tony Hough still are over there, now being located in Peiping.

All are captains in the Marines.

o

Bob Slye, who was graduated last June, has been around College Park most of the month, being on vacation after having won his wings as a flyer in the Naval Air Corps. Bob, who was star on the track team as a hurdler and broad jumper for three years, still holds both the timber-topping records for the University. His first station is to be at Newport News.

o

James Busick, who played tennis and pole-vaulted for Maryland several years ago, recently won the tennis singles and doubles championship of the Eastern Shore. He is located in Cambridge.

o

Bob Walton, senior engineering student, who plays center on the Terp football team, also is the 165-pounder boxer, reserve defense man in lacrosse, president of the senior class and lieutenant-colonel of the R. O. T. C. Regiment. He did not take part in athletics before matriculating at Maryland.

o

Here's a "snap course" a couple of Maryland football players, Bob Brown and Frank Skotnicki, sophomores, are absorbing: Three hours each of Organic Chemistry, Qualitative Analysis, Calculus, Scientific German and Advanced English.

o

Bob Healey, one of Maryland's lacrosse stars of recent years, has hung up his M. D. shingle in Baltimore. Bob was graduated from the Medical School in Baltimore after finishing at College Park and then spent three years at St. Agnes Hospital in the Monumental City, the last as resident physician.

Al Woods admits he has some pretty good men on his freshman grid squad, particularly in the line. Most of the boys are from within the State and the majority have not had a great deal of experience, but the aggregation contains lots of potentialities.

o

Kirk Besley, who quarterbacked the 1923 team that beat Penn, 3 to 0, was among those to witness Maryland's great battle with the Quakers in Philadelphia, October 2. "Nappy," we should say Doctor Besley—he is one of those Ph.D.'s— is located at the U. S. Experimental Farm, at Beltsville, "just up the road" from College Park.

o

Maryland is having a cross-country team this season for the first time in recent years. By the time the next issue of the NEWS rolls around there will be something definite to report, as its schedule opens late this month. Swede Eppley, of course, is coaching the Terpsters.

●

"How did you happen to oversleep this A. M.?"

"There are eight of us in the house and the alarm was set only for seven."

●

Pep Rally In Baltimore

On Friday, October 22, at 8 P. M., the Baltimore group of the Alumni Association will hold a football pep rally at the Lord Baltimore Hotel in preparation for the Syracuse-Maryland game to be played the next day in the Baltimore Stadium. All alumni are urged to attend a regular get-together. No admission charge. Refreshments according to your own taste. No speaking program. Do not miss it. Bring the ladies.

●

"Do Not Fail Your Friends" is the Homecoming slogan for all Old Liners. Saturday, October 30, is the day that all roads lead to College Park for the Fourteenth Annual Fall Reunion of old grads. It's plunk of the pigskin and the hand clasp of an old friend which has established the traditions of Homecoming.

For the entertainment of old grads an elaborate program has been arranged.

Terps Get Good Start In Grid Campaign » » »

MARYLAND'S GRID TEAM did all right by itself in its first three games, though winning only two.

The Terps, of course, defeated St. John's in the opener, the score being 25 to 0, with the Johnnies below their usual standard.

However, the next two contests brought a lot of satisfaction, although Penn won in a game on Franklin Field, 28 to 21, and Western Maryland was conquered by only 6 to 0 at College Park.

Maryland played great football against Penn, leading 14 to 7 at the end of the first half and succumbing only when two long passes were tossed for touchdowns by the Quakers. It was a thriller and the Terps got a lot of credit out of their great showing.

The Terrors, always stubborn foes, were no different than usual, although Maryland appeared to be more than one touchdown superior. The Terps looked like big score winners when they marched 64 yards to a touchdown from the opening kickoff.

But after that it was a nip-and-tuck battle with mental errors jeopardizing Maryland on several occasions.

A long run by Pershing Mondorff, a couple of neat passes by Charlie Weidinger to Blair Smith and Jim Meade and the last named's final surge for five yards through center, netted the counter against the Terrors.

Maryland's line play generally was fine in all games but the backs had not reached a well-coordinated stage in the early tilts.

Personal Pencilings

Married—Miss Ruth Lord, '35, of Washington, D. C., married Mr. John Karth Carlstrand of Baltimore. The newlyweds are residing in Baltimore at 3736 Winterburn Street.

O

Married—Leonard Smith, '36, and Miss Pauline S. Zimmerli were married September 4, 1937, in the Church of the Reformation in Washington, D. C. Leonard, a graduate in chemistry with first honors, is a member of the American Chemical Society, the American Institute of Chemists, Phi Kappa Phi and several other fraternities.

The newlyweds will reside in Washington.

O

Chemist Married—Graduating in June, J. D. Paddleford waited but a month before marrying Miss Gertrude Hoskinson of Poolesville, Md. They were united on July 17, last, in the National City Christian Church in Washington.

Paddleford took his bride to Cumberland where he is employed as a chemist in the Cellanese Corporation. His principal duty is control work on the cellulose acetate.

O

Married—Following graduation, Wright G. Calder, '37, went with the General Electric Company and was sent to Lynn, Mass. But it was not long before he returned to Baltimore and married Miss Francis Jenkins on July 31. He then went back to Lynn with his bride.

Wright is a member of Phi Delta Theta and was a former major in the R.O.T.C. On page 79 of the *Terrapin*, Mrs. Calder's picture appears as a sponsor in the regimental staff of the R. O. T. C.

O

Promotional—When the Ethyl Gasoline Corporation needed a good man for South Carolina, they secured the services of Irvin O. Wolfe, '33, formerly director of service stations for Standard Oil in Washington County, Md. Irvin has moved to Charlotte, S. C,. where he will have charge of the company's business.

Irvin likes the work and is pleased with its promise.

He was formerly treasurer of the Washington County alumni group.

O

Engagement—Next month it is announced that Jean Barnsley, '37, a member of Kappa Kappa Gamma will marry Mr. Donald Charles Bradley of Chevy Chase, Md.

O

The Annual Red Cross Roll Call will be sounded from November 11 to the 25th. Great work has been accomplished by this organization and, for continued success, your membership is earnestly solicited.

O

Watkins, '23, Jury Foreman

When the 1937 fall term of court was convened at Marlboro, the foreman was Robert Malcolm Watkins, '23, president of his class. "Bunt" is now president of the realty firm, College Park Building Corp., which is doing a tremendous building program in the vicinity of College Park. He has been a resident of Prince George's County for many years.

O

Teaching—Over in Centreville, Md., the county athletic director of Queen Anne County is Nicholas G. Nides, '34. In addition, he is an instructor in Industrial Arts at the Centreville High School. During the past summer "Nic" jumped into the matrimonial world. He is a native of Queen Anne County and a graduate in engineering.

O

Delaware—When the University of Delaware dedicated their new Chemical Laboratory Building, Dr. Felix Lagassee, '25, represented the University of Maryland. His wife, formerly Miss Elsie Orme, '24, shared with him this honor. They reside in Newark, Del.

From The Orient

Writing from the wonderful island of Sumatra in the Federated Malaya States, Preston L. Peach, '03, sent home a letter. He is looking forward to his return to America in 1938 in time for Alumni Day.

As he writes he sees much activity in those uneasy states of the Orient. He writes that the British are very calmly making an impregnable stronghold in Singapore with their army, navy and air forces. No moss is growing around John Bull. The temper of the British, though a friend of Japan, is being tried by this strange form of aggression that Japan is showing in the Far East at present.

Peach sends best regards to all of his fellow alumni and friends "On the Hill."

Homecoming Saturday, October 30, 1937

Return to the campus and "Keep your friendship in repair" "Don't lose touch with your friends." This can be easily accomplished by visiting the campus at Homecoming.

O

Teaching—Genevieve Everett, '37, a graduate in education, has been appointed on the faculty at Hyattsville High School. She will assist Principal J. A. Miller, '12, in a clerical capacity and teach in English.

O

Representative—Tom Birmingham, '37, a former star among Terp boxers, is now the representative of Horn & Shaffer, of Baltimore, Md.

O

Evansville College—At the inauguration of Dr. Francis Marion Smith as president of Evansville College, Indiana, the University was represented by Dr. John G. Huber of Evansville. Dr. Huber is a graduate of the Medical School in the class of '98.

O

Harvard—Ronald F. Brown, '32, a member of Lambda Chi Alpha, has been appointed as an assistant in the chemical laboratories at Harvard University. In addition, he will take a course in preparation for his Ph.D. degree in organic chemistry.

Brown graduated with first honors in the College of Arts and Sciences, was a member of the track squad and made Phi Kappa Phi. In 1935, he married Miss Allie M. Sandridge.

O

Medicine—In Salisbury, Md., another Maryland graduate, Dr. W. L. Howard, '27, M.D., '34, has opened offices. Dr. Howard is an eye, ear, nose and throat specialist. His intern work was carried on at the University Hospital in Baltimore. Dr. Howard is a native of the Eastern Shore, coming from Federalsburg.

O

Pershing Mondorff, the gridder who is picked to fill Bill Guckeyson's shoes surely can fill his own. He has a No. 10½ foot. He's from Emmitsburg, Md., and, like Guckeyson, the nearest he ever came to playing football before coming to College Park, was to boot a soccer ball around.

O

New England—Margaret Carr goes to the University of New Hampshire as a teacher of child study and home management.

Health—In the State Board of Health office of Delaware can be found Cecil A. Marshall, '35. He is located at Dover, Del.

○

CCC—Lieut. Talbert A. Smith, '35, former R. O. T. C. captain, is on army duty with the CCC camp at Joplin, Va. He took the army training course under the Thomason Act.

○

CCC—The flaming gridiron guard, John Simpson, '35, is now Lieutenant Simpson, commanding officer of the CCC camp at Elkridge, Md.

Transportation

The library on transportation of 8,000 volumes completed by Dr. Charles Henry Davis, has been received at the University.

The estimated cost of the library is a quarter of a million dollars and contains some very rare volumes.

Special arrangements have been made to care for this gift in the Engineering Building.

●

Birth—Mr. and Mrs. Raymond E. Gable announce the arrival of Raymond Lewis on August 21, 1937. Mrs. Gable was formerly Miss Charlotte Taylor, '32, a member of Kappa Delta sorority. Mr. Gable is now practicing law in Washington, D. C., with offices in the Bank of Commerce and Savings Building. Mr. Gable, '30, is a member of Delta Tau Delta fraternity.

●

Father—"And there, my boy, you have the story of my exploits in the Great War?"

Son—"Yes, Daddy, but what did they need all the other soldiers for?"

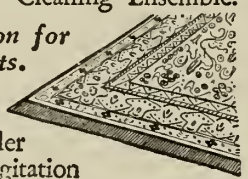
Miss Grace Barnes,
Librarian,
Campus.

Home of Mrs. George R. Savage, Wilmette, Ill. Mrs. Savage, who has used Hoovers ever since her marriage, now has the One Fifty Cleaning Ensemble.

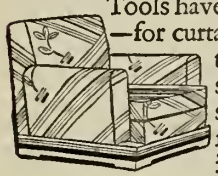
Hoover's finest version of the new idea in cleaning—*The tested and approved method of cleaning deep-piled carpets, Oriental rugs, upholstered furniture, silk lamp shades, draperies and all good furnishings is the Hoover One Fifty Cleaning Ensemble.*

Here's why particular home-owners, after comparing all cleaners, are selecting this Hoover One Fifty Cleaning Ensemble.



Unusual protection for heavy-piled carpets. Rug manufacturers recommend its use, because they consider patented Positive Agitation the sure way of removing embedded grit.

Better cleaning of fine upholstery and draperies. Hoover's complete Cleaning Tools have brushes, soft and stiff—for curtains, mattresses, Venetian blinds, upholstery, bookshelves, stair risers, inside the motor car. All together in Handy Cleaning Kit.



A fundamentally clean home. Moths dislodged. Buried dirt in furniture, and dog hairs in rugs removed.

Heavier cleaning of today's homes offset by new Hoover conveniences. Magnesium, new wonder-metal ⅓ lighter than aluminum, for amazing lightness. Two speeds for thick and thin rugs. Instant conversion from rug to furniture cleaning, without stopping motor. Automatic rug adjuster. Time-to-empty bag signal. Dirt Finder.

Home-owners careful in equipment selection recognize in Hoover a name that has stood for the highest standards of manufacture for thirty years. Phone for a Hoover representative to show you the One Fifty by appointment. Sold by leading dealers everywhere—for $1.50 a week, payable monthly. Three 30th Anniversary Hoovers, for every home and budget.

30th Anniversary—The Hoover Company, the oldest and largest maker of electric cleaners, has held its leadership through all these years, by its outstanding service to 4,500,000 homes.

Lightness and brightness is the spirit of the new decor, and the Hoover makes cleanliness possible in the light toned fabrics and carpets of the new mode.

Ensemble is the new idea in this cleaner, interchangeable for rug and furniture cleaning. Modern streamlined design by Henry Dreyfuss.

From rug cleaner to furnishing cleaning—instantly. Simply slip tool connector in slot in side of cleaner.

The greatest retail stores are proud to sponsor the cleaner *guaranteed by its makers to prolong the life of rugs.* This guarantee is stamped on the bottom of every Hoover.

Cover Picture

The new Girls' Dormitory is known by the coeds of the campus as Dorm "B." This new building for the girls was first occupied in the fall of 1936. More than 100 girls are housed here with all modern conveniences. The Dorm stands at the head of the valley and just west of the old reservoir lake, occupying a place of splendor and prominence. Probably the alumnae can suggest a good name for this building.

●

He's Weak Somewhere

Score another for Dr. H. C. (Curly) Byrd, Maryland University's protean president. The engineering college of the university has been "accredited" by the Engineer's Council for Professional Development as a result of additions to the faculty and improvements in the courses of study made by Mr. Byrd.

Mr. Byrd is constantly challenging our wondering admiration. We are firmly convinced that he is the greatest football coach, greatest financier, greatest administrator and greatest politician that ever became president of a university.

But as it isn't wise to believe in the absolute perfection of human beings we are still looking for Curly's Achilles heel. The man must have a weakness somewhere.—From Baltimore *Evening Sun.*

●

Safety Engineers

Several Alumni are connected with the safety Engineering department of the Maryland Casualty Company of Baltimore. Richard Baldwin is the relief man for the U. S. Recently he returned from eight months work in Indiana and for the present will remain in Baltimore.

Carroll P. Kakel, '34, a member of Phi Delta Theta is safety engineer stationed in St. Louis, Mo.

In Philadelphia, Phil Mossburg, '36, a Phi Sigma Kappa, is doing boiler inspection work.

Homecoming Supreme » »

"IT WAS A GREAT DAY," the expression of many alumni who attended Homecoming this year adequately describes the day.

The events began Friday night with a bonfire and demonstration of spirit and enthusiasm by the students to surpass all other performances. Everybody from the freshmen to the oldest alumnus attending the Homecoming was on hand. Mr. Samuel Register, '76, was the top dignitary at the bonfire and rally held in the old reservoir in front of the Girls' Dormitory and from that time on he did not miss an event. He arrived on the campus Friday afternoon, procured a room in the dormitory and was one of the boys from then on until Sunday morning.

Bonfire

During the bonfire an alarm was turned in to all fire departments (by an unknown party) and they soon joined in the parade to the rally. Band playing, auto horns and sirens of the the fire trucks let the countryside know that something was going on. As the flames of the fire began to die a snake dance started and traversed the campus, winding up on the Washington-Baltimore Boulevard where traffic was halted for 10 minutes while the collegiate songs and cheers poured forth.

On Saturday morning registration for old grads began early in the Ritchie Coliseum and as the day wore on, the registration line increased. When the day was over the largest registration in history was recorded.

Byrd's Anniversary

The day was not only a Homecoming but it was also a celebration in honor of Dr. H. C. Byrd, '08, now president of the University, on his twenty-fifth anniversary in the services of his Alma Mater. As part of his early contact with the University included coaching of athletics, the first football team to be under his direction was in 1912. All living members of this team were guests of honor on this occasion.

The first event Saturday was the freshman-sophomore traditional tug-o'-war on the historic banks of Paint Branch. It was the sophs, this time, who took a ducking before a record audience.

Following this the coeds had a play day in hockey with visiting teams from Wilson Teachers' College, American University and Western Maryland. At the same time the men's intramural team was entertaining the Johns Hopkins soccerites on the parade ground and won.

'Gator-Terp Clash

At 2.00 P. M. the rush was on for the largest Homecoming throng in history as the annual Terrapin-'Gator gridiron clash got under way in Byrd Stadium. It was a game packed full of thrills and brilliant plays, bringing the spectators frequently to their feet. Maryland emerged from the struggle victorious to make a Homecoming really great. At half time a colorful float parade by student organizations entertained visitors and old grads.

DR. A. A. PARKER
President "M" Club

Sponsors for the Florida and Maryland teams, accompanied by the University Band, paraded on the field, pausing before the special box occupied by Dr. Byrd, and presented his mother with a beautiful basket of flowers.

"M" Club Meeting

Immediately after the game the annual meeting of the "M" Club was held in the Engineering Auditorium. At this time, Curley Byrd, '08, himself a member of the club, was presented with a gold watch as a memento from the club in recognition of his contribution to collegiate athletics of fair play, courtesy, character and loyalty during his 25 years in the service of his Alma Mater. The annual election of officers for the ensuing year were also held, Dr. A. A. Parker, '04, a noted physician of Eastern Shore, was unanimously elected president. Donald H. Adam '28, of Chevy Chase, Md., was elected vice-president.

For the yarn swapping, the old grads and faculty members met for a buffet supper and mixer in the Girls' Field House. Entertainment was furnished by the University Glee Club and many compliments were paid them for their splendid entertainment and also the University Dining Hall for the fine dinner they served.

Homecoming Dance

The concluding event was the Homecoming Dance in all its splendor and glory. The Coliseum was decorated in Hallowe'en colors with many favors and noise makers adding to the gaiety. Prizes were awarded in three dances, one for students, one for the members of the football team and one for the alumni. At this time the prizes for the fraternity or sorority house decoration was awarded to Sigma Nu first prize, and to A. O. Pi, second place. The Sigma Nu's theme was the campus in the early days of the College Park schools, rail fence, straw stack, "Byrd's House," and other reminders of days gone by. A. O. Pi greeted the visiting team with large stars bearing the names of individuals on the 'Gator eleven. Honorable mention went to K. A. with their welcome to 'Gators and old grads and Alpha Gamma Rho for decorations of evergreen and large welcome display to Florida and alumni. Other attractive themes caught the eyes of many sightseeing alumni and visiting Floridians.

The "Big Apple," a part of the dance program, was the concluding event of the greatest Homecoming ever held at College Park.

Among those present were:

H. Reford Aldridge, '25; H. H. Allen, '10; Louis S. Ashman, '08, Ridgely W. Axt, '20; H. Badenhoop, Jr., '09; J. H. Bafford, '28; Dick Baldwin, '34; Kenneth W. Baker, '31; J. Hall Barton, '20; Robert W. Beall, '31; Madeline Bernard, '31; J. J. Betton, '99; Robert D. Blackistone, '26; Sara H. Baker, '32; Dr. Robert P. Bay, '03; L. E. Bopst, '16; J. E. Faculty Changes In Agriculture

SEVERAL CHANGES among faculty members of particular interest to Alumni and former students have taken place at the University this fall. With the retirement of Dr. H. J. Patterson, for many years a central figure of Maryland agriculture, research and education, a reorganization of the College of Agriculture was necessary. Dr. W. B. Kemp, '12, for several years Assistant Dean of the College of Agriculture, asked to be relieved of his duties to give more time to research in genetics. Dr. T. B. Symons, '02, for twenty years Director of the Extension Service, has been named in the capacity of Acting Dean of the College of Agriculture and will also be the Chairman of the Council on Agriculture which will shape, in cooperation with State-wide agricultural organizations and commodity groups, the State's policies in this field. Dr. Symons will continue his duties as Director of the Extension Service. He will be assisted by Dr. Harold F. Cotterman as Assistant Dean of the College of Agriculture and Acting Director of the Agricultural Extension Service. Professor of Agricultural Education, also Professor J. E. Metzger, who is Experiment Station and Chairman of the Division of Agronomy. Professor E. I. Oswald, former head of the county agents will be Assistant Director of the Extension Service along with Miss Venia Kellar, who was previously Director of Home Demonstration groups. The Heads of the various agricultural divisions who are members of the Council on Agriculture are Professor K. C. Ikeler, Chairman, Division of Animal Industry; Dr. Mark Welsh, Professor of Veterinary Science and State Veterinarian; Dr. E. N. Cory, '09, State Entomologist; Dr. Lee Schrader, Chairman of Horticulture; Dr. F. W. Beasley, '92, State Forester; Professor L. E. Bopst, '14, in charge of Fertilizer and Feed Inspection; Dr. Morley Jull, Chairman of Poultry Husbandry. In addition to the four big subject matter divisions, it is intended to form advisory councils to be made up of men prominent in the industry with which they are identified. By bringing together all of these advisory divisions with the University Council on Agriculture, the University can better understand the problems of the agricultural industry and will be able to better serve the people of the State of Maryland.

Dr. T. B. SYMONS, '02, Acting Dean of Agriculture

Professor E. I. OSWALD, 08, Asst. Director Extension Service

●

Teaching—William H. Henderson, '36, has in addition to introducing scientific agriculture in Denton and Greensboro High Schools, coached a baseball team to county championship. We have had many fine reports from Bill's work down in Caroline County. Bill is quite a community figure in the vicinity of Greensboro and Denton. I have heard that he likes the shore so much that he even forgets to come home for the week-ends.

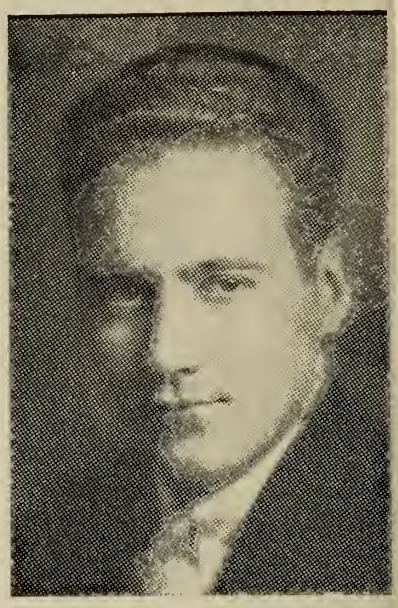
Flees Shanghai

For sometime a missing Alumnus, Leland G. True was located when news arrived that he had successfully fled Shanghai when the Japanese aggression began. True is an engine expert for the United Aircraft Export Corporation and had been on duty in China when the aggression began. He now is in Manila in the Philippines.

DEAN OF MEN AND ASSISTANT DEAN

PROFESSOR GEARY EPPLEY, '18

Another step forward in the orientation of the students has been taken by Dr. Byrd in his reorganization in the University. Professor Geary Eppley, '18, has been named Dean of Men. He is also Director of Athletics. For quite a number of years Eppley has been interested in student affairs and has served as the Chairman of the Student Life Committee. There is no one better qualified to be in this position than Eppley. He is assisted in this work by Ralph Williams, '33, who has for several years been Secretary of the Student Life Committee and in charge of student affairs, and now has the title of Assistant Dean of Men. Ralph was formerly President of the Student Government and has also taken graduate study at Columbia University. Both men are well qualified for the positions to which they have been named.



RALPH WILLIAMS, '33

For A Good Cause

With a desire to give the Alumni Association Scholarship Fund a big boost, the University of Maryland Club of Baltimore, co-sponsors with the Washington Alumni Club, are putting their shoulders together. The members of these two clubs are receiving contributions from all alumni and friends for which they are giving in return chances on a new automobile. The drawing will be made December 3 and it is not absolutely necessary that you be present to receive the award should you win.

This effort is for a very worthy cause and should have the support of every alumnus. Any amount you wish to contribute from 25 cents up will be gratefully appreciated and should be sent at once to John Silkman, 1123 N. Charles St., Baltimore, Md., and John will do the rest. Win, lose or draw you will be joining the ranks of many other fellow alumni in putting across a most worthy project.

●

Foods

Miss Marion Connelly of the Dietetic Division of the New University Hospital has been asked by Dr. M. T. MacEachern, president of the American College of Surgeons, to speak at their Clinical Congress in Chicago during the month on the subject "Food Service." This is quite a distinction as Dr. MacEachern is considered an authority on Hospital Organization.

South Africa » »

By FRANK E. MECKLING, JR., '31
Helderberg College, South Africa

It soon will be two years since Mrs. Meckling and I left the States. One of the first things that strikes an American in South Africa is the largeness of the country, the hospitality of the people and bilingualism.

Helderberg College is a school located thirty-five miles from Cape Town. The chief purpose of the school is to train missionaries for the interior of Africa. Our school admits only Europeans. A large percentage of which are the sons and daughters of our missionaries. Besides conducting four years of high school work, known as Standards VII-X in this country, we attempt to give three years of college work. It is necessary to give a great deal of time to the practical things of life in the formation of our curriculum.

It was my privilege last year to make a trip of about four thousand miles visiting several mission stations. Here one sees the raw native. Naturally, I would not compare the native of Africa with his brother black man in America. The native of this country has many handicaps to overcome 'ere he can compete in any respect with his black brother in America.

The Union of South Africa has a tremendous problem on her hands in adjusting the native to a good type of civilization. The black man is becoming more and more insistent upon his rights and he is taking up the cry of "Africa for the Africans."

Like the rest of the world, South Africa is undergoing a great change and as one of the British Dominions she receives her inspiration and directions from the Mother Country. There are many attractive spots of nature in South Africa where one could spend a holiday. South Africa is making a bid for the tourist trade of the world and the inducements she has to offer are manifold.

Dr. Patterson Retires

A most eminent figure of the University faculty for more than 49 years was Dr. H. J. Patterson, who has retired from active duty.

Dr. Patterson became associated with the University in 1888 when he assumed control of the Experiment Station, one of the oldest in America. His influence and agriculture knowledge has been prominently displayed by the great improvements made in the agriculture trend of Maryland. He has been a central figure in work behind agricultural research and education. He is author of numerous publications and articles on agriculture.

In his later years he was Dean of the College of Agriculture and his esteemed guidance will be greatly missed. Many student organizations have flourished under his direction. Any project of community interest he gave untiringly his efforts. And he has always given generously his time in behalf of his fellow man.

Food Service At University Hospital »

FOOD for approximately 375 patients with special diets for 75 to 100, are prepared daily in the Diet Department of the New University Hospital in Baltimore. In addition, 350 doctors, nurses and employees are served by the same department making a complete total of 2,475 meals for a single day.

The Chief Dietician is Miss Marion Connelly, who has been with the University Hospital for 15 years and also conducts the Dietetic Training School in conjunction with the supervision of all meals. By her concerted efforts she has built a splendid dietetic course where students, nurses and dieticians receive instruction in the principles of diet theraphy.

Felisa Jenkins

The assistant dietician of this great work is Mrs. Felisa Jenkins, '31, well remembered for her outstanding scholarship and leadership during her undergraduate study at the College Park schools. She is a graduate of Home Economics and also a member of the Tri Delt sorority as well as several honorary sororities. Miss Jenkins won the Womens' Senior Honor Society Scholarship Trophy for high standing and yet found time to take a very active part in womens' athletics. Since graduation Miss Jenkins has received her M. S. degree from Mills College, California, in 1932. She then taught in Delaware and followed up with the dietician training course at Walter Reed Hospital in Washington. Prior to coming to the University Hospital she was dietician in the State of New York. Miss Jenkins comes back to the University well qualified in her field.

The main kitchen of the New University Hospital is probably one of the best equipped kitchens of its kind in this section of the country. Its operation and facilities are of the most modern type. A new and unusual feature is the central nourishment system in which employees work in shifts to provide continuous service for 24 hours a day for preparing and serving intermediate feedings.

Class Instructions

The food is of the best grade, meticulously selected and particularly prepared.

Class instruction is given student nurses in nutrition and cookery. Each nurse takes the course in dietetics as a part of her training. There are some who specialize in this particular field. The student dieticians have an opportunity to give diet instructions to outside patients in four University Hospital Clinics.

The Dietary Department is one of the attractive features of the University Hospital. It has attracted wide attention and frequently receives many visitors who are always welcome.

Several of the recent graduates of the College of Home Economics are now taking this Dieticians course at the Hospital; Peggy Price, Peggy Starr and Vivian Wolfe, all of the class of '37.

Dingman Goes Up

The new Division Plant Manager of the New York Long Lines Divisions of American T. & T. is J. E. Dingman, '21. This is another rung in the ladder of success attained by Dingman since his affiliation with the company shortly after graduation. He first went to Lansingbury, N. Y., as equipment he was sent to the General Plant Manvas transferred to the Disitrict office at Troy, N. Y., for about a year, when attendant. A few months later he ager's Office in New York City. In July, 1930, he went to New Haven, Conn., as District Plant Superintendent. Following a three-year service in his capacity he was returned to New York as Division Plant Engineer of Division one. His next promotion was to that of Engineer of Outside Plants of the Engineering Department. On September 1, last, his recent promotion became effective.

Dingman was a graduate in mechanical engineering and a quote from the 1921 *Reveille* predicts what his classmates expected of him, "A mechanical genius may be hard to find, but what the ho! there is one in our class. 'Jimmy' was forever teaching the boys in the shop the difference between a lathe and a saw." "Jimmy" married Miss Amelia Williamson and they are residing in New York. Another engineer in the making is their 6 year old son, Michael David.

●

¶ Professionals and amateurs use the same tools, but otherwise they have practically nothing in common.

Sullivan Promoted

Another reward for meritorious and efficient service was accorded Jerry H. Sullivan, '21, by the George A. Fuller Construction Company. Jerry has been named Vice-President in Charge of the New England Division. He is also privileged to represent the company in any other section of the country where his services would be advantageous in the solicitation of building contracts.

Jerry went with the Fuller Company shortly after graduation and has had considerable construction experience since that time. He has been in charge of any number of jobs, all the way from Florida to Canada. Prior to his appointment as Vice-President he was General Manager of the Canadian office located at Toronto, Canada.

He attended Homecoming this year for the first time in several years and so enjoyed himself that he has made a pledge to be present for all future Homecomings. Being a former gridiron star for the Terps, he is naturally very much interested in the collegiate pastime. Jerry studied civil engineering, was a member of the Sigma Nu fraternity and also managed the baseball team. He is married with a family of four children and a "Happy" wife and that is her name. His home is in Boston, Mass., which is his native state.

●

Memorial Address

When the inhabitants of Gloucester, Massachusetts held their annual Memorial exercises in honor of Gloucester men who went "down to the sea in ships," they invited Professor Gardner H. Foley, instructor in English in the Dental School to deliver the memorial address. Professor Foley, a native of Gloucester, appropriately commemorated the loss of both of his grandfathers who lost their lives as skippers of local fishing vessels.

In commenting on his address, the *New York Herald-Tribune* wrote the following, "delivered a simple, yet stirring and impressive address, stating, 'the men of Gloucester still carry on the traditions which their forebearers inaugurated in 1623—a vital part of the great American saga'."

Wreaths of flowers were cast upon the waves of the sea in commemoration of those brave men.

●

¶ Don't talk about what you're going to do—do it.

« « OLD LINE ATHLETIC NEWS » »

By W. H. ("Bill") HOTTEL

Generals Last Grid Foe

MARYLAND'S football team had a Thanksgiving Day morning engagement with Washington and Lee in the Baltimore Stadium to wind up its grid campaign.

The Terps had won seven of their nine engagements when they went into their Turkey Day tilt. Their only losses were to Penn, 28 to 21, and Penn State, 21 to 14.

St. John's, Western Maryland, Virginia, Syracuse, Florida, V. M. I. and Georgetown were defeated, and despite the loss to Penn State, the Terps outgained the Nittany Lions by 12 first downs to 5 and 321 yards to 213. A brilliant attack, paced by Weidinger's passing, Smith's pass catching and Meade's ball carrying and kicking beat Georgetown.

Lack of reserves has made the going difficult for Maryland, Ralph Albarno and Bob Brown, sophomore tackles; Mike Surgent and Bill Wolfe, senior guards, and Jim Meade and Charlie Weidinger, junior backs, have been called upon to be "60-minute" men in most every contests.

o

Basketers Are Priming

MARYLAND'S basketers have begun toil for a heavy campaign that will open with a tilt with Richmond U. on December 16, and follow with one with Michigan the next night, both at College Park.

After the two pre-holiday games, the Terps will not play again until January 5, when they will resume their schedule by entertaining Randolph-Macon.

Coach Burton Shipley will depend on ten tossers in his 22-game card, four of whom are letter men. These are Waverly Wheeler and Eddie Johnson, forwards, and George Knepley and Milton Mulitz, guards.

Coleman Headley, a good guard who has been kept from playing basket-ball by indoor track, completes the veteran contingent.

Pershing Mondorff and Adam Bengoechea, forwards, and Charlies Norton, Charlie Harner and Francis Beamer, centers, are the aspirants to come up from the freshman quint.

Wheeler and Mondorff were not available until after the football season and Beamer, who was removed from the grid squad on account of a broken finger, may not be able to report until after the holidays.

Shipley's greatest problem is to fill the guard positions left vacant by Charlie Keller and Fred Thomas, who turned to professional baseball. Keller, a senior, is back in school to complete work for his degree, but, of course, is ineligible. They doubtless were the best pair of guards in the Southern Conference.

Basket-ball Card

(Last Year's Scores in Parenthesis)

December 16—Richmond U., College Park. (31-40)
December 17—Michigan, College Park.
January 5—Randolph-Macon, College Park.
January 7—Washington and Lee, Lexington. (27-31)
January 8—V. M. I., Lexington. (48-28)
January 12—Georgetown, Washington. (27-39)
*January 15—Duke, College Park. (31-34)
January 28—North Carolina, Chapel Hill. (24-41)
January 29—Duke, Durham. (30-34)
January 31—Virginia Tech, College Park.
February 2—Navy, Annapolis. (37-53)
February 3—New York U., College Park.
*February 5—Washington and Lee, College Park. (35-41)
February 10—William and Mary, College Park. (41-29)
*February 11—V. M. I., College Park. (43-28)
February 12—Catholic U., College Park.
February 15—Baltimore U., College Park.

February 23—St. John's, College Park. (37-39)
March 3, 4 and 5—Southern Conference tourney.

*Double headers with boxing.

Boxing Schedule

(1937 Results in Parenthesis)

*January 15—Duke, College Park.
January 29—Catholic U., Washington. (4-4)
*February 5—Virginia, College Park. (5-3)
*February 11—Western Maryland. (6-2)
*February 19—Coast Guard Academy.
February 25 and 26—Southern Conference tourney.
March 5—Rutgers, New Brunswick. (5½-2½)

*Double-header with Varsity basket-ball.

Boxers Are Working

COACH HEINIE MILLER also ha the boxers busy but they do no get into competition until the middl of January. He has about 50 on th varsity squad but has a tremendou task as Benny Alperstein, nationa 135-pound champion is the only regu lar from 1936 he has on hand, excep Bob Walton, 165-pounder, who doe not intend to scrap this season.

Walton, who has been the regula football center, also is colonel of th R.O.T.C. Regiment and president o the Senior Class, so has plenty to oc cupy his mind.

Duke, which was a runner-up t Maryland for the Southern Conferenc title last February, will be the Terps opening foe.

o

Maryland has two exceptional cross country runners in Jim Kehoe of Be Air, Md., and Mason Chronister o Baltimore. They finished first hand in-hand as Virginia was beaten 24-31 They stepped the 3-mile course in th fast time of 16 minutes, 3.8 seconds.

o

Ends Play Great Game

MARYLAND'S pass-catching an capable defensive ends — Blai Smith, John McCarthy, Bill Bryan and Nick Budkoff—have played a tell ing part in the success of the Terps this season. Smith has scored thre times and McCarthy once direct from passes and they and the others have helped set up scores.

A notable example was the Florida game when Bryant caught a pass t put the ball on the 2-yard mark and McCarthy, after snagging an aerial lateraled to Budkoff to place the ball in the same position. Maryland touch downs followed in each case.

Their defensive assignments has a lot to do with the 9-7 defeat of V. M I., Smith scored on a heave and pass es caught by wingmen set the stage for Mondorff's winning field goal.

Football Team Of 1912

Among the honored guests of the great Homecoming and Silver Jubilee celebration in honor of Dr. H. C. Byrd, were members of the football team of 1912.

All of the living members, who could possibly be present, occupied a special box at the "Gator"-"Terp" gridiron game with their friend, coach and president, Dr. Byrd, but to them he is familiarly known as "Curly Byrd."

Among those to return were: W. G. Morris, L. G. Willson, Frank S. Hofecker, E. R. Hindman, J. E. Bowland, Henry W. White, V. P. Pennington, Seymour Ruff, J. B. Coster, W. B. Posey and H. B. Shipley.

A recent newspaper story caused some comment when these old boys got together. An announcement was made that the pro teams had a new wrinkle by having the line shift one way and backfield another. When this was told the remark was, "Why we did that back in 1912. Do you remember Curly?" and you bet he did.

As football was the high spot of the day, no doubt reminiscenses about the games in the old days was the top subject.

The reunion was so successful that more reunions of the old teams are being planned.

●

College of Engineering Gets National Rating

Another important accomplishment has been attained by the University when the College of Engineering received an accredited rating as one of the foremost engineering colleges in the country. The rating was given by the Engineering Council for Professional Development, the only recognized agency for accrediting engineering schools.

Several new engineering courses have been added. City sanitation, electrical communication, heating, ventilation and refrigeration. The College also directs several extension short courses in mining, fire-fighting and bridge inspection. Also the Maryland Mapping Agency, an important project inaugurated under the P.W.A., is directed by the College of Engineering.

There is included in the proposed building program for the University, in addition to the College of Engineering to further improve the facilities for engineering instruction.

Dr. Broughton, '08, Named Dean

Dr. Levin Bowland Broughton, '08, director of the Department of Chemistry, has been named Dean of the College of Arts and Sciences. He succeeds Dr. Thomas H. Taliaferro, who now is Dean of the Faculty.

Dr. Broughton, a native of the Eastern Shore, has been in the services of his Alma Mater practically ever since graduation except for a short time while on leave of absence when

DOCTOR BROUGHTON

studying for his Doctor's Degree in Chemistry. As Director of the Department of Chemistry he is also State Chemist. He is chairman of the Athletic Board and a member of the Premedical Committee.

There will soon be another alumnus in his family when his daughter, Elinor, graduates this year in Home Economics.

●

Kappa Delta Wedding

Ruth Wilson, another K. D., is now Ruth Heintze on the teacher's roll calls. Ruth is finishing her last year in the College of Education.

Another K. D. to take the marital step was Josephine Mills, a senior in the College of Home Economics. She now answers to the name of Mrs. Josephine Good.

●

Loans—H. C. "Gump" Matthews, '28, former Old Line star of the cinder track visited the campus recently. He is with the Small Loan Bureau in Rochester, N. Y.

Homecoming Spirit

Out in Ames, Iowa, Charles H. Cunningham, '34, celebrated Homecoming Day with another institution but his spirit was at College Park. October 30 was also the Homecoming Day for Iowa State and Charley's spirit was aroused by the many activities there which were similar to those taking place at College Park.

Charley received his Masters Degree this year at Iowa State in animal husbandry and if "The wagon holds together" he hopes to have his Doctor's Degree in veterinary medicine next year. A member of Alpha Gamma Rho, Charley is a Marylander through and through.

Two other Alumni are also at Iowa State doing graduate work. Oscar Miller, '36, of Clarksburg, Maryland, is with the Department of Dairy Husbandry and Aaron Welsh, '37, of Sigma Phi Sigma is in the Botany Department, both working on a fellowship basis.

●

Mixer In New York

On Saturday, December 11, the Maryland Alumni Club of New York will hold a Tea and Cocktail Dance at the Waldorf Astoria Hotel, New York City. Dancing will begin at four o'clock in the New Lounge Restaurant where service is a la carte with a $1.00 minimum charge per person.

Miss Sarah E. Morris, '24, is chairman of the Committee on Arrangements and will be assisted by Miss Grace Laleger, '28, Mr. William R. Maslin, '09, and Mr. Fred Rakeman, '18.

Dr. McCall Anderson, '08, is chairman of the Reception Committee and May Disendorf Fouts, '32, Betty Prentice Heck, '27, Patricia Wolfe Casselman, '25, W. P. Beatty, '26, Ed Mullen, '34, and John Burke, '34, have been asked to serve with him.

Misses Morris and Laleger have planned several unusual Mixers and Dances. Dr. E. King Morgan, '21, although newly wed, has been requested to officially welcome all bachelor girls.

Mr. Donald Keiffer, '30, is president of the club.

●

Education—Mary Keller Goodhart is hostess, secretary for the American Counselor on Education located in Washington, D. C.

About Those Whom We Know » »

Birth—Mr. and Mrs. Roger Whiteford announce the arrival of Susan Elizabeth, the new boss of their home, born October 13, last. Roger is the well-known cinder track performer in the middle twenties. Now he will run errands for Susan.

Mrs. Whiteford was formerly Edith Burnside, of the Burnside twins, and an A. O. Pi. The Whiteford's reside at 3508 Clifton Ave., Baltimore, and all are home.

O

Marriage—Miss Roberta Marjorie Hannum, '35, of Berwyn, Md., and Temple R. Jarrell, '35, of Hyattsville, were united October 16 at the home of the bride's parents. Both are well-known for their campus activities in the women's and men's athletic activities. They will reside in Berwyn, Md.

O

Wedding—Miss Ann Shaw, '34, daughter of S. B. Shaw, '03, and Edwin Greenwood Stimpson, '30, were married in the St. Andrew's Church in College Park. The ceremony was performed by Reverend Ronald Taylor.

Another alumnus in the wedding party, was F. P. Veitch, Jr., '35, who served as best man. A reception followed the wedding on the lawn of the home of the bride's parents. The newlyweds are making their home in Baltimore.

O

Birth—E. J. Roberts, '30, announces the birth of a seven-pound daughter, born October 4, 1937. He married the former Louise Crosby of Washington, D. C., and is now a patent attorney associated with the Westinghouse Electric and Mfg. Co., after completing his L.L.B. degree at George Washington University.

O

Deceased—Dr. Gordon F. Cadisch, well-known former professor of economics in the University, died October 4, 1937, following an operation. At the time of his death he was dean of the Hudson College of Commerce and Finance of St. Peter's College Jersey City.

O

Married—Maryland's number 1 coed beauty in 1936-37, Miss Georgia Grove married Mr. William Taylor Bobb, of Cottage City. The newlyweds make their home at 3924 Seventh Street N. E., Washington, D. C. Mrs. Bobb was the leading lady in the University opera, "The Vagabond King," last year. Miss Genevieve Lorry, '35, was one of the bridesmaids.

O

Teaching—At Pocomoke City, Md. John H. Farson, '36, a Theta Chi, has been placed in the Hall of Fame at Pocomoke High School as instructor in English and advisor to the editor's staff. John was well-remembered for his activity with the rifle, for which he received the varsity "M." Best to you, John.

O

Married—Reverend James Lawrence Plumley, '33, and Miss Martha Franklin, of Winchester, Tenn., were married in October in the chapel of the University of the South (Sewanee) Tenn. Rev. Plumley is a graduate of the Sewanee Theological Seminary in the class of 1936. He then went to Freeport, Texas, where he was pastor and this fall he was transferred to the Trinity Church in Houston as assistant pastor.

Rev. Walter P. Plumley, '29, brother of the groom, now pastor of the St. John's Episcopal Church in Mt. Rainier, Md., officiated.

The newlyweds will make their home at 1212 Francis St., Houston, Texas.

O

Attorney—Earl Edwards, '34, announces the opening of law offices in the Carry Building, 927 Fifteenth St. N. W., Washington, D. C. Earl graduated this year from National University Law School.

O

Deceased—Miss Mary Virginia Hoffman, '34, died at her home in Hyattsville, following a long illness. Miss Hoffman was a member of the Kappa Delta Sorority.

O

Engaged—The engagement of Miss Martha A. Cannon, '35, to Earl L. Edwards, '34, was announced by her parents at a recent tea given by her sisters, Miss Mary E. Cannon and Mrs. Minna C. Wilson, '32.

Martha is a member of Alpha Omicron Pi Sorority.

Earl is a member of Phi Delta Theta Fraternity.

MATERIAL success depends not only upon acquiring but also upon *holding* what you gain. Your economic welfare is constantly threatened by fire, windstorm, explosion, accident, theft and other hazards that are unpredictable and, to a great extent, beyond your control.

Modern property insurance is extremely flexible . . . . with policies available against practically every hazard known to man. As you acquire, insure and be sure.

Protect what you have with North America Policies. This oldest American fire and marine insurance company (founded in 1792) enjoys an enviable reputation for financial stability and prompt and equitable settlement of claims.

Insurance Company of North America

PHILADELPHIA

and its affiliated companies write practically every form of insurance except life

Step ahead with an Oldsmobile for 1938 . . . it's the smartest buy of the year!

NOWHERE ELSE CAN MONEY BUY SO MUCH!

Style-Leader Styling • Safety Dash with Safety Instrument Unit • Safety Interiors • 95-Horsepower Six • 110-Horsepower Eight • Knee-Action Wheels • Super-Hydraulic Brakes Center-Control Steering • Unisteel Body Construction • Turret Top • Air-Cooled Battery No Draft Ventilation • Safety Glass • Unobstructed Floors • Tri-Cushion Engine Suspension

More Of Those Whom We Know

Florida—James B. Gahan, '30, of Berwyn, now is located in Sanford, Fla.

O

Teaching—Dorcas Teal, '37, now is a member of the teaching staff of Bladensburg High School of Bladensburg, Maryland.

O

Graduate—Flora Waldman, A. O. Pi, '37, is engaged to Robert Reid, class of '36. They plan to be married in December.

O

Economist—Paul R. Poffenberger, class of '35, has accepted the position of assistant agricultural economist at the University of Maryland.

O

Engaged—Temple R. Jarrell, '35, a graduate in Physical Education, is engaged to Miss Roberta M. Hannum, of Berwyn, Md.

O

School—Jerry Schuh, '37, is going to school again. He is attending Temple School for Secretaries in Washington. Jerry is majoring in shorthand and typing.

O

Marriage—Wayne B. Hamilton, class of '36, married Miss Claudia Wheeler, on February 12, 1937, and is now living in West Virginia. Another mountain family in the making.

O

Medical—Dr. John A. Ratigan, Baltimore, Md., has in his possession a "Physician's Hand Book," 1866-1867, which contains the names of prominent U. of Md. medical graduates.

O

Married—Ruth Lord, class of 1935, and Clyde John Korth Carlstrand, of Baltimore, were married on August 12, 1937. They will reside at 3736 Winterbourne St., Baltimore, Md.

O

Chemistry—Ronald F. Brown, of Washington, goes to Harvard to study for a Ph.D. He is specializing in chemistry and will work as assistant in the chemical laboratory at Harvard.

Phi Delta Kappa and Kappa Delta Join

This summer, Vera Walker, a K. D. senior in Home Economics, and Joel Hutton, a senior engineer and a prominent man on the campus in dramatics and O. D. K. honorary, were married. Joel and Vera are both back and attending classes regularly.

Homecoming Comments

When the shouts of Homecoming began to settle, Jerry Sullivan, '21, attending his first Homecoming for many years, said, "My what a good day. I saw so many old friends and had such an enjoyable time I will never miss another one. Boy! how the 'Terps' did step on the 'Gators'. The game brought to my mind many pleasant memories."

Topping the comments about the day was that of Samuel Regester, '76, while according to his class he was the oldest Alumnus present, he persistently maintained that he was the youngest. It was his first Homecoming and "Never another will I miss for the next 25 years", said Mr. Regester.

Al Pease, '32, a stalwart gridiron end of former years, writes that it was a most successful and pleasant Homecoming. Every minute was greatly enjoyed.

Comments from other Alumni will be gratefully appreciated by the editor.

Engineer—R. T. Bollman is with the Minneapolis Honeywell Regulator Company with headquarters in Philadelphia, Pa. His address is Wayne and Roberts Avenue., Philadelphia, Pa.

O

Married—Virginia Leishear, '37, Home Economics, was married to Mr. James Cornelius Donaldson in August. The couple is residing in Washington.

Among the attendants was Miss Helen Stolzenbach, '37, Home Economics.

O

Columbia—Betty Kemper, '37, is now attending Columbia University in New York, taking graduate work. Betty was very active in coed athletics. She was seen at the Penn-Maryland game at Philadelphia with Peggy Price.

O

Illness—S. Scott Beck, of Chestertown, Md., a graduate of the Law School, has temporarily retired from the practice of law because of illness. His practice is being handled by Stephen R. Collins, until the graduation of S. Scott Beck, Jr., now a student in his senior year in the University Law School.

O

School Board—Ernest E. Wooden, a graduate of the University Law School, has been appointed to the Baltimore County Board of Education. He is a lawyer, accountant, farmer and civic leader. He is also president of the Farmers and Merchants Bank, at Fowblesburg, Md., and president of the Baltimore County Health Association. Because of his wide knowledge of county affairs and interests in P.-T. A., a better appointment could not have been made.

O

Military—Major E. B. McKinley, '18, of the U. S. Army, a recent campus visitor, is now attending the Army Industrial School in Washington, D. C.

Captain McKinley was formerly at Schofield Barracks, Hawaii. He left school to enter the World War and remained in the army afterwards, rising from the grade of first lieutenant to major.

O

Leonard Smith, class of 1936, is back on the campus as a chemistry assistant. Leonard was married this summer to Miss Pauline S. Zimmerli and among the attendants was Mr. Andrew Beveridge, also of the class of 1936.

Smith was an honor graduate in chemistry and was a member of O. D. K., Phi Kappa Phi, and of Alpha Chi Sigma.

O

Married—Eugene Thomas, former Noble Ruler of Alpha Theta, '34, married, on May 29, Miss Helen Mae Condon, of Frederick, Md. The wedding took place in the Frederick Evangelical Reformed Church. After the wedding the couple left on a northern wedding trip. Gene is manager of the Frederick Grading Company where he has been working since leaving college. Gene, I believe you forgot to send an announcement to Alpha Theta.

Ludlum, '24, Promoted

Sam Ludlum, '24, having majored in Agricultural Economics, is manager of the S. S. Kresge Store in New York City.

Sam started in the chain store business about 1925 at a salary of $25 a week. He advanced through the various stages—from floorman to assistant manager to manager. He has managed stores in Frederick, Md., Germantown, Upper Darby, Wilkes Barre, Philadelphia, and Petersburg, Penn., and Jamaica, Long Island, N. Y.

Sam is now receiving a salary which would make college deans and even many colleges presidents envious. He has reached his high position through the ability to work hard, and render meritorious service.

The Test of an Investment

✓ Security Offered

✓ Financial Returns

✓ Future Possibilities

You consider all these points in making a money investment. It's even more important to consider them when investing years of effort to build a career.

Because of the way life underwriting "checks" on all three counts, increasing numbers of college graduates are entering this business. Those selected by The Penn Mutual Life Insurance Company can start their careers on a fixed compensation basis, instead of a commission basis, if they wish.

Send for booklet: "Insurance Careers for College Graduates."

Cover Picture

The cover picture is that of the Dining Hall at College Park. The building is located just west of the site of the old building. Its modern kitchen prepares meals for more than 500 students daily, also the University infirmary, and a cafeteria for faculty members and day students. The director of this department is Miss Audrey Killian, '23, a graduate of Home Economics. Miss Killian has been in the University employ practically ever since her graduation.

●

For Convenience

Any alumnus who desires a convenient pocket card of the indoor athletic schedule is requested to write the Alumni Office.

On the opposite page is printed the entire schedule for basket-ball and boxing. It will be noticed that four Saturday night performances will include basket-ball and boxing on the same program. This program begins at 8 P. M. and there is but a short intermission of 10-15 minutes between the basket-ball game and the boxing. These are very attractive and entertaining programs and from past experiences, usually have a capacity crowd. The alumni are, therefore, advised to write the athletic office as far in advance as possible for reserved seats.

The Southern Conference Boxing Tournament will again be held in the Ritchie Coliseum at College Park on Friday and Saturday, February 25 and 26.

●

Manufacturing—Down in Crisfield, Md., the Briddell boys of the class of 1935 operate a flourishing manufacturing business of oyster, trapping and fishing implements. Tom is the advertising manager and Charlie is the plant manager. Their father started the company many years ago.

Tom is married and is the proud daddy of a young lady named Brenda Barnes Briddell. Congratulations to Mrs. Briddell!

Well, no, Charlie has not taken the fatal step as yet, but we are all listening!

Charter Day Celebration » »

ALUMNI, faculty, and friends of the University will again assemble to celebrate the beginning of our institution on Charter Day, January 20, 1938, at 7.00 P. M., Lord Baltimore Hotel, Baltimore, Md. Similar to the celebration held last year but somewhat different will be the program this year.

For the purpose of presenting an opportunity for all to become better acquainted, the general program will be a banquet, a short speaking program, reception and dance. This program, it is felt, will have a general appeal from the oldest to the youngest alumnus and faculty member.

The leader of this great occasion is an eminent alumnus of both branches of the University. A man who has attained a position of high esteem among his fellowmen, the Honorable Edwin T. Dickerson, member of Supreme Bench of Baltimore, has been appointed General Chairman. Judge Dickerson is a double graduate of the University, having completed a classical course at the College Park schools in 1898 and the Law course in 1902. He is heartily in favor of the annual celebration of the beginning of our University which brings alumni, faculty, and friends together with a unity of purpose. The general vice-chairman will be Charles W. Sylvester, '08, another enthusiastic and loyal alumnus.

Sharing the responsibility of directing the progress of the celebration will be the presidents of the various alumni organizations—Dr. Robert P. Bay, '05, Medical; Dr. Arthur I. Bell, '19, Dental; Dr. John A. Strevig, '12, Pharmacy; Miss Bessie Maston, '20, Nursing; Mr. John E. Magers, '14, Law; Mr. E. F. Zalesak, '25, Undergraduates, and Dr. A. A. Parker, '04, "M" Club.

It was the above named alumni and the members of their respective Board of Directors who met and unanimously proclaimed their approval and support of this worthy endeavor. Each association will appoint members of the various committees and county leaders throughout the state.

Last year the capacity of the Lord Baltimore Hotel was taxed and it is expected that even a larger crowd will be in attendance this year. It is suggested that alumni write direct to your own alumni secretary for reservation with alumni and faculty members of your school or class. Should members of the county organization wish to make up a group of their own it will be possible for them to reserve an entire table of eight or ten by writing direct to the chairman of the ticket distribution committee — Mr. Willard M. Hillegeist, University of Maryland, Lombard and Greene Streets, Baltimore, Md., on or before January 15.

HON. EDWIN T. DICKERSON

Following the main banquet course there will be an opportunity for all to become acquainted, to meet the president of the University, the Board of Regents, Deans, and faculty members. The reception will be held in the dining room.

Dancing will begin almost immediately, with the music furnished by a well known orchestra. Special entertaining features will be a part of the general program and it is expected that at least part of the program will be broadcasted.

No alumnus should miss this great affair. The cost is $2.50 per plate.

The Annual Banquet

It is an annual custom to be reminded of the sacrifice and forethought of our ancesters about those things which have amounted to something in the world. On January 20, the alumni, faculty, and friends of the University will get together to celebrate the realization of their dream. It was on this day nearly a century and a half ago that a small group of far-thinking and determined citizens persuaded the state legislature to grant a charter establishing the University of Maryland—an institution for the service of the people of Maryland.

At the Lord Baltimore Hotel, on January 20, we will commemorate what they did for us, as well as give indication to the people that we, the Alumni, are united in a one common unified purpose—the University of Maryland and its services to the people of the state.

●

Glee Club

Words of praise can be rightfully directed to the University Glee Club and Girls' Chorus for the splendid progress they have made. Already several performances have been given off the campus and recently an impressive concert was presented in the University Auditorium before a capacity crowd.

It is the desire of the Glee Club to make a few trips during the year to several parts of the state under the auspices of the Alumni Groups. Plans are being formulated for one trip on the Eastern Shore presenting a performance at Salisbury and Cambridge sometime during the third week in April.

The club is under the direction of Professor Harlan Randall of Washington, D. C.

Chemical Society

On the tenth anniversary of the founding of the Alpha Chi Sigma, professional chemical fraternity, the professional chapter of Washington, the chapter at George Washington University and the University of Maryland joined in a celebration. A banquet was held at the Kennedy Warren apartments in Washington with Dr. Charles E. White, '23, associate professor of chemistry at the University, as the principal speaker. Others from the University to take part in the program were Dr. L. B. Broughton, '08, State chemist and head of the department of chemistry; Dr. Nathan L. Drake, professor of organic chemistry, and Dr. Malcolm Haring, professor of physical chemistry.

●

Teaching—Dr. Glenn S. Weiland, '28, now is with the chemistry department of Wittenburg College at Springfield, Ohio. He was originally from Hagerstown, Md., and received his M. S. in 1930 and his Ph.D. in 1933. He is a member of Alpha Chi Sigma, honorary chemistry society. He married Miss Gladys Snyder and they now are residing in Springfield, Ohio.

To The Alumnae of Maryland » »

'T has been brought to the attention of the Alumni Advisory Board that erhaps the women graduates of the Jniversity would like to have a part n naming those buildings dedicated to 'omen's activities. At present there 're three such buildings which have ot been named—the second women's ormitory, the girls' field house and he Home Economics Building.

There is a prevalent feeling that ince the architecture of the Univerity is colonial in style the precedent et in the naming of Margaret Brent fall be continued by using the names f Maryland colonial women. Names f some of these prominent women are sted below:

1. Lady Anne Arundel, and Queen nne, both to the court born, have had heir outstanding personalities, capailities, pulchritude and material conributions memorialized in the State. Iowever, this recognition need not necssarily preclude consideration of their ames since they stand out in our coonial history, and in no case has the onor been conferred by women.

2. Nancy Carroll, Maryland's foreost woman military genius and of tock that produced framers of the Constitution and founders of the naion, such as Charles Carroll and Dan-el Carroll.

3. Miss Jane Contee, wife of John Ianson, "First President of the United States," so recorded since he was the irst president of the Congress of the Confederacy, in 1781. She was born in Prince George's County and died there. Alexander Contee Hanson, in line of decent, became Chancellor of Maryland. The Contees and Hansons contributed ery greatly to the development of the Colony and the State.

4. Virlinda Stone, wife of that outtanding governor, Thomas Stone, noted for brilliancy, social grace and inesse, as well as a writer of distinction. Her letters have been published.

5. Lady Charlotte Baltimore, wife of the Fourth Lord Baltimore, titled, cholarly, gracious, social leader, enlowed with great human sympathy, nd marked contributor to the cultural evel of the Colony.

6. Barbara Fritchie, Maryland's foremost woman patriot, at least as celebrated in poetry and fiction if not n history.

On the other hand letters have been received containing the suggestion that these buildings be named for women who have pioneered in the development of coeducation at the University.

It is requested that your suggestions be returned to the Alumni News office.

The results of this survey will be tabulated and presented to the Board of Regents in the form of a recommendation from the Alumnae of the University.

Women represented on the Alumni Board are: Miss Ruth Miles, '31 and Mrs. Edith Burnside Whiteford, '29.

●

Parker, '05, Elected "M" Club President

When the annual "M" Club meeting was over on Homecoming Day, Dr. Albert A. Parker, '05, eminent physician of the Eastern Shore, was presented with the gavel, as president for the ensuing year. For several years, Dr. Parker has served as vice-president of the organization and ever since he crossed the Chesapeake in 1901 to enter the College Park School of the University, he has been a loyal and able rooter. To substantiate this acclaim, here is a paragraph from the *Reveille* of 1905.

"As a rooter, 'Ape' has won great renown, both at home and abroad, having been known to make more noise than six ordinary men. In the art of painting the college surroundings with the numerals '05, he has proved himself a worthy member."

A. A. Parker was always active in extra-curricular affairs. He managed the football team in 1904, was a champion tennis player in 1905, is president of his class and is a prominent leader in alumni affairs.

After finishing his undergraduate work at College Park, Dr. Parker attended the Medical School in Baltimore, graduating in the class of 1908. He returned to his native country, the Eastern Shore, and has developed a most enviable practice. Outside of collegiate athletics, his favorite pastime is fishing, but so far the writer has not seen any proof that he is a good fisherman.

"Doc" Parker married Miss Nan C. Dryden and they reside in the well-known Pocomoke City on the good old Eastern Sho'.

Philadelphia Alumni Meeting

When the Terrapin football squad journeyed to Philadelphia to play Pennsylvania this fall, they found an enthusiastic group of alumni cheering them on. The night before the game, a rally was held at the Penn Athletic Club with some fifty or more alumni, wives, and friends present.

A. Moulton McNutt, '06, president of the group presided. The honored guest and principal speaker of the occasion was Dr. H. C. Byrd, '08, president of our own Alma Mater. Mr. E. F. Zalesak, '25, president of the Alumni Association, also spoke before the group.

Preceding the speaking, each person was asked to stand and introduce himself, giving his class. Among those present, we find: C. Mervyn Young, '06; D. P. Perry, '21; Dr. E. M. Salulsky, '34; Dr. F. Melvin Edwards, '34; Dr. Douglas A. Edwards, '31; L. J. Stabler, '22; Robert N. Todd, '15; John P. Mudd, '07; A. Moulton McNutt, '06; M. Tyler McNutt, '38; James H. Harlow, '23; S. C. Dennis, '12; George R. Richard, '28; George M. Parsley, '22; A. R. Todd, '08; W. P. Fusselbaugh, '22; W. C. Rolph, '04; M. E. Davis, '13; Mrs. Helen Beyerly Habich, '27; Emerson Ogle, '37; George F. Fetters, '27; Miss Mabel F. Mudd, '32; and Frank T. Chestnut.

President McNutt was ably assisted by John P. Mudd, '07, former president of the Alumni Association, in making arrangements.

●

To The Students

Many words of laudatory comment were expressed by alumni at Homecoming about the real display of collegiate spirit and hospitality. The holiday spirit made a very enjoyable day for old grads. Fraternity and sorority house decorations and the float parade, all with a display of welcome and hospitality for the visiting team as well as alumni, added to the day's enjoyment. Every fraternity and sorority house as well as the Alumni Mixer "On the Hill" had a capacity return of former students.

This fine spirit of cooperation was greatly appreciated by the Alumni Association and has already had its effect in the enthusiasm among former students.

A Chinese War Lord » »

By ED. TENNEY, '28

FOR some inexplicable reason it always worried Sun-Kwei, the Chinese war lord, to know that his two lieutenants, Han Loon and Chien Teng (who nearly matched their leader in cunning and cruelty) silently watched him as he regularly prayed to the picture of his father. He sometimes felt that they knew these prayers were inspired as much by fear of ancestral wrath as by his genuine love of the memory of the old man whom he had wronged in his youth. In his Chinese after-world, ancestral devotion brought the only peace. But this was nonsense. How could Han and Chien know that a youthful but characteristic act of demoniacal cruelty had brought upon Sun-Kwei's head the disgrace of disgraces—he had been disinherited by a stern but loving parent whose forbearance had at last been exhausted.

And Sun-Cheng, his father, had suffered even more for, after Sun-Kwei's diabolical deed, the people of his native village passed the old man's shop with averted faces. Sun-Cheng was forced to leave behind forever the hallowed ground of the village where countless generations of his ancestors lay buried.

Sun-Kwei's peculiar talents had not been wasted. He had relentlessly risen from the ranks of banditry, into which he had naturally drifted. He was reigning ruler of the province of Li-Mien which he now held in an iron grasp. He took what he wanted from the people by might alone and his followers obeyed his every whim because of the fear he inspired in them. Then too, his system of spy upon spy within his ranks prevented any treachery save his own.

Sun-Kwei was well aware that Han and Chien, the lieutenants whom he knew hated him, would consider his fear of ancestral wrath a weakness, for a weakness he knew it to be. They must never know it. They must never know that he held fear or doubt of anything, because once it was revealed to them, they would show less mercy in exterminating him and taking his power than he had ever shown any of his enemies. Han and Chien had hated him ever since he had conquered them, though he had subsequently given them important places in his horde because he needed their fierce leadership. They, in turn, thirsted for the spoils he could provide.

Sun-Kwei put away his misgivings. He had promised himself and the spirit of his father, than when he realized his next immediate objective with the additional power and funds it would provide, he would use it to find his aged father—if he still lived—and forever make atonement to him.

Sun-Kwei's present ambition led to the possession of the rich province of Fu-Han that lay to the east. The revenue that he could squeeze out of it was many times that derived from Li-Mein. He maintained very friendly relations with Fu-Han, however, until the spies he had placed there had lain their groundwork. They bought off all the corrupt officials and sent agitators among the troops of the province to spread stories of the riches Sun's troops received, warning also of his cruelty if opposed. When Sun's agents had undermined the more corrupt officials and sufficiently weakened the morale of the soldiers of Fu-Han, Sun struck. Swiftly and ruthlessly he struck. All fell before him. All, that is, except the large walled city of Sooking on the far northeastern border of Fu-Han.

Sun had expected resistance here. His spies had told him that the city of Sooking had its own soldiers and they could be neither intimidated nor bought off. The soldiery was supported by a committee of merchants who provided funds for the defense of the city so that it would not yield to the bandit general. Attack after attack was launched against it—but to no avail. The defenders had ample and up-to-date equipment, sufficient provisions for a long siege, and adequate water from the city's wells.

Sun-Kwei could not throw his major forces against this lone, out-of-the-way city. He was now patrolling a large, recently conquered, hostile province in addition to his home bailiwick. Furthermore, he was desperate lest the brave defense of Sooking attract so much attention that public opinion would demand that the resources of the central government be thrown against him. This government had heretofore chosen to ignore him because of his large contributions. After three unsuccessful weeks of siege he was beside himself with wrath. He swore that once the city fell, the defenders would undergo the most dir torture he could conceive.

Then, too, he was worried over th behavior of his two lieutenants, Ha and Chien. Both had been natives o Sooking. Although banished for thei crimes, they still had relatives livin there. Sun-Kwei's wrath turned o them as he forced them to direct th siege. While they silently agreed, h time and again read in their eyes th malice and hatred they held for him.

Sun's agile brain finally conceive the plot that brought about the fall o the city. He withdrew his troops th distance of one day's march from Soo king and rested them there for sev eral days. He knew the besieged city would use this respite to replace thei diminishing supplies. He deliberately left unguarded several points where food could be obtained by the defenders. The latter lost no time in taking advantage of the opportunity. Thus, a few days later, one of Sun-Kwei's spies took a wheelbarrow load of steamed-bread into Sooking and quickly sold all but two loaves which he kept for himself. That night Sun's "baker" spy took a bottle from each of the loaves and poured the contents into the city's wells.

That night Sun-Kwei also moved his troops up and surrounded the city walls. Two days later the gates of Sooking were thrown open and the survivors begged for water. Sun-Kwei let them beg— and die begging.

But not the merchant' committee who had planned this defense. Oh no! They could not die so easily. He decided that they should be killed by the slowest and most painful of deaths. They were to have the flesh skillfully cut off from neck to waist thus exposing their vital organs to the elements —and eventually to the dogs and fowl. When the job had been performed, he was to be called so he could gloat over them in their last moments. It was a final gesture of peculiarly oriental cruelty to show the already dying populace that Sun-Kwei could not be resisted. Not he. Someday he would rule all China.

A few hours later Sun-Kwei marched triumphantly down the main street, with all the pomp and ceremony of a barbarian king. He was flanked by his unwilling lieutenants. Far off down the street he could see the figures of the dying men tied to posts. The dogs were held in leash, ready to partake of the human flesh at his word.

"Their leader is tied to the center

ole, master," whispered one of Sun's pies. "He has shown no fear as yet. He is not a native of these parts but has been his influence that has made he people resist you, O Great Lord."

"I, Sun-Kwei, will make him die with ear in his heart as all those who ose me do" thundered the war lord.

He strode up to the central figure hose head had dropped from exhaus- ion and pain.

"Who is it that dares defy Sun- Kwei" roared the bandit general as he hrew up the old man's chin.

As Sun-Kwei gazed into the weary ut steady eyes of the dying man. a old fear clutched his heart. His jaws agged and his face turned a sickly, lotted purple. There was no inner esourcefulness to sustain the mighty ar lord now.

The great bandit general threw himself in the dust and grovelled for all to see. "My father, my father," was all he could blubber as the old man slowly closed his eyes in his last sleep.

Sun-Kwei felt, rather than heard, the silent footsteps of Han and Chien. He raised his tortured glance to see them slowly advancing on him with the triumphant leers of a hate that was to be no longer frustrated. One glance was sufficient to tell Sun-Kwei that he, in a short while, would be the next occupant of the pole on which now hung the lifeless body of his father.

THE END

[*This was an original fiction story written by Ed. Tenney, '28, who spent about six years in China during which time he heard many weird tales about the War Lords of China.*]

Nellie Buckey, '25, In England » » »

(Excerpts from a letter to a campus friend. Thanks, Nellie.)

SINCE arriving in England—(the first week-end I went to Paris, pent two days at the exhibition and wo days seeing other parts of Paris) —I have been on the go trying to pick ut dry days for sightseeing, etc. I ave been able to see a large number f art galleries, the parks, etc., and ave enjoyed some excellent London lays. Next week I am going to see George and Margaret," and "French Without Tears"—both have been successes in New York. Last Saturday saw "Messure for Messure" at the Old Vic Theatre. It was a very good Shakespearian production. The students had a Hallowe'en party in process at the hotel, so I was soon out of the mood of the Roman times.

Next week I will begin my school visitation. It will be an intensive visitation period because there are so many things that I want to see. Now that I am here the time seems very short. Many of the students are going to France at the close of the English term, December 4; and I think I will try seeing a little of English country. We have four students at Exeter—at the University College of the Southwest—and I will have to visit them. Then, perhaps, too, I will get to Ireland —but all this is in the future.

Wish I could see some of those football games. I thought of you last Saturday at Homecoming. I remembered what a lovely time I had last year and what a gorgeous day it was. I hope this year's was as perfect.

Best wishes to all,

NELLIE (Buckey).

[*Nellie is with the New College Teachers College of Columbia University in charge of foreign travel for students*].

●

Medical Alumni Hold Gathering

Recently the medical alumni headed by Dr. Robert P. Bay, '05, held an oyster roast and social at the 104th Medical Regiment in Baltimore. More than 150 alumni were on hand for a generous indulgence in oysters prepared in several styles.

Among the more notable present was Dr. W. H. Marsh, '76, M. D., one of the oldest living alumni of the University. Dr. Marsh is the retired director of the U. S. Public Health. His summer home is at Solomons Island but he resides in Baltimore during the winter. Dr. Marsh has a nephew, Edward Hawkins, now attending the College of Engineering at College Park.

The oyster roast was entirely social. There were no speeches, no prepared entertainment—just a jolly get-together.

●

Children—Dorothy Pierce, '35, has a good position with the Home for Crippled Children in Baltimore.

Entomology

Some changes have taken place in the department of entomology which involve several graduates of the University.

Dr. Castello Graham, M. S., '30, Ph. D., '36, formerly in charge of field work with headquarters at Hancock, Md., has been transferred to College Park, where he will have charge of the extension work in entomology for the entire State.

From mosquito to Japanese beetle work jumps Samuel Crosthwaite, '27, former star lacrosse player for the Terps. Sam has been transferred from Berlin, Md., to College Park, where he will assist in the $160,000 retardation program for the Japanese beetle. Sam had been loaned to the government for the mosquito control work. His official title is assistant entomologist and instructor in the department at the University.

Another to return to the campus from the Eastern Shore is George Stratman, ,'33, formerly at Snow Hill, also on the mosquito work. George will also lend his aid in the Japanese beetle work.

When these two return from the mosquito work, another alumnus will assume control. Rufus Vincent, '34, a former Terp star in three sports, is in charge of the biological work of the mosquito control with headquarters at Berlin.

The State entomologist in charge of of the entire State program is Dr. E. N. Cory, '09, a former Terp athlete, who now helps direct the athletic policies of the University as a member of the Athletic Board.

●

Kappas Open New Home

Nearly a thousand alumni, faculty and friends of the Kappa Kappa Gamma Sorority helped them celebrate the opening of their new home at a tea held December 5.

The new home is of palatial colonial design with accommodations for 40 or more girls. The latest in heating equipment has been used. Inviting recreational rooms are provided and the general atmosphere is that of a home.

Miss Jean Dulin, president of the chapter, accompanied by Dean Marie Mount, faculty advisor and Mrs. L. F. Driver, house mother, officially received the guests. The members of the sorority gracefully assisted in showing the guests through the house.

Boxing Team Awaits Its Opening Battle

PRACTICALLY all that Lieut. Col. Harvey (Heinie) Miller could tell about his varsity boxing team when this was written was that it would be "in there fighting" when Duke was met in the opening match on January 15. Heinie probably will not definitely decide upon his first line-up until a day or two before the hostilities begin. All he knows now is that his 1937 Southern Conference championship outfit was wrecked by graduation and that the talent to fill the gaps is mainly green.

However, Heinie feels that if he could inveigle Bob Walton, 165; Blair Smith, 175, and Bob Brown, 215-pound football tackle to come out, he could have a winning campaign. Walton and Smith are proved scrappers and prospective champs in Miller's opinion, while he is convinced Brown would make a great heavy.

When this was written the leading aspirants in the various weights were:

115—George (Red) Dorr, Martin Rochlin and Ed Naughton, giving a good outlook.

125 and 135—Benny Alperstein, 135-pound champ, and Nathan Askin, a soph, will fight these two weights. Alperstein probably will drop back a class, as Askin is a natural lightweight and a good one. Bob Bradley and Al Diffenbach are other good 125-pounders.

145—Tom Coleman. a capable soph.

155—Bill Johnson, untried but promising.

165—Mike Panziotti and Henry Pearson, if the latter becomes scholastically eligible.

175—Ed Lloyd, sophomore reserve football guard.

Heavyweight—Donald Adams, a soph, who got some experience with last year's frosh.

But success or failure appears to depend upon Miller's efforts to get Walton, Smith and Brown into action. Otherwise, he will just have to plug along and look to 1939. The talent on the frosh squad gives him much encouragement for the future.

You just can't have winning teams in any sport every year. That is, of course, unless you can get ready-made talent, which just doesn't happen at Maryland.

Maryland's ring dates:

*January 15—Duke; 29—Catholic U., Washington.

*February 5—Virginia; †11—Western Maryland; *19—Coast Guard Academy; 25 and 26—Conference tourney at College Park.

March 3—Rutgers, New Brunswick.

†All University Night.
*Double-header with basket-ball.

●

Big Meet March 5; Trackmen To Travel

IT has been definitely decided that the second annual Maryland-Fifth Regiment indoor meet in the later's big armory in Baltimore will be held on Saturday night, March 5. This is the same relative date as in 1937. Geary Eppley, Maryland athletic director has had many inquiries from prospective entrants, particularly in the South, and feels that the 1938 meet will eclipse that of 1937 both in number and quality of athletes and in attendance.

While Maryland is waiting for its own meet it will compete in at least three other big indoor affairs. A relay team will go to the Millrose games in New York on February 6, and two weeks later will return for the New York A. C. meet. A sizable squad will be sent to the Southern Conference indoor title affair at Chapel Hill on February 27.

Frank Cronin, veteran runner, and Mason Chronister and Jim Kehoe, sophs who starred as cross-country men during the past season, doubtless will be three of the relay team members. Bill Theis, Alan Miller, Jim Peaslee and Eddie Miller are the other aspirants. If Chronister or Kehoe should run in special events in any of the northern meets, two of the aspiring quartet may gain places on the relay four.

Kehoe and Chronister finished third and fourth in the Southern Conference championship cross-country meet at Chapel Hill.

During the cross-country season, Maryland lost to North Carolina, but pressed the champions, and scored over Virginia.

Banquet Is Climax To Fine Grid Team

MARYLAND "polished off" its finest football season in years when it played host to the squad and many others at the Beaver Dam Country Club on December 13. In all, there were about 200 present, including some alumni, newspapermen and coaches from other schools.

The Athletic Board of the University was host and the affair was voted to have been the nicest thing of its kind ever held by the Old Liners. Everyone had a good time, although it was a stag event.

Charlie Fenwick, a former Virginia star, who used to help coach the Terps from 1928 through 1932, was the principal speaker and, like his coaching, he did a fine job of it.

Dr. L. V. Broughton, head of the Athletic Board; E. F. Zalesak, prexy of the Alumni Association; Dr. A. A. Perker, president of the "M" Club, who came all the way from Pocomoke City; Geary Eppley, athletic director, and head coach Frank M. Dobson, who awarded the letters. all spoke briefly and entertainingly.

As someone said, "The dinner and everything else was good."

There was more than an hour of informal hob-nobbing after the dinner was over which most of the football players spent in getting their programs filled with autographs.

While Maryland's record of eight wins in ten games was pleasing, the phase that was stressed above all else was the fine poise and conduct of the squad and the fact that the players got real enjoyment out of the game, either winning or losing. It was felt that Frank Dobson did more than a great coaching job with a bunch of students, proving a real man-builder. There was a real bond between the coaches and the players at all times, this being just as true also of Jack Faber and Al Heagy, Dobby's assistants.

Dobby gave all the credit to the boys in presenting the 19 letters to the following:

Ralph J. Albarano, John J. Boyda, Robert A. Bramd, Robert S. Brown, William C. Bryant, Nicholas A. Budkoff, Frank T. DeArmey, James L.

Forrester, Frederick M. Hewitt, John J. McCarthy, James G. Meade, Pershing L. Mondorff, Frank J. Skotnicki, Blair H. Smith, Michael G. Surgent, Robert L. Walton, Charles W. Weidinger, William G. Wolfe and Manager Perry I. Hay.

Bryant, Smith and McCarthy, ends; Wolfe and Surgent, Maryland's finest pair of guards; Walton, center; DeArmey and Wheeler, backs, and Hay, members of the graduating class, received gold footballs, which were presented by Jack Faber. These go to players who have been on the varsity squad three years and who once have won their letter.

Maryland's record for the season was:

Maryland, 25; St. John's, 0.
Maryland, 21; Penn, 28.
Maryland, 6; Western Maryland, 0.
Maryland, 3; Virginia, 0.
Maryland, 13; Syracuse, 0.
Maryland, 13; Florida, 7.
Maryland, 9; V. M. I., 7.
Maryland, 14; Penn State, 21.
Maryland, 12; Georgetown, 2.
Maryland, 8; Washington and Lee, 0.

●

Lone Battle For Frosh

Only one ring engagement has been slated for the Maryland yearling team. This engagement is with the Virginia frosh, to be held in the afternoon on February 5 — the night the Cavalier varsity visits to help stage a classy twin bill. Washington and Lee, conference basket-ball champion, will offer the curtain-raiser that evening.

●

Terps On Star Teams

Led by big Jim Meade, who was all-Southern Conference back and all-America mention, Maryland placed an unusual number of gridders on all-star teams. Meade, along with Charlie Weidinger, quarterback, and Mike Surgent, guard, were picked on all the all-State and all-D. C. area elevens selected, and Blair Smith, end, was on all save one of them. Ralph Albarano and Bob Brown, tackles, and John McCarthy, end, were others to be first choices on some teams.

Bob Walton, center, and Bill Wolfe, guard, were on practically every second team and some other Terps came in for praise.

Varsity Basketers Are Sure To Rally

DESPITE the fact that pre-holiday games were lost to Richmond U. and Michigan, the Maryland basketball team definitely has not been sunk for the season and will provide plenty of opposition to the 20 quints that remain on the schedule.

The Terps were not ready for a clever Richmond team, but put up a good fight in losing, 31 to 26, while Michigan simply was too powerful to cope with in a contest that went the wrong way, 43 to 26. Testimony of the Wolverines' prowess was given a couple of nights later when they upset Dartmouth, 42 to 17, at Hanover.

The Maryland basketers, an even dozen, got together the Monday after Christmas to get set to resume the long schedule in a game against Baltimore U. in the Friends' gym in Baltimore the night of January 4. Then games come thick and fast, the rest of the list being:

January 5—Randolph Macon; 7—Washington and Lee, Lexington; 8—V. M. I., Lexington; 12—Georgetown, Tech High gym, Washington; *15—Duke; 28—North Carolina, Chapel Hill; 29—Duke, Durham; 31—Virginia Tech.

February 2—Navy, Annapolis; 3—New York U.; *5—Washington and Lee; 10—William and Mary; †11—V. M. I.; 12—Catholic U.; 16—Washington College, Chestertown; 18—Virginia, Charlottesville; *19—Dickinson; 21—Johns Hopkins; 23—St. John's.

March 3, 4 and 5—Southern Conference tourney at Raleigh.

†All University Night.
*Double-header with basket-ball.

Burton Shipley has seven veterans, six of whom are letter men, and five sophs on his squad but really did not get his full force at hand until after the two first tilts, and it may take three or four games of the new year to get the team going.

Here is the basket-ball roster:

Name	Pos.	Ht.	Wt.	Class
*Waverly Wheeler	F.	5-9	163	Sr.
*Eddie Johnson	F.	6-1	165	Jr.
*George Knepley	F.G.	5-11	164	Jr.
*Milton Mulitz	G.	6	178	Jr.
*John McCarthy	C.G.	6-2½	188	Sr.
*Bill Bryant	G.	6	170	Sr.
xColman Headley	G.	5-11	163	Sr.
Francis Benner	C.G.	6-2½	183	Soph.

* Letter men.
x Out for time in two other seasons.

Ship has no regular team and it is probable that all of the 12 will play enough to earn their letter. Frequent changes have been made necessary by the rule that practically has abolished the center tap-off.

Frosh Have Thirteen Games

THIRTEEN games have been arranged for Coach Al Heagy's freshman basketers, plenty for the talent he has at his command. He apparently has the material for one good quint but capable reserves appear to be lacking. Here are the frosh games:

January 5—Baltimore Poly; 8—Bethesda-Chevy Chase; 12—George Washington High; 27—LaSalle Institute, Cumberland; 28—Allegany High, Cumberland.

February 2—Episcopal High; 4—Greenbrier M. A.; 5—Forest Park High; 9—G. W. U. Frosh, Tech High; 12—Devitt; 15—G. U. Frosh; 18—G. W. U. Frosh; 23—G. U. Frosh, Tech High.

All the games at College Park will be played in the afternoon, either at 3 or 4 o'clock, while the contests at Tech will be played at night as prelims to varsity clashes.

It Is Encouraging

The secretary-treasurer has received many encouraging responses recently in connection with the ALUMNI NEWS. The outstanding among these were the voluntary contributions received by appeals thru the NEWS. Alumni have cut the blank from the last page of the NEWS and sent in their annual contributions. It is not only the contributions which were encouraging, but the fact that it indicated their interest in the continued welfare of the NEWS.

Another most complimentary reference to the ALUMNI NEWS was made when Edmund G. Mayo, '04, remarked that it was in the columns of the ALUMNI NEWS that he learned of the fact that the institution did not have a portrait of Capt. R. W. Silvester, former president, from 1892 to 1912, a sterling character, and one who played a most important part in laying the foundations for the growth of the University.

This is all a reward for one's efforts and is a tremendous encouragement.

Leaf, '27, Presents His Works

After some persuasion, because of modesty, Munroe Leaf, '27, author and member of the Board of Directors of Frederick A. Stokes Publishing Co., presented to the Alumni Association a complete set of his works. Munroe is a writer of books which are important factors in the early development of a child's education. His psychology is to present education in such a way that the child's humor is called upon for co-operation. The *New York Tribune* has been very complimentary toward Leaf's works in their book reviews.

The Alumni Association has in turn presented the gift from Munroe to the University Library at College Park, where their students in education will have them at their disposal.

The list is as follows: "Grammar Can Be Fun," "Robert Francis Weatherbee," "Manners Can Be Fun," Noodles," illustrated, and "Ferdinand."

Congratulations and appreciation to Munroe Leaf. May his gesture be an example.

Maryland Society Hears Doctor Byrd

President H. C. Byrd addressed the Maryland Society of New York at its December meeting in New York City on December 11. His subject, "The Place of the State University in Maryland," was enthusiastically received by the audience, many of whom have been out of touch with developments in their native state. In fact, the entire audience was greatly surprised to learn of the astounding growth of the University in the last ten years and the important part it plays in the life of every Maryland resident.

The Maryland Society, founded in 1898, is composed of native Marylanders now residing in Metropolitan New York. Membership is elective and the Society includes in its number many men prominent in the business and social life of the Knickerbocker City.

Several Maryland Alumni are quite active in the Society. J. Donald Kieffer, '30, President of the Maryland Alumni Club of New York, is also treasurer of the Maryland Society and a member of the Board of Trustees. James T. Knotts, Jr., '24, has been a member of the Society's Dinner Dance Committee for a number of years and Harry J. Watts, '04, has always taken a prominent part in the Society's affairs.

Bureau of Mines Building Dedicated

One of the outstanding events of the University calendar during the fall was the dedication of the Bureau of Mines Experiment Station.

Participating in the ceremonies were: His Excellency, Harry W. Nice, Governor of Maryland; Honorable John Finch, director of the Bureau of Mines; Dr. H. C. Byrd, president of the University, and Honorable Julian Conover, secretary of the American Mining Congress, chairman of the program. The exercises were preceded by a luncheon at the University Dining Hall in honor of the occasion. Here many other dignitaries were presented.

During the morning a joint meeting of Industrial Minerals Division and Washington Section of the American Institute of Mining and Metallurgical Engineers was held in the Engineering Auditorium.

The new station is known as the Eastern Experiment Station of the Bureau of Mines. This was made necessary by the growth of the Bureau of Mines requiring an experiment station near the Washington office. The building was erected on a 22-acre plot of ground donated by the University, which is just the beginning of an extensive station.

Following the exercises all guests were invited to inspect the buildings and laboratories.

Obituaries

Two very enthusiastic and loyal alumni have been taken by death from the ranks. Dr. Robert W. B. Mayo, '03 B. S., '04, M. S., '08, M. D., a man of considerable prominence in Baltimore City and well-known among the University alumni.

Dr. Mayo was a student leader, scholastically as well as in extra-curricular activities. He was captain in the cadets and literary editor of the *Reveille*.

He carried his leadership throughout life, taking an active part in medical and civilian endeavor.

O

Dr. Nathan Winslow, '01, M. D., son of the lates Dr. Randolph Winslow, '71, M. D., met an untimely death resulting from an automobile accident occurring near Ashland, Va.

Dr. Winslow was a leader in alumni activities, serving as managing editor of the *Medical Bulletin* for many years.

He has been in the University service ever since his graduation, as professor of clinical surgery. At the time of the Mexican border disturbance, he served in the Medical Corps for 17 months and left with the rank of major.

Dr. Winslow is survived by his wife, the former Miss Margaret Mable Massey, of Sandy Springs, Md.

Personal Pencilings

Married—Anita (Petey) Peters, ex '29, and Bill Budleigh, '28, were married on December 14th in The Church of Saint Ethelburga, Bishopsgate, London.

Petey was a member of Alpha Omicron Pi, and this year's president of the Washington Alumnae Chapter. Bill was a member of Sigma Phi Sigma, and for the past three years has been stationed in Arabia with an American oil company.

After spending some time in Italy and along the Mediterranean, the couple will be at home in Washington—3400 Macomb St., before leaving for the West Coast.

O

Visitor—Mr. James Wilson Brown, class of '35, visited the campus recently. He is attending Duke University, and expects to receive his Doctor's degree this year, majoring in forestry.

He received his Master's degree at Duke University two years ago.

O

Teaching—Dorothy Burch, M. S., '37, is teaching home economics at the National Park Seminary, Forest Glen, Md.

O

Tea Room—Helen Somers, '37, is employed in Woodward and Lathrop's tea room. Helen is a member of the Tri Delt Sorority.

O

Military—Lt. Col. George W. Rice, '16, M. D., of the 104th Medical Regiment, Maryland National Guard, has a son, George W., Jr., registered in the pre-medical course at the University

O

Celluloid—Thomas Neff, '32, now is employed by the Celluloid Company in

JAMES R. TROTH, '31

Met. 1030 Ber. 157R

Newark, N. J. His wife is the former Charlotte Hood, '34, of Mount Airy, Md. Tom is a member of Sigma Nu and Charlotte, of A. O. Pi.

Teachers—Garvis G. Shugart, '28, was recently elected president of the Prince George's County High School Teachers Association. Shugart is principal of the Upper Marlboro High School. He received his M. S. from Maryland in 1933 through attending the summer schools.

Birth—Mr. and Mrs. Eugene J. Roberts announce the birth of a seven-pound girl, born October 4, 1937. Mrs. Roberts was formerly Miss Louise Crosby of Washington, D. C. "Eugene" is now a patent attorney associated with the Westinghouse Electric and Manufacturing Co. He received his law degree from George Washington University.

The Roberts reside at 5512 2nd St., N. W., Washington, D. C.

Telephone—The new manager of the Towson, Md., offices of the C. & P. Telephone Co., is Robert T. Settle, '30. "Bob," a Sigma Nu, has been with the company since graduation.

In 1931 he married Miss Mary Anne Bucheister, of Marlboro, Md., sister of George, '23, and "Gus" Bucheister, '24. Gus now is married but George is still on the loose.

Birth—A baby girl named Linda Mary arrived this summer in the home of Mr. and Mrs. Ralph George Shure of Takoma Park, Md. Mrs. Shure was formerly Miss Helen Hitsenhoff of Chicago University. Ralph, a Delta Sig, in the class of '32, has, since graduation from Maryland, received his LL.B. degree from Georgetown University and now is a practicing attorney in Takoma Park. In his undergraduate day, Ralph was a star performer of the cross country team.

Traveler—Bill Beers, the world traveler, returned to this country for a short stay during the fall. Bill is with the U. S. Custom Service and at the present is stationed in Paris. That's tough on Bill. Prior to being sent to Paris, Bill has seen service in Prague, Moscow, Vienna and several other European cities. In his college days Bill was a star performer on the track squad in the weights. His shot-put records stood for several years. He was originally from waterbury, Conn.

Married—Another former Terrapin gridiron star to take the matrimonial step is George Lucky, '25. George, a native of Frederick, Md., was a member of the Sigma Nu Fraternity. He now is a representative of a building supply company in Washington, D. C.

Married—This summer, Miss Mary Alice Worthen, an A. O. Pi, class of 1935, married Mr. William Burt Carter on July 1, at Wilmington, Del.

Mary Alice was quite popular and active in extra-curricular activities. Mr. Carter graduated from Vanderbilt and is working for DuPont. The couple will live in Wilmington.

Birth—Mr. and Mrs. Everett Weitzell are the proud parents of a baby girl named Sadie Ann. Everett is of the class of '34 and is now assistant agricultural economist at the University of West Virginia. Them thar mountains of W. Va. surely do produce prolific families.

Married—On September 9, at the St. Andrews Church in College Park, Miss Ann Shaw, '34, Kappa Kappa Gamma, and Edwin G. Stimpson, '30, Ph.D., '37, of Theta Chi, were married. Fletcher P. Veetch, '31, was best man. A reception followed on the lawn of the home of the bride's parents. The newlyweds will make their home in Baltimore.

It's a Maryland Tradition!

After the game, in the evening, at lunch, at any and all times Marylanders get together you'll find them at the Varsity Grill—newly renovated. Your school spirit cannot be par until you are a regular patron.

The Varsity Grill

Cover Picture

The picture on the front of this issue is that of the Engineering Building during the reign of old king winter. This scene is, no douht, familiar and will bring back many fine memories of snow ball battles participated in by those lovers of the outdoor profession, the engineers.

New additions will be added to this department of the University within the next year because of the demands being made for courses in engineering.

●

Grand Reunion

When the alumni reunion is held this year it will be a Grand Reunion in honor of Melvin C. Hazen, class of '88, now a commissioner of the District of Columbia. It will be the fiftieth anniversary of the graduation of his class.

As a tribute to Mr. Hazen's class, all alumni groups will be called upon to give their untiring efforts on behalf of making this a great occasion. In Commissioner Hazen's remarks before the alumni gathering last June, he said, "When my class returns to celebrate the half-century mark next year we will show you a real reunion. Everyone is invited to attend." The officers of the Alumni Association wish to solicit the aid of all alumni in assisting to make this one grand and glorious occasion. There is no time better to renew fellowship than when your former schoolmates and classmates get together even for a day and to live again those happy days "On the Hill."

The slogan will be "On to College Park" to the alumni grand reunion where fellowship, friendship and entertainment will be the keynote of the program.

●

Engineer—J. Harrison Costinett, '35, graduate in Civil Engineering, is now in West Jefferson, N. C., where he is following his profession.

Charter Day A Brilliant Success

MRS. JOHN L. WHITEHURST GOVERNOR NICE SENATOR JOSH LEE
GENERAL RECKORD MR. JOHN E. RAINE DOCTOR BYRD SENATOR TYDINGS

WHEN 850 alumni, faculty, and friends of the University gathered at the Lord Baltimore Hotel in Baltimore on January 20 to celebrate Charter Day, they heard the guest of honor, His Excellency Harry W. Nice, Governor of Maryland, speak of the great work of the University under the direction of President Byrd. He termed the Universitly as "one of the greatest universities of the world." He warned the political leaders, many of whom were among the guests, that "no coming legislature can afford to ignore the University; no governor can afford to ignore the needs of this great institution."

"Old Pal Party"

The entire celebration was held with a spirit of gayety, fellowship and cordiality. Quoting the *Baltimore Sun*, it was "An Old Pal Party." Everybody was shaking hands and slapping backs in memory of good old college days. Sometimes the names escaped them; sometimes the faces had faded from memory, but in every case the old graduates were glad to meet one another and they were pals again after a moment of recollection. Faculty members joined their former students in the spirit of fellowship and friendship conveying to them the real hospitable spirit of the University.

Senator Josh Lee of Oklahoma, with his rich spice of southern humor, arose to the occasion and delighted the crowd with a mixture of southern stories and the importance of education. With a background of 17 years as a member of the public speaking faculty at Oklahoma University, Senator Lee was well-equipped with a knowledge of the University in the State's educational development.

Quoting the *Baltimore Sun* on the guest of honor: "But an old timer who was in his best form, the Hon. Harry W. Nice, stole the show." True, he did, with a speech of friendliness. A dramatic presentation of His Excellency set the stage. When the toastmaster, Senator George L. Radcliffe, presented His Excellency, the Governor of Maryland, all lights were lowered and a spotlight was directed upon the Governor, who raised his head and faced the light with that fine air of cordiality as Mrs. Randall sang "Maryland, My Maryland."

When the audience had recovered from the impressiveness of the dramatic presentation, the Governor smiled and in his tone of fellowship, so characteristic of his nature, began talking with his friends. Addressing President Byrd, Senator Lee, distinguished guests and alumni, he continued by saying, "Governor Jackson, Gover-

nor O'Conor, Governor Gordy and Governor Sasscer," all of whom were present except Senator Sasscer. The applause and mirth was invigorating following the announcement of each name. "All these governors are very busy just now and they can't always arrange to come to these affairs, but although you are very busy now, gentlemen, later on you'll have lots of leisure," continued the governor.

Welcomed Guest Speaker

On behalf of the State, Governor Nice welcomed Senator Lee to Maryland and concluded his welcoming remarks by saying that he hoped he would come to Baltimore soon again, "In fact, Senator Lee, Washington is not very far from Baltimore. I thought of that myself," said the Governor.

In conclusion Governor Nice gave a bit of advice. "I've got to move along now, as I have another appointment to speak, and remember I'm not a candidate yet. These gentlemen are getting anxious because they've got several places to speak, but let me advise you, gentlemen; stay here, you'll make more votes." In a rousing applause the governor took his seat to await the speech of Senator Lee.

For 17 years, Senator Lee pointed out, he had been an educator before entering politics. "In fact," he said, "I didn't run until my students had grown old enough to vote."

Education and Democracy

In speaking of political fights, Senator Lee remarked that probably Maryland was not accustomed to the hot political fights they frequently had in Oklahoma, but Governor Nice, from his seat, said, "You wait."

"There is a close affinity between education and democracy," Senator Lee continued. "They thrive in the same atmosphere. Education means peace and democracy."

"Today this administration is making a sincere effort to solve the problems of unemployment by means of shorter hours, by means of a public works program. We are making an effort to readjust the national income by unemployment insurance, by old-age security legislation; but when the boys and girls who are students today become alumni of this University, there will be new problems for them to face, and I have faith that the educational institutions of the United States will turn out boys and girls who are able to streamline our government in order to keep it abreast of our streamline civilization, and yet not change the fundamental principles of our democracy."

Byrd Praised

Following the guest speaker, Senator Radcliffe returned the gavel to the Honorable Edwin T. Dickerson, '98, general chairman, who closed the banquet with the announcement that dancing would follow. The after-dinner program came to a close with group singing of "Auld Lang Syne."

At the opening of the program President Byrd extended greetings on behalf of the University and appreciation for the fine interest in the welfare of the institution. Following his remarks the toastmaster introduced each member of the Board of Regents present and many other distinguished guests.

Judge Dickerson, master of ceremonies, in his opening remarks lauded President Byrd for his 25 years of faithful and helpful service to the University. "The University was chartered 130 years ago and its graduates are legions. From her portals have come many distinguished men whose footsteps echo down the distant corridors of time. They have made their impress upon every vocation in life. The University is proud of her alumni and her alumni are proud of their University. Today it functions in the fields of science and the professions under the able guidance of a youthful captain of education who has given 25 years of his life in her service, whose almost altruistic interest in her welfare is bulwarked by an incomparable vitality of mind and body. I refer to the President of the University, the Honorable H. C. Byrd, whose democratic simplicity moves him to prefer to be called 'Curly' rather than 'Mr. President.'"

Group Singing

Group singing was led by Professor Harlan Randall, director of music of the University.

Many alumni came far for this stupendous occasion and so great was the impression that it is evident that all will return again next year.

The oldest graduate in attendance was Dr. W. H. Marsh, M. D., '76, from Solomons Island, Md.

Many compliments were showered upon the committee for their splendid accomplishment. There does not seem to be a shadow of doubt but what celebration of Charter Day will continue to grow bigger and better each year.

Each person on the program with the exception of Senator Lee, the guest speaker, are alumni of the University.

Compliments

The success of any endeavor needs cooperation and that tells a great story about the success of the Annual Charter Day Celebration recently held in Baltimore. While "Old Pals" were getting together, faculty mixing with the gayety of former students and everyone enjoying the "Big Apple," few were mindful of the part played by the leaders in this great occasion.

Following the banquet last year, Lieutenant-Colonel L. M. Silvester, general chairman, concluded the banquet by saying, "We must do this every year." This remark fell upon fertile ground of enthusiasm. When the school opened for 1937-38 year it was not long before the presidents of the various alumni units in the University got together and planned this great occasion. They were Dr. Robert P. Bay, '06, medical; Dr. Arthur I. Bell, '19; dental; Miss Bessie L. Maston, '20; nursing; Mr. John E. Magers, '14, law; Dr. A. A. Parker, '04, "M" Club, Dr. John J. Strevig, '12, pharmacy; and Mr. E. F. Zalesak, '25, College Park.

They immediately began to call on their various leaders in each association and the celebration was on. Their choice was wise in the naming of the Honorable Edwin T. Dickerson, '02, as general chairman and Charles W. Sylvester, '08, vice-chairman. Their choices in the membership of the various committees on the details for the celebration were likewise well done. They went further by calling on their fellow alumni in the various counties. Everyone played an important part.

The "NEWS" is confident that it expresses the sentiment of every alumnus in extending congratulations to the alumni presidents and their host of co-workers for the splendid presentation of the University of Maryland's coordinated alumni, faculty and student enthusiasm.

●

Johnson Helps Prom

Eddie Johnson, Maryland athlete and son of the famous Walter, was chairman of the Junior Prom that was held in Washington on January 27.

●

Kentucky—A letter was received recently from Kenneth Grace, '16, who is now stationed in Louisville, Kentucky. "Bill," as he is better known by his former schoolmates and track partners, is with the U. S. Federal Bureau of Investigation.

They Retire From Active Service »

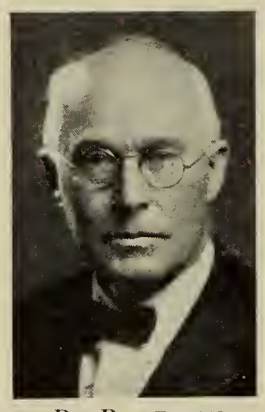
DR. MCDONNELL

PROF. PIERSON

DR. TALIAFERRO

DR. JOHNSON

PROF. SPANN



DR. PATTERSON

PROF. GWINNER

SEVEN widely and well-known faculty members of the University retired from active service this past Fall. In recognition of their long years of valuable association, their colleagues, in the spirit of fellowship, tendered them a retirement banquet on January 6, in the University dining hall. Dr. H. C. Byrd, President of the University, himself a student when many of the retiring men were faculty members, served as toastmaster for the occasion. The life and service of each member was spoken of by various colleagues.

Dr. Patterson

The faculty member having the longest service at the University was Dr. H. J. Patterson. He came to College Park in 1888 as a chemist in the Agricultural Experimental Station. From that time on he began a triumphant rise as a leader of agriculture in the State. He was made director of the experiment station in 1898 and served continuously in that position until his retirement. Dr. Patterson graduated from Pennsylvania State College. Mr. Henry Holzapfel, the oldest member of the Board of Regents in length of service, spoke about Dr. Patterson and eulogized his many years of beneficial and helpful service in agriculture.

Dr. McDonnell

The next in length of service was Dr. Henry B. McDonnell, who first came to College Park in 1891 as professor of agriculture chemistry and state chemist. He is also a graduate of the University Medical School, receiving his degree in 1888. In 1892 he was made head of the Department of Chemistry and State Chemist in which capacity he served until 1923 when he was made professor of research. Dr. McDonnell's contribution to chemistry was eulogized by one of his former students, Dr. W. W. Skinner, '95, who came to College Park the same year and today is head of the Bureau of Chemistry, U. S. Department of Agriculture and chairman of the University Board of Regents.

Dr. Taliaferro

In 1892, Dr. W. T. L. Taliaferro, a scholarly professor in agriculture, came to College Park. He was acting dean of the division of agriculture from 1915 to 1917. He is a member of na tional honorary scholarship fraterni ties, Phi Beta Kapa, Beta Theta P and Phi Kappa Phi. Dr. Taliaferr was a man who was always well in formed on practically any subject yo talked with him about and his contri bution to the welfare of students i agriculture was eulogized by Dr. T. B Symons, one of his former students now director of the Agricultural Ex tension Service.

Dr. Johnson

Dean of the College of Engineering from 1920 to 1936, was one of th nation's outstanding men in highway engineering, Dr. A. N. Johnson. Dr Johnson became dean in 1920 following an exceptionally outstanding career in highway engineering. He was a grad uate of one of the first highway en gineering courses offered by Harvard University.

In 1898 he became State Highway Engineer of Maryland, in which ca pacity he served until 1905. Dr. John son held many other outstanding posi tions including: Chief Engineer, U. S Office of Public Roads, 1905; State

(Continued on page 10)

Professor Steinberg, Dean of Engineering

With the official retirement of Dr. A. N. Johnson, former dean of the college of engineering, Professor S. S. Steinberg, acting dean, has been officially appointed dean.

Dean Steinberg came to Maryland 20 years ago as professor in civil engineering. His enthusiasm and interest in the College of Engineering, as well as many outside engineering developments, has made him one of the best informed engineers in the State today. His experience with the U. S. Roads Commission gave him a wide acquaintance with the development of the national highways.

His interest in the students has gained for him a host of admirers among the graduates in engineering. His contacts with national engineering concerns has proven quite a help in assisting students in obtaining employment opportunities.

Many new faculty members have been added to the Engineering College as the interest and demand from students has grown in recent years. New additions in buildings and equipment will be added within the next year.

The "NEWS" extends congratulations and best wishes to Dean Steinberg in his newly attained position.

●

County Agents Conference

When the annual County Agents Conference was held during the month at College Park, many alumni who are serving in the capacity of members of the Extension Service in the various counties were on the campus. Among them were R. F. McHenry, '16; S. E. Day, '16; H. B. Derrick, '17; John B. Morsell, '26; G. W. Clendaniel, '20; L. C. Burns, '23; J. Z. Miller, '28; Paul D. Brown, Wm. R. McKnight, H. R. Shoemaker, '26; John H. Carter, '26; H. M. Carroll, '20; O. W. Anderson, '24; P. E. Clark, '18; K. W. Baker, '31; R. S. Brown, '15; J. P. Brown, '16; R. T. Grant, H. W. Beggs, '28; J. W. Ensor, '33; W. G. Myers, '30; Stanley Sutton, A. A. Ady, '26, and Anna Trentham.

●

Kitty—"Gracious, it's been five years since I've seen you. You look lots older."

Cat—"Really? And I doubt I would have recognized you but for your coat."

FERDINAND

Author MONROE LEAF » »

[Reprinted by consent of *The New Yorker*.]

ONE of the strangest chapters in the history of English literature is the story of young Munro Leaf, who wrote "The story of Ferdinand," a children's book which has in fifteen months sold 100,000 copies. We might explain for the benefit of the scattered few who haven't yet read "Ferdinand" that it's a brief story (with pictures) about a bull named Ferdinand who likes to lie under a cork tree and smell flowers, and who absolutely refuses to be a party to a bullfight. Well, Ferdinand has provoked all sorts of adult after-dinner conversation. Some say he's a rugged individualist, some say he's a ruthless Fascist who wanted his own way and got it, others say the tale is a satire on sit-down strikes—you see the idea. When the *Times* printed an editorial about Ferdinand, we realized that it was time to look up Mr. Leaf and get to the bottom of the matter.

"Screwball" is Mr. Leaf's word for the notion that his little tale has any social or political implications, and he ought to know if anybody does. He told us all about his background, how he came to be a writer, and how he came to write "Ferdinand." The background includes *the University of Maryland* and Harvard, several years' service as a preparatory-school instructor, and finally his present job with the publishing house of Frederick Stokes. He's now thirty-two, married, and childless. "Ferdinand" was his fourth book for children. The preceding three—"Grammar Can Be Fun," "Robert Francis Weatherbee," and "Manners Can Be Fun"—were illustrated, in an untutored way, by the author himself. "Ferdinand," however, was written to provide a scenario for the illustrations of Robert Lawson, who is pretty well known outside the juvenile field as an etcher. It took Mr. Leaf just forty minutes to write "Ferdinand." He sat down one rainy Sunday afternoon in October, 1935, without a trace of an idea for a plot. "But the minute I thought of a bull, I could see the whole story," he told us. "He wouldn't do what he was expected to do." The finished MS., written in longhand, covered two sheets of typewriter paper. Mr. Leaf made one correction—in the next-to-the-last sentence changed the word "yet" to "still."

Sales of "Ferdinand" reached seven thousand this last Christmas week, running slightly behind Dale Carnegie and well ahead of Eleanor Roosevelt. Strange reverberations, entirely unconnected with the field of juvenile literature, continue to reach Mr. Leaf's ears. An angry lady wrote him from California berating him for making fun of Spain's national sport in these troublous times, and from the same state came word that Santa Barbara was entering a fifty-foot Ferdinand in the Tournament of Roses parade. Ferdinand is the hero of a WPA marionette show, and Mr. Leaf has been reliably informed that a certain rear admiral, U. S. N. (retired), is illuminating a copy of the book for his unborn grandchild. Walt Disney is making a Silly Symphony of the story, thus opening to the Messrs. Leaf and Lawson (who go fifty-fifty on the proceeds) an attractive vista of royalties from Ferdinand—toys, pottery, clothes, and what not. Mr. Leaf is under contract to the *Ladies Home Journal* to write a children's page. Meanwhile, "Noodle," his fifth juvenile, published only three months ago, has already reached twenty-five thousand. What a career!

●

Colonel Silvester Visits Campus

During the Christmas holidays, Lieutenant-Colonel L. M. Silvester, former president of the "M" Club and chairman of the anniversary banquet held last year in Baltimore, visited the campus. Colonel Silvester, now stationed at Fort Benning, Ga., was formerly located in Washington and then Camp Meade for about five years. He has always had a very keen affection for his Alma Mater but during his term of duty in such close proximity, he became even more attached and loyal to its eadeavors.

While visiting the campus he saw for the first time since its presentation, the picture of his uncle, Captain R. W. Silvester, the man whom he had heard so much about as a great leader in the trying days of the reorganization of this institution.

Colonel Silvester never misses a chance to get back to the old campus and keep fresh the many friendships he has made.

Boxing Team Surprises

ALTHOUGH GAINING a surprising and highly pleasing 4-all draw with Duke in the opening match, Maryland's boxing outlook remains none too bright. It was a great feat for so green a team and shows that coach Heinie Miller and his aides are doing an excellent job, but they need added material to reach a winning status.

Bob Bradley, 125, Benny Alperstein, 135, Ed Lloyd, 175 and Joe Henderson, heavy, were encouraged with the victories that netted the tie, but in the cases of the last two it was a matter of rookies beating novices.

However, it was the showing of three defeated boxers that gave more encouragement than some of the victories. George Dorr, 115, Newton Cox, 155, and Dick Johnson, 165, lost to a trio of Duke's ace scrappers but displayed much latent ability in close encounters. Bobby Price, a three-year veteran, had little on Dorr, Wilton Mann, another senior scrapper, just did edge out Cox, while Johnson, though stopped by Swede Vincent midway of the third round, almost had the Blue Devil slugger out at one time.

In only one bout was Maryland outclassed and that was the one in which Tom Coleman gave way to Danny Farrar, Duke's star welterweight, early in the second round. Farrar, doubtless the best scrapper in the Southern Conference this year, was 1937 runner-up for the National Collegiate Title. Just to illustrate the power of Duke's four stars, Price, Farrar and Vincent have won all their three bouts this year while Mann has won two and dropped a close decision.

So Maryland's showing, although it does not presage a winning season, is proof that great strides are being made with willing recruits.

●

Sad Fistic Phase

Maryland's inexperienced boxing team has one really sad situation. Nathan Askin, probably the second best scrapper on the squad, is in the same class as Benny Alperstein, the National Collegiate 135-pound champ. It seems that Askin, who is all bone and muscle, can't get down to the 125-pound limit, nor can he reach the weight of a 145-pounder no matter how generously he puts on the feedbag. And Alperstein, a natural lightweight, is in the same boat. No wonder Coach Heinie Miller weeps.

●

Married—The former Terrapin, now of national baseball fame, recently stepped into the matrimonial world. Charlie Keller and Miss Margaret Williams were recently married in Baltimore. Charlie has attracted considerable attention among the followers of the great diamond sport due to his exceptional ability with the bat.

Basketeers Hitting Stride

MARYLAND'S rapidly improving basket-ball team was boasting a record of four wins and as many losses as the student body took time out from everything else to battle the mid-year exams.

The Terps, who have won four of their last six games, beat Duke, 40 to 35, in their last pre-exam period start and this gave them a two-all record in their Southern Conference standing.

Evidence of Maryland's advance is told in the fact that it lost to Richmond U. in its first game and that three days before coming to College Park, Duke decisively defeated the Virginians.

Charlie Norton, sophomore center, who is becoming smoother with each game, has been the spark-plug of Coach Shipley's outfit. He made 20 of the 40 points that were scored against Duke.

Waverly Wheeler, a senior, and George Knepley, a junior, have played the most consistent basket-ball of the other 10 on the squad.

As only eight of the 15 teams in the conference qualify for the little tourney at Raleigh, the battle for places is keen. Maryland has six more conference games on its schedule—with North Carolina, Duke, Virginia Tech, Washington and Lee, William and Mary and V. M. I.—and if it can win half of them should get into the championship affair. All are at College Park, except the first two mentioned.

If all of the Maryland basketers survive the exams the team should move along in spirited fashion for the rest of the campaign, but the loss of one key player could easily throw the quint into low gear.

Active In Indoor Trac

MARYLAND track athletes will s action in at least four big indo meets, with the climax coming wh the Terps and Fifth Regiment ho their second annual affair in the b Baltimore Armory on Saturday nigh March 5.

This joint presentation proved a su cess last year and it is expected to e pand in interest and caliber. Col. Fra Hancock of the Fifth Regiment aga is serving as chairman, with Gea Eppley, Maryland Athletic Director, vice-chairman. They, of course, will aided by such other capable comm teemen as those who worked so effic ently last year to present a well-ru set of games.

Virginia won the collegiate troph last March, with scholastic honors g ing to Mercersburg and the Marylan freshmen scoring in the A.A.U. sectio

Previous to their own games, th Terps will be represented in the Mil rose and New York A. C. meets in Ne York on February 6 and 20, respectiv ly, and will send a delegation to th Southern Conference title competitio at Chapel Hill on February 27.

Maryland will have relay teams i both the New York meets with Ji Kehoe or Mason Chronister running i some special middle distance. Eac probably will race once in a "Special with the one not in the individual te filling a place in the relay four. Bi Theis, Alan Miller and Frank Croni are the other leading relay aspirant The Terp quartet promises to be on of the best Maryland has had in years

It is hoped that all alumni will ge back of the Baltimore meet and help t build it into one of the premier affair of the country. Certainly this sectio should welcome and support a big an nual track attraction.

●

Toils to Aid Running

Bill Thies, University of Marylan 220 and 440 runner, toiled on a South ern Maryland tobacco plantation las summer in order to keep fit. His only remuneration, outside of plenty o good exercise, was board and lodging Now Bill, who was ill and off form during the last track season, rates a place on Maryland's indoor relay tean and to do big things outdoors nex spring.

Boxing Tournament Returns

MARYLAND, which played host to the Southern Conference boxing tourney for the first time last year by walking off with the team championship, again will handle the event this year.

The tourney, slated for February 25 and 26, will find the best boxers from at least eight squads in competition for the eight individual crowns.

Duke, runner-up last year, North Carolina, North Carolina State, Clemson, South Carolina, The Citadel and Virginia Tech are others of the fifteen conference schools, in addition to Maryland, which support boxing.

It also is possible that V. M. I., which conducts boxing as an intramural pastime, may enter two or three of its leading products.

The tourney this year appears to be completely wide open and each school has a star or two but none has a cluster of them and any squad capturing two individual crowns will have a grand chance to gain team honors.

South Carolina at present seems to have the best balanced outfit, with veterans in six of the eight jobs.

With the experience of 1937 to profit from, Maryland hopes to be smoother on the various details than last year. The scale of prices, especially for first day bouts, doubtless will be of more popular appeal than last February. The 1937 tourney was a success from all angles but the 1938 event should excel from some standpoints.

●

Student Aid

For the aid of seniors in search of possible employment following graduation, the Electrical Engineering Department, under the guidance of Professor Myron Creese, head of the department, has compiled a booklet of its graduates containing information desired by personnel managers of many large companies. This booklet, gives one full page about each senior with his picture, his average grades, courses of study, extra-curricular activities, etc. A sufficient number of the booklets have been completed to send one to at least one hundred different companies.

Compliments go to those who have contributed to this idea as it should prove of considerable help to the students.

From Colonel Saunders, in the Philippines

DEAR ROSEY,

This letter is being written at the tail-end of a typhoon that passed near by giving us buckets and buckets of rain, instead of a steady downpour to which we have become inured since we landed on the 3rd of July, last. As a kid, I was always impressed by the story of the Flood with its rain for forty nights, but we have had more than ninety days and ninety nights of rain since we arrived and in excess of ninety inches of rainfall. However, everyone seems to keep going—rain or not. I suppose it is true that one can become accustomed to anything except hanging. Anyway, the rainy season is just about at an end, so I am told.

The July issue of the ALUMNI NEWS was a great treat to me out here, especially that letter from Kuala Lumpur, Federated Malay States, by P. L. Peach, '03. I am planning a trip, that is, if it materializes, will take me down the coast of Borneo and then to Bali and Java and home by the way of Singapore and the Malay States and Indo-China. I have a desire to see the Hindu-Javenese ruins of Barabudur in Java and then compare them with the ruins of Angkor in Cambodia, Indo-China. It has been said that the Barabudur ruins must have been in their first-class condition, more costly and imposing than the Pyramids and, by some, are considered as superior to those at Angkor. If I do get away on that trip, it will add interest to look in on an old Maryland man who left College Park just before I went there for the first time. Kuala Lumpur doesn't seem so very far away out here.

It was interesting to note in your July issue how Maryland co-eds seem to be coming to the Far-East and Near-East, also, as evidenced by such addresses as—North Szechnow Road, Shanghai (Mrs. L. Kind Quan) and Ram Allah, Palestine (Miss Haviland). I don't know either of them, but it does give one a friendly feeling to know there are some others out here who have been at and have known the old College Park sights and scenes.

Incidentally, I ran into a Dental College graduate, about 1911 I believe, at a party at the Army and Navy Club here in Manila—Daniel Bratton, Major, Dental Corps, formerly of Elkton, Cecil County. We had never met before, but some way he had learned I was a Maryland man and as soon as the hostess introduced us he opened up on Maryland, and we swapped stories at a great rate.

Well, I presume I must bring this to an end. I especially remember the pleasant evening I spent with you and your family just before I sailed in May and I told you then that I would let you hear from me sometime. I suspect you didn't expect to hear to the extent of the many words I have loosed above.

Best regards to all.

I am most sincerely,

O. H. SAUNDERS, '10.

●

Editor Now Fighter

Carl Humelsine, Hagerstown, Md., lad, who aspires to land the 175-pound job on Maryland's boxing team, is making his first bid in athletics in his fifth year in college. Humelsine, who is taking graduate work, was editor of the Diamondback, the Maryland student paper, during the 1936-37 term. He's not yet ready to admit that the pen is mightier than the fists.

They Retire from Service

(Continued from Page 6)

Highway Engineer of Illinois, 1906-1914; author and member of national research boards, delegate to the Pan-American Road Congress in Buenos Aires in 1925, and in 1933 he received the Bartlett award for the outstanding contribution to highway progress.

Dr. Johnson's great contributions to the profession of highway engineering and his service to the College of Engineering of the University were lauded by his associate and successor in the position, Professor S. S. Steinberg, new dean of the College of Engineering.

Professor Gwinner

Professor Harry Gwinner came to College Park as instructor in mechanical engineering in 1895. He was made social professor in 1898 and a full professor in 1900. In 1929 he confined his instruction to engineering mathematics. He was known by many of his former students as a friend and a fine fellow and in speaking of him in more friendly terms his former students referred to him as "Our Friend," "Pop" Gwinner. Dr. T. H. Taliaferro, Dean of the Faculty, spoke of the achievements and contributions of Professor Gwinner in his teaching of engineering mathematics.

Professor Pierson

The Departments of Entomology and Zoology first received the services of Professor C. J. Pierson, a man who has given a life's work in the interest of his profession, in 1916. No student who has ever been in the department of zoology could forget the seriousness with which Professor Pierson taught the fundamentals of the zoological study. A fellow colleague, Dr. Robert E. Snodgrass, nationally known authority on "insect morphology," spoke about the many contributions Professor Pierson has made during his life in the interest of the study of morphology.

Professor Spann

Professor James T. Spann entered the Engineering Department of the University as instructor in mathematics in 1917, and a year later he was made assistant professor. Professor Spann has taught mathematics continuously since he arrived in College Park. He was a great enthusiast about chess and through his good fellowship he had made many friends on the campus. Dr. Thomas H. Taliaferro gave very complimentary remarks about the valuable teaching of Professor Spann in engineering subjects.

Personal Pencilings

The Glee Club—Arrangements are being completed for appearances of the University's Glee Club at Bel Air, Md., on February 18, and Salisbury and Cambridge, Md., during April.

O

Birth—Mr. and Mrs. A. David Gomborov announce the birth of a seven and a half pound son, Barry Lee, born Christmas Day. Mrs. Gomborov was formerly Miss Estelle P. Williams. Mr. Gomborov received his Bachelor of Arts degree in 1930, and both proud parents received their Bachelor of Laws degree in 1933. This family of lawyers, real and potential, is living at 3003 Ferndale Avenue in Baltimore.

O

Physician—Out in Frankfort, Indiana, a graduate of the University in the class of 1929, W. L. Hammersley, Jr., D.D.S., is practicing oral surgery and child dentistry. Hammersley is associated with his father, a graduate in medicine, class of '98, who is a practicing physician and surgeon.

In his school days, young Hammersley was editor of the Diamondback. He paid the campus a visit last fall while on a short vacation through the east.

Philadelphia Meeting

On February 15, at 6:30 o'clock at Stouffer's Cafe, 1526 Chestnut Street, the Philadelphia Group of the Alumni Association will hold their Mid-winter dinner. Pres. A. Moulton McNutt will preside and there will be interesting talks about the University and its activities. All Alumni invited.

●

Business

Big business begins to loom in College Park with the inauguration of the Berger-Tippett Real Estate and Insurance Business. "Bozey" Berger, '32, of all-American basket-ball fame, a gridiron and diamond star and today a professional baseball player hooks up with Howard Tippett, '28, to serve the people of Prince George's County.

The company will handle all types of insurance as well as any kind of real estate.

Howard Tippett has had considerable experience with the HOLC and is in a good position to convey to his clients helpful information. Congratulations and best wishes for their success from their fellow alumni.

Married—The A. O. Pi sorority house was the scene of another wedding when Miss Eunice Lucille Miller, '36, of Baltimore and Mr. Wayne Phillip Ellis of Philadelphia were married on December 30. Rebecca Miller, sister of the bride, was maid of honor. Other attendants were Miss Jane Miller, Susan Miller of Beltsville, Miss Burnice Ellis, sister of the bridegroom and Miss Muriel James of Chevy Chase. The best man was Mr. John Taylor Fisher, '33, and a member of Delta Sigma Phi, the same fraternity of which the bridegroom is a member. Richard Lutz, '36 and Joshua I. Miller, a freshman at the University, were ushers at the wedding. The bridegroom is employed as a research chemist in the duPont laboratories in Wilmington, Del.

O

Engagement—Announcement of the engagement of Dorothy Hobbs, '38, and Richard A. Maurer. '37, has been made. Dorothy is a member of the honorary society, Mortar Board, secretary of the student government and vice-president of A. O. Pi sorority. "Dick" is in Philadelphia, where he is employed by the Burroughs Adding Machine concern.

O

Birth—Mr. and Mrs. Eugene J. Roberts announce the birth of a 7-lb. girl, born October 4, 1937. Mrs. Roberts was formerly Miss Louise Crosby of Washington, D. C. "Eugene" is now a patent attorney associated with the Westinghouse Electric and Manufacturing Co. He received his law degree from Geo. Washington University.

The Roberts reside at 5512 2 St. N.W., Washington, D. C.

O

Telephone—The new manager of the Towson, Md., offices of the C. and P. Telephone Co., is Robert T. Settle, '30. "Bob," a Sigma Nu, has been with the company since graduation.

In 1931 he married Miss Mary Anne Bucheister, of Marlboro, Md., sister of George, '23, and "Gus" Bucheister, '24. Gus now is married but George still is on the loose.

O

Birth — A baby girl named Linda Mary arrived this summer in the home of Mr. and Mrs. Ralph George Shure of Takoma Park, Md. Mrs. Shure was formerly Miss Helen Hitsenhoff of Chicago University. Ralph, a Delta Sig, in the class of '32, has, since graduation from Maryland, received his LL.B. degree from Georgetown University. He now is a practicing attorney in Takoma Park. In his undergraduate day, Ralph was a star performer of the Cross Country team.

Dr. Robert E. Snodgrass, a member the Department of Entomology Fac-ty, became the third American in re-nt years to be taken into Royal En-omological Society of London. Dr. nodgrass has been a lecturer in the niversity Faculty for the past ten ears. He is a nationally known au-ority on "Insect Morphology."

o

Married—George Luckey, '23, a form- gridiron standout, stepped into the atrimonial world September 1, when e married Miss Clarice Self, of Fred-icksburg, Va. They were married in ie Chapel at St. Albans, Washington, . C. Morrison M. "Tater" Clark, '21, as best man. The newlyweds will re-de in Washington.

o

New Course—With the beginning of ie next semester, new courses in psy-iology will be given at College Park y Dr. John G. Jenkins, new head of ie department. Dr. Jenkins, formerly ith Cornell University, will introduce new course, "Applied Psychology," pen to upper classmen. This subject ill deal with the application of the rinciples of psychology in profession- or business work.

o

Muscians—While other Maryland udents were lazily spending their mas holidays in the U. S. A. "the arylanders" campus dance band was eaming across the Atlantic to Paris oard the French liner "Normandie." irector of the band was Sam Mc-arlane.

Zerkel Returns To Real Estate

An announcement recently appeared in the Page News and Courier, of Luray, Va., that Ferdinand Zerkel, '06, has returned to his personal real estate business. For four years Zerkel has been with the Government, Park Expansion and Resettlement Projects, in Virginia. His particular duties were given to directing the optioning of about 60,000 acres of land in the Shenandoah National Park area in Virginia. Zerkel, the Secretary of his class, was also a major in the cadets and manager of football in his college days. His support and enthusiasm in the Alumni Association has been constant since graduation.

o

Furniture—Mason H. Hopwood, '26, is a partner in the Hopwood Furniture Company, located at 8th and New York Ave. in Washington. Mason was manager of basket-ball in his college days and a member of Delta Sigma Phi. He resides at 101 South Brooklane, Bethesda, Md.

o

Married—James W. Shipley, '36, a grad in the College of Engineering, married Miss Elinor Vawter, of Laurel, Md., at the home of the bride on January 13 last. Mrs. Shipley is the sister of James Vawter, '36, now an employee in the University Purchasing Department. The newlyweds will make their home in Harmans, Md.

o

Co-eds—Last month the co-eds held a dance at Margaret Brent Hall called "Maggie's Drag." It was the girls who made the dates, sent the corsages, called for the boys and cut at the dance. Naturally a most enjoyable time was had by all.

The dance was given for the benefit of Xmas baskets to assist in the campus drive to make a better Xmas to those people less fortunate.

o

Grand Reunion—Do not forget a grand reunion of all grads on Alumni Day, May 28, in honor of Melvin C. Hazen, '88, first president of our Alumni Association. Mr. Hazen will be celebrating the fiftieth anniversary of his graduation from our Alma Mater.

It's a Maryland Tradition!

After the game, in the evening, at lunch, at any and all times Marylanders get together you'll find them at the Varsity Grill—newly renovated. Your school spirit cannot be par until you are a regular patron.

FEBRUARY 1938

MARYLAND ALUMNI NEWS

College Park, Md.

"Gee, Mom, Were They All Poor People?"

"Not exactly poor, Bobby. They had money. But they didn't have all the nice things that we have—such as a radio, and electric lights, and a vacuum cleaner. You see, they didn't have electricity, or automobiles, or airplanes. Most of those things hadn't even been invented."

EVEN as late as 1900, only one American home in every seven had a bathtub; one in 13 had a telephone; one home in 30 had electric lights. There were only 8000 automobiles. Manufactured products were scarce and expensive.

Today there are 20 million bathtubs, 18 million telephones, 22 million wired homes, 25 million automobiles, and millions of other manufactured products which were unheard of in 1900 but are now plentiful and sell at a fraction of their former cost.

General Electric scientists and engineers, by applying electrical methods to the tasks of industry, have helped to provide us with the many products that contribute to our comfort and convenience, and to the hundreds of services which we enjoy today.

G-E research and engineering have saved the public from ten to one hundred dollars for every dollar they have earned for General Electric

Cover Picture

Calvert Hall needs no further introduction to those Alumni who spent some of the happiest days of their lives within its walls. It was built in 1914, two years following the burning of the Old Barracks. Dedicated to commemorate the memory of Dr. George B. Calvert, a man who gave his untiring efforts to establish the College Park school of the University in the interest of the development of Agriculture. The building stands as a constant reminder of his great work.

More pleasant memories can probably be recalled by Calvert Hall than any other building on the campus.

●

Birthday Congratulations

The following remark came forth from a youngster in College Park, when an alumnus commented on Dr. Byrd's birthday February 12: "That makes two great Presidents born on the same day—Lincoln and Dr. Byrd," said the youth.

Dr. Byrd was born near the seafood capital of the United States, the renowned Crisfield, Md. In his late teens, he crossed the Chesapeake Bay and became a student in the College Park schools of the University. His triumphant rise ever since has been remarkable and picturesque to review.

By a tenacious spirit, he broke into the game of football, became captain of his team, was valdictorian of his class, returned to his Alma Mater as an instructor in English and director of Athletics, was assistant to the President, appointed Vice-President and today is President of his Alma Mater, all in a span of thirty years. He is held in the highest esteem by his fellowmen as an eminent son of Maryland.

On behalf of the Alumni Association the "News" extends congratulations.

Married—Robert P. Straka went to Ames, Iowa, to find a wife. On December 23 he married Miss Ruth Confare of Iowa. "Bob," a graduate in Bacteriology, was transferred from Washington to Ames for special work in the U. S. D. A.

University Receives Portrait Of Dr. Regester

In commemoration of his ideals, the University has received a portrait of the late Dr. Samuel Regester, D.D. and LL.D., president of the College Park Schools from 1869-1873. The portrait of Dr. Regester was presented by his son, Mr. Samuel Regester, '76, a prominent attorney of Richmond, Va.

Dr. Regester was a southern Methodist minister at the time he was president. He was originally born on the Eastern Shore, Md., but spent most of his life in Virginia.

The donor received his LL.B. degree from the University of Richmond in 1895, and he has practiced law in Richmond ever since. Mr. Regester has the distinction of being one of the oldest living Alumni and was the oldest in attendance at the Homecoming last year. He plans to attend the next 28 Homecoming reunions. He now is 81 years old.

On behalf of the Alumni Association, the News expresses congratulations for Mr. Regester's noble gift to the University.

●

Outstanding Alumni

When a tabulation of historical personage was recorded by the *Dictionary of American Biography*, it was found that the University of Maryland Alumni had attained a high rank for their Alma Mater among American universities. With 38 noteworthy men to its credit, the University ranks above many well-known and older institutions.

This comparatively new publication which began in 1926 contains the most selective list of outstanding men of all periods who have made some significant contribution to American life in its manifold aspect. The *Dictionary* has endeavored to re-create and reinterpret the lives of the makers of American life and culture.

The *Dietionary* owes its beginning and existence to the public spirit and generosity of the *New York Times*.

●

Rifle Drill

Maryland coeds are devoting serious drill in preparation for the Women's National Rifle Honors competitions. There are many aspirants for the team which is being coached by Sargeant Uhrinack, a member of the military department.

With The Oldest

DR. J. F. B. HYDE

◇

Sixty-three years ago a young man by the name of John Francis Bird Hyde, '75, received his diploma from the College Park Schools of the University of Maryland, then known as the Maryland Agricultural College.

Mr. Hyde was born December 5, 1854, at West River, Md. Today he is 83 years old and is enjoying remarkably good health.

His early education was received by attending private schools. He entered the College Park Schools in 1871 and graduated in a class of four, of which he is the only surviving member, in 1875.

The enrollment at that time only totaled about 125 students, which is less than the number attending some classes today, out of a student body of 2600.

In 1882 he married Miss Florence Bird and in 1932 they celebrated their golden wedding anniversary. Since then Mrs. Hyde has passed away. Today Mr. Hyde makes his home with his daughter, Mrs. Charles B. Bishop of Baltimore.

Went West

Following graduation, Mr. Hyde went west and taught school at St. Clair County, Ill. Later he returned to Maryland and took over his father's farm.

A year later, his college contacts drew him into the harness business with Lerch Brothers of Baltimore. He was in this business for more than 35 years and retired in 1923 after serving as secretary-treasurer for a number of years.

Mr. Hyde says that military training was the paramount issue when he was a student with a seemingly scant attention being given to Agricultural studies.

Attends Reunion

Today, he marvels at the great developments of the University which began with one building at College Park and now has more than 30. The last Alumni reunion attended by Mr. Hyde was in 1931. We look forward to his visit this June.

Declines New York Appointment

Harry D. Watts, '04, vice-president of the James S. Stewart Co., Inc., has turned down a proffered appointment by Mayor LaGuardia as Commissioner of the new city Department of Public Works, which has an approximate two hundred million dollar program.

Mr. Watts, when asked about the report, confirmed the fact that the Mayor has offered him the post.

One reason he declined, he said, is that the Stewart company is doing work for the city on several projects which will come under the Department of Public Works and he felt it would be embarrassing for him to have supervision over these projects.

Back in his college days Mr. Watts was known as "Major Harry" the athlete, military and social leader. He was captain of football in '03 and president of the traditionally famous Rossburg Social Club.

Harry hails from Bel Air, Md., and is an eminent Alumnus, with a true display of the Old Line spirit.

He was a member of the class of 1904, and is a graduate of the College of Engineering.

●

Highway Engineers

In cooperation with the Maryland State Roads Commission, the College of Engineering recently held the second Annual Highway Engineering Short Course at College Park.

More than one hundred highway engineers attended the ten-day session during which time they heard lectures on practically every phase of highway engineering by some of the most outstanding men in the country.

New Faculty n Psychology

Dr. John G. Jenkins, recently appointed head of the extended department of psychology, is inaugurating t the University one of the few departmental programs in the country riented exclusively in fields of applied psychology.

The program will be developed along our lines, including the general field f personnel, educational psychology, ental hygiene, advertising and market research.

Dr. Jenkins has been connected with niversities for fifteen years, his most ecent position being that of professor f psychology at Cornell.

He has served in a consulting capacity to several commercial organiations in the field of market research, hrough his connections with the Psychological Corporation in New York ity, a national organization of psychologists.

●

American Society Honors Dr. Warfel

"The American Mind," an anthology f American Literature, edited by Dr. arry R. Warfel, professor of English College Park, and Professors Gabiel nd Williams of Yale University, was udged by the American Society of raphic Arts to be among the fifty est books of 1937.

Although the award is made on the asis of typographical and mechanical xcellence, the authors share in the raise for theirs was the original design of the book.

Widely acclaimed throughout the nation, "The American Mind," published te in August, has already been lopted as a standard text book by ore than 100 colleges and universies. The book is used at Maryland in Survey of American Literature."

●

n And Out

With the beginning of the second emester the University admitted 95 ew students. At the same time 102 udents were dismissed for failure to eet the minimum scholastic requirements. The number of new students lmitted was the largest for the beginning of the second semester in history of the University. The College ark total now reaches 2,654 students.

Our History Makers

By GEORGE FOGG, '26

The Dictionary of National Biography has recently completed in 20 volumes the biographies of the men who have made American History from the Colonial Period to the present. Included in its rolls are 38 graduates of the University of Maryland. The ALUMNI NEWS will give from time to time biographical sketches of these men which our Alma Mater has trained.

◆

Horatio Gates Jameson—1774-1855

This ambitious man, who accounted for a great deal of Baltimore's fame as a medical center in the first half of the nineteenth century, was born in York, Pa., in 1778. He received an M.D. degree from the University of Maryland in 1813. One of his first assignments was as surgeon to the Army in the war of 1812. After the war he became surgeon to Baltimore Hospital and consulting physician to the Board of Health.

In order to carry out certain personal theories in regard to medical education he founded and became the first president of Washington Medical College in 1827. This institution eventually merged with the University of Maryland. Jameson also was the first president of Ohio Medical College, Cincinnati. After one year there he returned to Baltimore. His fame as a medical pioneer was such that he was the first American ever invited to address the International Medical Congress. He was also made a member of the Philosophical Societies of Berlin and of Moscow

His writings consist of four published volumes on medical subjects and the editorship of the *Maryland Medical Recorder*. He died in New York City August 24, 1855.

●

Phi Kappa Phi

Five seniors, one from each college, were elected into Phi Kappa Phi national honorary scholastic fraternity at their fall meeting.

Only the student having the highest average in his college is eligible for membership.

Those students were: in Education, Shirley Donforth of Riverdale; in Arts and Science, Alex Brodsky of Baltimore; in Engineering, John Andrews of Baltimore; in Home Economics, Letteta Burrier of Baltimore; and in Agriculture, Bernice Grodjesk of New Jersey.

Pharmacy Alumni Midwinter Dance

Headed by Dr. John A. Strevig, '12, president, the Alumni Association of the Pharmacy School held their annual midwinter supper and dance February 10 at the Maryland Casualty Club in Baltimore. It was a delightful occasion, attended by more than 500 alumni and friends.

The dance was held in the main ballroom of the club to the music of Jack Lederer; the supper was served in the spacious dining-room of the club.

On the receiving committee with Dr. and Mrs. Strevig were Dean and Mrs. Andrew J. DuMez, of the School of Pharmacy, and Dr. B. Olive Cole, '12, secretary of the Association. Many other dignitaries of the pharmacy profession were members of the committee.

Among the guests was Dr. C. E. Wich, a member of the class of 1882, the oldest alumnus present and one of the oldest living graduates of the Pharmacy School.

●

Kinghorne in Costa Rica

J. W. Kinghorne, '11, went to Costa Rica in December to act as judge in the National Exposition Poultry Show. There he met Senor Rafael Chavarria, '27, a graduate in the College of Agriculture, who now is with the National College of Agriculture in Costa Rica. Kinghorne reports a most interesting and beautiful country inhabited by hospitable people. "Baldy," as his schoolmates call him, is a well-known authority on poultry, with the distinction of being the first student to present a thesis on poultry work in the College of Agriculture of the University.

Miss Yen Speaks To Mortar Board

A Chinese aviatrix, Miss Hilda Yen, spoke before the recent meeting of the University Chapter of Mortar Board on the present day Chinese situation. Miss Yen originally came to the United States to study Child Welfare as well as to learn to fly a bombing plane. On her return to China she will become a member of Madame Chiang Kai-Shek's women's aviation corp.

Miss Yen is the niece of the foreign minister of the Chinese Central Government and her father is a prominent surgeon and Red Cross leader in Shanghai.

Fellowships Offered

In cooperation with the Bureau of Mines, the University of Maryland is offering three fellowships for research in the field of engineering and applied science.

The fellowships start July 1 and continue for twelve months, including one month for vacation. Payments for the fellowship amount to $600 a year.

Fellows may register in the University graduate school and become candidates for the degree of Doctor of Philosophy. All research work will be done at the Eastern Experiment Station of the Bureau of Mines, recently completed on this campus.

Two fellowships in chemical engineering are being offered by the University of Maryland next year. These fellowships will pay a stipend of $500 a year and will require residence at the University from September to June.

Applications with a certified copy of the applicant's college record, photograph, statement of technical and practical experience, and reference letters from three persons, such as instructors or employers, will be received up to April 1, 1938.

Applications should be addressed to: Fellowship Committee, Eastern Experiment Station, Bureau of Mines, United States Department of Interior, College Park, Maryland.

●

Dr. Thompson Succumbs

Dr. Millard Filmore Thompson, '79, a graduate of the Dental School, was one of Washington City's prominent physicians. He practiced medicine in southwest Washington for more than fifty years. He got his Medical degree in 1884 from the Old Columbian College of Washington. It was his distinction in being the third oldest member of the District of Columbia Medical Association, as well as being a member of the American Medical Association.

Dr. Thompson devoted much of his life to civic affairs and was an active member of several fraternal organizations. He was an ardent supporter and member of the Sixth Presbyterian Church, serving as an elder for many years. Earlier in the month, the church had tenured Dr. and Mrs. Thompson a reception on their fiftieth wedding anniversary. He is survived by his widow, a son and a daughter.

REAR ADMIRAL

PERCIVAL S. ROSSITER
SURGEON GENERAL, U. S. NAVY

Rossiter Promoted

Percival S. Rossiter, M. D., '95, formerly acting Rear-Admiral of the Navy, has been made a permanent Rear-Admiral upon the recommendation of the Navy Medical Corps Selection Board and Presidential approval. Admiral Rossiter is the surgeon-general of the Navy, the post to which he was appointed in 1933 and reappointed in 1937.

A native of West Virginia, he came to Maryland in 1891 and entered the Medical School from which he graduated with honors in 1895. He served with the U. S. Army in the Spanish-American War, following which he was made assistant surgeon in the Navy from Maryland in 1903. He has the distinction of being the sixth surgeon-general of the Navy to come from the Old Line State.

He served in the World War as senior medical officer at the Naval Training Station, Yerba Buena Island in San Francisco Bay. Later he was on the staff of the commander of the Naval Transport Service.

His reappointment as surgeon general broke a Navy precedent not to reappoint bureau chiefs, but because of his familiarity with the New Naval Hospital project, it was felt that his services were needed to direct initial stages in the building of the new institution. He will reach retirement in November, 1938, at which time his services will end because of the statutory retirement age.

Marine Gunner

Marine Gunner Olin L. Beall, '17, U. S. M. C., now is stationed at Camp McDougal, Hilton Head, S. C. He is there as a part of a newly organized camp for testing of three-inch guns. Following a three month trial at this camp, he will then be transferred to the West Coast.

Since leaving Maryland, Beall has seen service in France during the World War and since then has been in England, Germany, Italy, Switzerland, Ireland, Belgium, Spain, Morroco, all South American countries as well as the West Indies. Beall believes in the slogan, "join the marines and see the world."

During part of his tenure of duty in Haiti, he was granted a leave of absence to assist the Haitian Government in training of their National Troop. He continues to see the United States and frequently touches Canada and Mexico.

●

"M" Club Board Meets

The Board of Governors of the "M" Club held their annual mid-year meeting this month, Dr. A. A. Parker, '04, president, presiding. Interesting discussions were held on making a distinction between active and inactive members according to the payment of dues. The committee on life membership reported several paid up members and proposed several plans by which more could be procured.

The usual procedure of presenting certificates at the time of graduation was revised and the plan now is to present "M" Club certificates at the first annual meeting of the club following commencement. The matter concerning "M" Club lapel pins was referred to the secretary to be worked out. Any member desiring a pin should communicate with Dr. E. N. Cory, secretary, College Park, Md.

By motion, the club again offered the "M" Club trophy for the University of Maryland-5th Regiment indoor track meet to be held March 5 in Baltimore.

A very interesting discussion was held on how the club and the University could better coordinate their efforts toward creating more interest in athletics at the University by those former athletes. This it is felt would produce more active members in the "M" Club. Definite plans will be worked out and presented at the annual meeting.

University Beneficiary of Generous Gift in Interest of Agriculture

BECAUSE of his interest in agriculture Mr. Charles E. McManus, president of Crown Cork and Seal Company, presents his modern and elaborately equipped farm in Baltimore County to the University, according to the announcement by Pres. H. C. Byrd. The farm is located near Cockeysville, Maryland, and is claimed to be among the best equipped farms of today. For many years it has been a show place in Baltimore County.

It is not likely that the University will maintain the same farming operations, but will gradually curtail these and move what equipment and live stock needed by the experiment station to College Park. Any financial return derived from the disposition of surplus stock will be used to purchase laboratory equipment, according to remarks by President Byrd.

Mr. McManus since boyhood has always been intreested in farming and farm life, not solely as a hobby but as a business as well. He has always stressed the use of the most advanced scientific methods on the farm. The poultry operations on his farm were probably the most modern and extensive in the country. His experiments, while not always profitable, did give a splendid opportunity to prove his theory in the arts of farming.

In his remarks about the gift, Dr. Byrd said: "It is estimated the financial return in one way or another will be approximately $1,000,000 in value and saving to the University."

Mr. McManus when asked about the gift remarked as follows, "As far as I am concerned and as far as any influence I have can be exerted, industry should cooperate more closely with agriculture, because it has been clearly demonstrated in the last few years that industry, to be successful, must look to the purchasing power of the farms. The purchasing power of the farms can be maintained only through a successful and prosperous agriculture." Dr. Jull, Head of the Poultry Department of the University, comments on the great assets the gift is to the poultry industry.

Spring Hills Poultry Plant

"Mr. Charles McManus, through his magnanimous grant of the Spring Hills poultry plant to the University of Maryland, has proved to be a benefactor not only to the University, but also to the poultry industry and agriculture in Maryland," says Dr. Jull, head of the Poultry Department of the University. The Spring Hills Poultry plant is one of the most unique institutions of its kind in the country, and is a result of the cooperation between the poultryman and the engineer in designing facilities for keeping broilers and laying stock under most modern conditions. From the well equipped incubation rooms the newly hatched chicks are transferred to special brooding rooms, automatically heated and air-conditioned and equipped with electrically heated battery brooders. After about ten or twelve weeks of rapid growth on broiler producing diets, the broilers are sent to the killing room, equipped with a modern slack-scalding, wax-plucking apparatus which gives the dressed birds a beautiful finish. The dressed broilers are carefully graded, and each one individually wrapped in a special wrapping paper, boxed and sent to market.

Laying Unit

The laying unit of the Spring Hills Poultry Plant is equipped with individual laying cages where the laying bird spends her entire life in a specially air-conditioned, well lighted room, the plant capacity is over 12,000 layers. The eggs are produced under strictly sanitary conditions and are candled and graded with an automatic grading machine.

Research

Inasmuch as the University is not in a position to operate a strictly commercial poultry plant in competition with private enterprises, it has been decided to limit the commercial activities of the Spring Hills Plant. A certain amount of research work will be undertaken, particularly on the storage of poultry and factors affecting the quality of eggs, because the plant is equipped with a large up-to-date storage room where a temperature of −30° may be easily maintained. Some of the breeding stock has been transferred to the University flock at College Park. The incubators, brooders and broiler batteries as well as laying cages are also being transferred to help equip the new poultry plant at the University. This equipment and the resources available at the Spring Hills poultry plant will make it possible for the Universty to establish a well-developed poultry plant for carrying on research of practical importance to the poultry industry of Maryland.

The McManus Ayrshire

Comments by Prof. Kenneth C. Ikeler, head of Animal and Dairy industry section on the McManus Ayrshire herd.

In line with his constructive livestock improvement program, President Byrd has added the Charles E. McManus gift of his Spring Hills farm and its eighty head of pedigreed Ayrshire cattle to the University herd. These noted cattle are to be moved to College Park and will serve as foundation animals for instructional and research work in the breeding, feeding, and management of dairy cattle.

Approved Blood Lines

The Ayrshire herd was founded from Penshurst, Sycamore and Old Forge blood lines. These herds have been basic in the inprovement of this great breed of Scotch dairy cattle. Mr. Harry Leber, superintendent of Spring Hills farm, assisted by Mr. McManus in the foundation of the herd. The foundation cows have proven to be consistent breeders and strong producers.

Production and Type

In addition to being correct in breed type and character, the McManus Ayrshire cows have always been profitable producers. They have paid a profit each year. On herd production test these cattle have ranked among the top Ayrshire herds in the State of Maryland. The herd has won signal honors and awards at the Maryland State Fair at Timonium. There are several grand champion cows and junior champion heifers in the herd.

An Educational Gift

The gift by Mr. McManus of his Spring Hills Ayrshire herd to the University ranks as an outstanding educational contribution to agriculture.

The cattle themselves are a tribute to the constructive character of the donor. One of America's greatest breeders of livestock has said "that 25 years is a relatively short period in which to work improvement in a breed of livestock." The McManus Ayrshires carry in their veins and bring to the University more than a century of Scottish and American dairy cattle breeding. These cattle, when added to the Ayrshires now at College Park,

(Continued on page 10)

« « OLD LINE WINTER SPORTS » »

By W. H. ("Bill") HOTTEL

THE BASKET-BALL SQUAD OF 1938

Front row, left to right—Charles Norton, Adam Bengoechea, George Knepley, Colman Headley, John McCarthy.

Back row—Burton Shipley, '14, coach; Waverly Wheeler, Bill Rea, Francis Beamer, Pershing Mondorff, Milton Mulitz, Eddie Johnson, Logan Schuts, manager.

Old Line Athletes in Teeting Affairs

MARYLAND'S basket-ball team now is preparing for the Southern Conference tourney at Raleigh, N. C., in which it will be one of the eight participants. Eight of the 15 teams in the organization are picked on their record and Maryland finished with six wins and four defeats in the loop after a shaky start.

In fact, the Terps had to win their last four league games in order to get into competition, one of the victories being an upset triumph over Washington and Lee, the defending champion in the title tournament.

Coach Burton Shipley also suffered the handicap of losing Charlie Norton, star sophomore center, who was declared ineligible for scholastic reasons after the game with Virginia Tech on January 31, when the first semester marks were recorded. Norton, who also is a fine pitcher, will be out of action the rest of the year. He not only was the leading scorer on the Maryland team but was setting the pace for all the quints in the Washington area.

Likely Starting Team

Waverly Wheeler and Eddie Johnson, forwards; John McCarthy, center, and George Knepley and Coleman Headley, guards, have been starting most of Maryland's games and probably will go on the court at Raleigh in the first round of tourney play.

Adam Bengoechea and Bill Rea, forwards; Francis Beamer, center, and Milton Mulitz and Pershing Mondorff, guards, are the others who have been carrying on for the Terps. Johnson also can play center if needed.

Despite Norton's loss the Terps have been playing clever basket-ball, their passing and team play being of high order and baffling to their rivals. It is characteristic, though, of Maryland teams to do their best work in tight spots.

o

THE BOXING TEAM, which started the campaign with the darkest sort of outlook, with Benny Alperstein as the only letter man, also deserves plenty of pats on the back for its fine work.

The Terps have won one meet, lost two and tied two, but the pair lost to Catholic U., 3½ to 4½, and to Virginia, 3 to 5, might have gone the right way with any kind of a break. However, it was great that they made such a fine showing against two such powerful teams, both unbeaten.

The victory came over Western Maryland, 5½ to 2½, despite that the Terp team was forced to use three reserves on account of illness and injuries. This was on all-University night when the Terp basketers helped make it a clean sweep by defeating V. M. I. And the all-University night program that came in between the

MARYLAND'S BOXING SQUAD

Front row, left to right—Benny Alperstein, Coleman, Martin Rochlin, George Door, Junior Cox, Nathan Askin.

Back row—Col. Harvey Miller, coach, Capt. William Maglin, coach, Joe Henderson, Peralta, Ralph Pearson, Don Adams, Norman Himelfarb, George Acree, George Flax, Bill Johnson, Robert Lodge, Bill McWilliams, Mgr.

basket-ball and boxing was magnificent.

Duke, which may make a strong bid in the Southern Conference boxing tourney that will be held in Ritchie Coliseum February 25 and 26, was the team that was tied at 4-all, as was the Coast Guard Academy.

Host For Second Time

Like the rest of the conference teams, Maryland, so ably coached by Lieut. Col. Harvey L. Miller, Marine Corps Reserve, and Capt. William A. Maglin, U. S. A., of the military staff of the University, also is looking to tourney to which it will play the host for the second year in a row, February 25 and 26. The Terps have an away-from-home battle with Rutgers at New Brunswick, March 5, to wind-up the season.

George W. Dorr, 115 and 125; Martin Rochlin, 115; Bob Bradley, 125; Benny Alperstein, 135-pound national collegiate champion, who also has fought at 145; Nathan Askin, 135; Jose de Peralta, 145; Dick Johnson, 155 and 165; George Acree, 155; John Egan, 165; Ralph Pearson, 175; and Joe Henderson, heavy, are the fighters still with the team who have been in dual competition.

Tom Coleman, 145; Newton Cox, 155; and Ed Lloyd, 175, all of whom fought and lost a bout each, gave up the sport.

Present Big Problem

Alperstein and Askin offer a problem, as both are natural 135-pounders, and when the former went out of his class to fight at 145, he suffered a draw and a defeat for his first college reverse. It is not known what Miller will do for the conference tourney. His other choices appear likely to be: Dorr, 115; Bradley, 125; Johnson, 155; Egan, 165; Henderson, heavy.

However, Martin Rochlin, 115, won his bout against Western Maryland, with Dorr stepping up to 125, to score handily. Jose de Peralta, 145, also did well against the Terrors, though beaten. Rochlin, de Peralta, and George Acree, 155, who got a draw, made their bow in real competition as "pinch-hitters" against Western Maryland.

As for the tourney, Clemson, Citadel and South Carolina U. are rated as the teams to fight it out, with North Carolina dangerous and Maryland, the defending champion, the "dark horse."

North Carolina, North Carolina State and Virginia Tech will be the others to enter scrappers in the eight events and from the standpoint of closeness of competition for the team and individual titles it should be about the best tournament ever staged under the conference auspices.

O

Stars In Baltimore Meet

MARYLAND'S track team also is active, with the mile relay team scoring an easy victory over Bowdoin, Amherst and Middlebury in the big Millrose games in New York on February 5.

Right now the main thing on the minds of Geary Eppley and Frank Dobson as they whip the boys in shape are the Southern Conference indoor games at Chapel Hill, N. C., on February 26 and the second annual Maryland-Fifth Regiment meet in the latter's big armory in Baltimore on March 5.

This Baltimore meet doubtless will be the biggest ever held in this section, with a number of national celeb-

rities taking part. Among those who had accepted bids at this writing were Glenn Cunningham, the world's greatest miler, and Gene Venzeka, one of his most persistent rivals. They will run in the Governor's mile, the headliner of the meet. Cunningham ran a mile the other night in Boston in 4:10.

Joe McCluskey, one of the standout two-milers of all time, also will be seen in action, and Alan Tomlich, Spec Towns and Sam Allen, doubtless the three best hurdlers of today, all may be seen in the same race. Tomlich has been tying and breaking world marks consistently and Towne, Olympic champion, has been performing in just about as sensational a fashion. Towne is about to give up competition and Tomlich appears as his successor.

Navy, most of the Southern Conference institutions and scores of other schools will send their best.

Big Squad at Chapel Hill

Maryland entered 11 men in 12 events in the conference indoor meet and they should get a tune-up for the Baltimore affair. Those going to Chapel Hill:

60-yard dash—Edwin Miller, Hermie Evans and Cronin; 70-yard high hurdles, Evans and Logan Schutz; 70-yard low hurdles, Evans and Schutz; 440-yard dash, Croonin and Bill Theis; 880-yard run, Alan Miller; mile run, Mason Chronister; 2-mile run, James Kehoe; mile relay, Theis, Chronister, Alan Miller and Cronin; high jump, Edwin Miller and Francis Morris; shot-put, Nick Budkoff; broad jump, Morris and John Beers; pole vault, Cronin.

Robert Condon and Tom Fields, freshmen, will run in the non-conference three-quarter mile.

Cronin captured the quarter last year, tying the record of 52 seconds, while Edwin Miller won both the indoor and outdoor high jump titles last in 1937. He leaped 6 feet 3¾ inches in a dual meet last year. Cronin has run the quarter in 49.1 and pole vaulted 12 feet 4¾ inches.

Chronister and Kehoe, both of whom are sophomores, have shown great promise in the middle distance events.

o

Conference Boxing In Three Sessions

GEARY EPPLEY, who is chairman of the Southern Conference boxing committee, with the approval of his fellow committeemen, has decided to run off the title ring tourney at College Park on February 25 and 26 in three sessions. All the prelims will be held Friday evening with the semi-finals Saturday afternoon and the finals that night. This means that there will be about 20 bouts the opening night, a big dish for the fans. All of the classes never fill completely and the byes and several defaults that are forced by late injuries or sickness always cut the number of first round scraps. Last year there were only a total of 17 in the afternoon and night sessions that were held on Friday, too few to be satisfactory.

Prices this year will be $1.10 and $1.65, with only the best at the latter cost.

o

IN winning six of its 10 conference games, the Terp basket-ball team broke even with Washington and Lee and Duke, beat V. M. I. twice, Virginia Tech and William and Mary and lost other games to Richmond U. and North Carolina.

o

Maryland has a coming heavyweight scrapper in Abie Cohen, 195-pound freshman. He also is a fine football guard and an ace shot-putter.

o

George Dorr, varsity 115-pound boxer, has a brother Charlie who is fighting in the same class for the yearlings. Each normally weighs 123.

o

Frank Dobson, football mentor, began spring practice February 21 to last six weeks. Only frosh are called upon to toil, Dobson preferring upper classmen to turn to seasonal spring pastimes.

75 Cents To $1.65 For Meet Tickets

Tickets for the Maryland-Fifth Regiment meet in the latter's armory in Baltimore on March 5 are priced at $1.65 for a limited number of seats at the finish line; $1.10 for all those along the north side of the floor, down stairs and in the balcony, and 75 cents for those in the south balcony.

All of the $1.65 and $1.10 seats are reserved. The 75 cent tickets are general admission.

Alumni wanting good seats should get them early, as a sell-out is in prospect with such an array of star athletes to be on hand.

Jim Meade Gets Gridiron Trophy

Jim Meade, Maryland's all-Southern Conference halfback, gained some more honors recently when he was presented with a trophy as the outstanding player among the colleges in the Washington area. Coaches of Georgetown, Catholic U., George Washington, and other schools made him the unanimous selection. He received the award at the recent banquet of the Touchdown Club of Washington of which Charlie Fenwick, former Terp line mentor, is president.

●

University Beneficiary Of Generous Gift

(Continued from Page 7)

will give the University of Maryland one of the greatest institutional herds of dairy cattle in the country.

Additional Responsibility

The acceptance of the Spring Hills herd of Ayrshires by the University of Maryland carries with it much responsibility. To continue the work of a constructive breeder of dairy cattle, as was Mr. McManus, and to work further improvement in type and production is a difficult task. The Spring Hills cows and heifers will be bred to the University herd bull, "Sycamore Pilgrim," obtained from Dr. A. I. Bell, president of the Maryland Ayrshire Breeders' Association. This bull is sired by "Sycamore Lindy" and is out of the greatest producing daughter of "Penshurst Man of War." He should nick well with the Spring Hills cattle.

Education in Agriculture

The addition of the McManus Ayrshires to the University of Maryland herd should attract some of the most forward looking and thoughtful students to the Maryland College of Agriculture at College Park. These students should reflect a high degree of leadershp in the dairy cattle industry which is basic in our American Agriculture.

PERSHING RIFLES -:- *An Honor Drill Platoon*

FOUR BATTALIONS of over 800 men comprise the present unit of the Cadet Corps. All drills and lectures are held during regular class hours. Commissions in the Reserve Corps of the United States Army are awarded students who satisfactorily complete the two years of the advanced course.

Company, platoon, squad and individual awards are made annually for excellence in competitive drill. This competition takes place at the last assembled drill each spring.

The Reserve Officers Training Corps boasts the highest rating given by the War Department. Each year the optional advanced course receives more applicants than it can accept.

Student Band

The University of Maryland Student Band is having another highly successful year. With a membership of sixty pieces, this organization has consistently made an excellent showing at all occasions for which it has played. THE (Baltimore) SUN has referred to the Old Line Band as "one of the finest college bands in this section of the country."

The spirit displayed by the members has been good, and Master Sergeant Otto Siebeneichen, the director, and Major Howard Clark, faculty advisor, have put forth every possible effort to make the group a success.

Is the entrance to Silvester Hall, the men's dormitory, where mostly freshmen room. Fraternity men will recognize this doorway, as they have frequently passed through it on the way to interview that good prospective pledge.

This building was dedicated in honor of Capt. R. W. Silvester, the man who contributed so much to the reorganization of the College Park Schools from 1892 to 1912. A protrait of Captain Silvester now hangs in the president's office, presented to the University by Mr. Edmund C. Mayo, '04. A story about Captain Silvester and the portrait presentation appeared in the October, 1937, issue of the Alumni News.

●

Mrs. Roosevelt To Visit University April 13

Mrs. Franklin D. Roosevelt, the wife of the President of the United States, will be the guest speaker at the University on April 13th at 11.00 A.M. in the Ritchie Coliseum.

It will be the first time Mrs. Roosevelt has appeared as the principal speaker in Maryland. Also, it is the first time a wife of the President of the United States has appeared on the campus of the University at College Park.

Mrs. Roosevelt is intensely interested in the part women take in the civic affairs of our country, state, and community. It is expected she will center her talk on the college students of today, who will be the leaders of tomorrow.

Being a very democratic person herself, Mrs. Roosevelt will undoubtedly bring a message of great interest to the adults as well as to the youth.

It has been through the continuous and untiring efforts of Miss Adelade Stamp, Dean of Women, that the University will be so honored with the visit of Mrs. Roosevelt.

Many persons prominent in national, state, and educational affairs will be present. Alumni and friends are invited to attend.

President Henry Elijah Alvord, '88-'92 A Soldier, Educator And Scientist.

Among those who were pioneers in the early development of the College Park school of the University was a man of high influence as a soldier, educator and scientist, Henry Elijah Alvord, president from 1888 to 1892. Doctor Alvord was a member of the Alpha Chapter of Theta Chi at Norwich University in 1863. The fraternity was founded at Norwich in 1856 and the influence of Doctor Alvord's high ideals have contributed greatly toward its development. Theta Chi came to Maryland in 1929.

Military

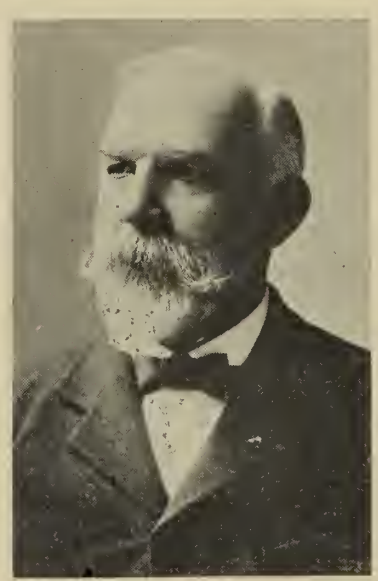
Doctor Alvord was born in Greenfield, Massachusetts, in 1844. His college life was less than half over when the war broke into it. His very interesting letters written home, some from Norwich, some from his posts in the military service during those unsettled years, were edited by Miss Caroline Sherman in "The New England Quarterly" for April, 1932. His enthusiasm to do his share in the struggle and the deep sense of loyalty he possessed are shown by them: he would "go with his class." He served bravely and capably and had some exciting adventures trying to snare Mosby, the brilliant Confederate calvary leader.

Army Officer

After the hostilities ceased, Alvord spent several years as an officer in the regular army stationed mainly at frontier posts. When four additional companies of the Tenth Cavalry were organized at Fort Riley, Kansas, in 1867, he commanded Company M, called the "Calico" company because its mounts were of assorted colors. An idea of the courage, tact, and ingenuity demanded by this western service may be gained from an account, based on his letters of that time, "A Young Army Officer's Experiences in Indian Territory," which appeared in "The Chronicles of Oklahoma" for June, 1935.

His assignment to be military instructor at the Massachusetts Agricultural College at Amherst, during 1869-1871, is worth noting for two reasons: it is the first instance of its type, and it points ahead to a blend of interests which became dominant in the civilian life he resumed in a year or two.

Agriculture thereafter claimed the first place in his thoughts. He bought a farm in Virginia, near Washington, an estate which possessed dear associations for his wife. He helped organize the school at Carlisle, Pennsylvania, which sought to train the Indian in arts of peace. Later in New York, he directed a farm upon which experimentation was one of the principal items in the work-program. He helped in the campaign for the Hatch Act which was adopted in 1887, giving permanence and financial stability to the nation-wide system of agricultural experiment stations. Alvord had returned in the preceding year to the Massachusetts Agricultural College to be professor of agriculture. After two years there, he accepted the presidency of the Maryland Agricultural College. This position he occupied until 1892; then he held a similar office in similar institutions for Oklahoma and New Hampshire for brief periods. He served also a term as head of the American Association of Agricultural Colleges and Experiment Stations. In 1895 he was called by the United States Department of Agriculture to be the chief of its newly created Dairy Division; he filled this position with international distinction the remaining nine years of his life.



Dr. H. E. Alvord

Administrator

At Maryland he organized its experiment station, the center of which until a short time ago was the interesting old Rossburg Inn, built at the close of the preceding century. The station issued its first sixteen bulletins, and several special ones, under his direction; their purpose, as Alvord said in an annual report, was to "diffuse among the people the useful, practical information" connected with agriculture which was acquired by its investigations. These publications contained a full-page advertisement about the Agricultural College and made it known in every farm home they entered.

Under Great Obligations

To his energy and influence upon men who have become executive heads there since his time, the College Park campus, particularly, is under great obligations. Brothers in Theta Chi may speak with justified pride of so gallant a soldier, so splendid an agricultural educator and scientist.

All of us owe thanks to Miss Sherman for the pleasure of reading these informative letters of Henry Elijah Alvord's student days.

Washington County Alumni Hold Banquet

On February 18, the Washington County Alumni, under the leadership of Hon. Henry Holzapfel, '93, President, held a splendid alumni meeting and dance at the Alexander Hotel in Hagerstown. More than 100 alumni and friends were present to hear Dr. H. C. Byrd, guest speaker, and join in the dancing. Mr. Frank Dobson, coach of football, and Charles Leroy Mackert, director of Physical education, also spoke.

Musical entertainment was rendered by Miss Zelma Truman, a University opera star, and Mrs. Eugene Kressin, '35, a former star in the University Opera Club. They were accompanied by Mrs. Blaisdel at the piano. Dance music was furnished by the Marylanders, a student orchestra.

The committee on arrangements was led by L. G. Mathias, '23' secretary of the club, and assisted by Ed Tenney, '28, Kenneth Spence, '27, and Andy Cohill, '09, all very active and perfected good arrangements.

The entire meeting was a great success.

Alumni Grand Reunion This Year Saturday, May 21

TO use a paradox on the old proverb, "In the spring a young man's fancy lightly turns to what he has been thinking about all winter" — that is spending the day 'On the Hill' with old friends of his college days at the Annual Alumni Reunion. This will be on Saturday, May 21, when a Grand Reunion of the Alumni will be held.

The Reunion this year will be in honor of Commissioner Melvin C. Hazen, '88, who was the first President of the Alumni Association and who will be celebrating the 50th anniversary of his class. Mr. Hazen is now Chairman of the Board of Commissioners for the District of Columbia and he has always maintained his enthusiastic membership in the Alumni Association.

It is expected that every class will have a reunion with particular emphasis being placed on the classes of 1893, '98, '03, '08, '13, '18, '23, '28, and '33, which are the five year reunion classes. All other classes will have reunions either separately or will group with their near class between the 5 year reunions.

Every Alumnus is a committee of one to make plans for his return and to write his fellow classmates to meet him 'On the Hill.'

Tentative plans present a very attractive program and everything points toward a gala day for everyone. Class reunions will be held in the morning at 10.30, with registration getting under way at 9 A.M. At noon, a special luncheon will be served, after which the annual meeting of the Association will be held.

In the afternoon, Maryland's oldest rivals will be the visiting opponent in lacrosse, a game which was introduced in the University by one who this year is celebrating his 25th year of graduation—E. E. Powell, '23, of Towson, Md. Classmates who were members of the first lacrosse team along with Powell are G. P. Trax, C. W. Mason, M. E. Davis, and S. H. Newman.

Following the lacrosse game, a brief time will be allowed for a bit of washing and primping before the annual Alumni Dinner Dance. Special arrangements have been made in the girls' and Men's dormitories where the respective Alumni may change their clothes if they desire to do so.

Special entertainment will be presented by those students who have been starred in the various productions presented on the campus during the past year.

Everyone who attended the dinner dance last year said they would not miss being present this year. MARK THE DATE, SATURDAY, MAY 21, BE 'ON THE HILL' WITH ALL OF YOUR OLD FRIENDS.

New Home of the Kappas

A Note Of Legal Interest

[The following is a note of unknown origin but contains a bit of legal humor concerning the Louisiana purchase by the United States. This note was sent to the Alumni Office by Samuel Regester a member of the class of '76]

In a legal transaction involving the title to a parcel of land in Louisiana, the firm of New York attorneys handling the matter requested that a title of opinion be furnished.

A New Orleans lawyer who was retained to check the title rendered an opinion, tracing the title back to 1803.

The New York firm examined the opinion and wrote again to the New Orleans attorney saying, in effect that the opinion rendered was all very well as far as it went, but that the title to the property prior to 1803 had not been satisfactorily covered. The New Orleans attorney replied as follows:

"Dear Sirs:

"I am in receipt of your favor of the fifth instant inquiring as to the state of the title of this property prior to the year 1803.

"Please be advised that in the year 1803 the United States of America acquired the territory of Louisiana from the Republic of France by purchase, the Republic of France had in turn acquired title from the Spanish Crown by conquest, the Spanish Crown having originally acquired title by virtue of the discoveries of one Christopher Columbus, a Genoese sailor, who had been duly authorized to embark upon his voyage of discovery by Isabella, Queen of Spain; Isabella, before granting such authority had obtained the sanction of His Holiness, the Pope; the Pope is the vicar on earth of Jesus Christ; Jesus Christ is the son and heir-apparent of God; God made Louisiana."

●

Kappa Kappa Gamma New Colonial Home

The Gramma Phi Chapter of Kappa Kappa Gramma Sorority are in their new home which will house twenty-eight girls, with double study rooms and two large "dormitories." The entire house is air conditioned, with fireproof stairway, second floor laundry room, recreation room with fireplace in the basement, and a very large living room on the first floor. The scheme of decoration is the same as that used in houses in Colonial Williamsburg.

As A Marylander Sees Sumatra In The Far East

By PRESTON L. PEACH, '03

THIS is the way you can travel in Sumatra if you want to. Up on the beautiful plateau of Central Sumatra, some 5,000 feet above sea level, with cabbage patches, strawberries, corn fields and truck gardens, to travel like this makes one feel like he is in Maryland on a fine June day. Mrs. Peach and I spent a most restful four weeks in August 1937, up around the place called Brastagi. Nearby are two active volcanoes, (we visited one some 3,000 feet high and brought some real sulfur direct from the bubbling "Hot Hole") and beautiful Lake Toba. This wonderful body of crystal water rests beneath the tropical sun and at an altitude of 3,000 feet above the sea, has a temperature of 60 degrees. It is sixty miles long and twenty miles wide. We stopped at a hotel on its shore for two days. I am persuaded that heaven must be very nearby, no lovlier place have I ever seen in all my travels in the world. If any one wants to spend a honeymoon, travel to Sumatra and go to Prapat on Toba Lake. Do not say it is expensive to travel. I have come to the conclusion that it is expensive *not* to travel.

Travel Methods

You can travel by pony, by "Sadu'" (you would almost call it a "dog cart") by bicycle, by car, by bus, by airplane and by a bullock cart; of course when you get two folks who are such lovers of the country as my wife and I, then *walking* is the best way to travel. That method we use very often. The trip to the vocano was a climb of eight miles through jungle and lava beds. Up and back sixteen miles and that is not bad for two Marylanders who are between 40 and 100 years old.

At 5,000 Feet

I think there is nothing to equal a tropical sun bath at an altitude of 5,000 feet. I do not recommend it at sea level. We had many such baths while we were in Sumatra and though I got a bad sunburn on bare arms the day I played 27 holes of golf between 9 and 12 noon yet with normal protection living up in that wonderful country is worth a long journey to experience.

Mr. and Mrs. Peach

The people of that part of Sumatra are most interesting. The Battaks are a branch of the Malaynesian Brown Man. One hundred years ago he was a cannibal. Last August I visited a Church in the centre of Toba Battak country, where 600 people assembled for worship. I have never heard such beautiful singing and seldom have I entered a church where worship of God was more sincere. A great transformation has come in one century - from cannibalism to Christian Civilization. They used to eat dog meat and grind off the teeth of youthful maidens, but that is gone. They are a happy, peaceful, likeable people. We sat many times in the sunshine, and using the Malay language, we told each other stories of our native lands.

If you want a real vacation, go to Sumatra, go to Brastigi, call ot the "Knoll" - our Mission bungalow and ask for "Tony" - he is the "Kuda Manis" (gentle horse) on which Mrs. Peach is mounted.

●

New Instructor

Mrs. Gretchen Stonamyer from Drake University has recently joined the Department of Women's Physical Education.

After receiving her M. A. degree from Johns Hopkins, Mrs. Stonamyer taught at Iowa State College. She will now aid in directing womens sports at the University.

Ralph and Petey

Ralph I. Williams, '33, former president of the Student Government and now assistant dean of men, married Miss Sannye E. Hardiman, '33, November 26 last in Washington, D. C. "Petey," as Mrs. Williams is familiarly known by the Kappa Kappa Gamma girls, is a native of Baltimore. Ralph hails from the city of Washington and is a member of Theta Chi. The newlyweds are residing in College Park.

Both were well known and very popular during their college days. They took a very active interest in extra curricular activities. Ralph received the Student Citizenship Prize offered by President H. C. Byrd.

o

May Day will be presented during the first week in May by the Junior class. Miss Nora Huber of Baltimore has been appointed general chairman of the program.

o

Cameras by Carrington—Ray Carrington, '28, former editor-in-chief of the "Diamondback" and now faculty advisor of the Terrapin, student yearbook, spoke before the Camera Club on "Composition of Photography." Since graduation Ray has carried on his study in art in his spare time from his regular work as assistant editor and illustrator in the extension service.

His art works have been on exhibition at the Corcoran Art Gallery, the Natonal Museum, the Arts Club of Washington, the Anderson Galleries in Richmond and the Penn Academy in New Haven. On several occasions his work has won first honors.

o

New Arrival—On October 20, 1937, there arrived in the home of Mr. and Mrs. J. Elmo Brogdon a baby boy, Jarrett Alfred, weighing 7 lbs. 11 ounces. Mrs. Brogdon was formerly Miss Norma Rowe, '31, a member of Tri Delt and active student affairs. The Brogdons are residing in Hyattsville, Md.

o

Married—The former Margaret Pressley, '30, was married to Mr. Arthur G. Ward of Seattle, Washington, on January 10 in Salt Lake City. Mr. Ward is employed with the Western Division of the Department of Agriculture in aerial photography. The Wards are now residing in Salt Lake City.

Our History Makers.

By GEORGE FOGG, '26

Brantz Mayer, a graduate of the law school in the year 1830, a founder of McDonough School and the Maryland Historical Society, was a native Baltimorean. Born September 27, 1809, in a family which had immigrated to the United States in 1784, he was given a good education largely by private tutor. Carrying his law books with him he traveled to China and India. In 1841, after having practiced law for several years, he went to Mexico as secretary of the U. S. Legation.

Three years later he published a book "Mexico as It Was and as It Is," which ran through three editions. He soon became interested in history and was an important figure in the founding of the Maryland Historical Society of which he was president from 1867 to 1871. He then edited the "Journal of Charles Carroll of Carrollton, during His Visit to Canada in 1776."

Among his more interesting historical writings is "Tah-Gah-Jute: or Logan and Captain Michæl Cresap," in which he defended Captain Cresap from the charge of having killed Logan and his family. The University library possesses a manuscript letter of Thomas Jefferson which seems to indicate that Jefferson had no doubt of Cresap's guilt. Logan was a friendly Indian and his death caused serious disturbances in Westernn Maryland.

Mayer went to Louisiana as executor of the will of John McDonough, and in this connection he drew the plan and charter of McDonough School. He retired from legal practice in 1855, devoted himself to writing. He contributed frequently to the Baltimore American, and later became an editor of that newspaper.

In the Civil War Mayer became an officer in the Union Army where his conciliatory spirit helped immeasurably. He continued in the pay department of the army until 1875 when he retired with the rank of colonel.

His writings were numerous and covered a variety of subjects but his work in Mexico, though now nearly a hundred years old, is still considered authoritative. Another book which brought him some international fame was "Captain Canot; or Twenty Years of an African Slaver." Based undoubtedly on some fact, this book presented a very spectacular picture of the slave trade.

His other works include "Baltimore, Past and Present," a history of his own family, "Calvert and Penn," and some contributions to the Smithsonian Institution's publications on Mexican archæology.

He was twice married and had eight daughters. Although partly educated in Catholic schools, he died a Unitarian in 1879.

Dr. Robinson Attends American Dental Meeting

When the American Dental Association held their annual meeting in Chicago this winter, Dr. J. Ben Robinson, '14, Dental, represented the University. As a part of the Association's program the Northwestern University Dental School, their Alumni and the Chicago Dental Society held memorial service for the late Dr. Arthur Davenport Black, a man of national prominence in the dental profession and former dean of the Dental School. Doctor Robinson presented a paper on "Doctor Black and the Dental Profession." Doctor Black was a man described as a helpful friend to his dental colleagues throughout the world.

Carnegie Steel

Quite a number of our Alumni are now employed with the Carnegie Steel Co. They are Eddie Gibbs, '37, Phi Delta Theta; Luther Brotmarkle, '37, Lambda Chi Alpha; J. Gardner Brooks, '36, Sigma Nu; Lewis T. Gibbs, '36, Sigma Nu; Joe Bogan, '34, Lambda Phi Alpha; Johnny Dye, '34; Stanley Lore, '34, Lambda Chi Alpha, and Harry Schramm, '32.

EDDIE GIBBS

●

Engineering Fellowship—The College of Engineering offers three new fellowships in research and applied science.

Colonel Roger Brooke Made Brigadier General

A native Marylander from Sandy Spring, Maryland, Colonel Roger Brooke, a graduate of the Medical School in '00, was recently promoted to the rank of Brigadier General.

Following graduation General Brooke became a surgeon in the army. During the world war he was instructor at the Medical Officers Training Camp, Camp Greenleaf, Georgia.

General Brooke is now on duty at the army dispensary in Washington.

●

Former "M" Club President Succumbs

W. Gilbert Dent, '04, former president of the varsity letter men's club died February 9 at the St. Mary's Hospital.

A native of St. Mary's County, "Gil" Dent, as his classmates called him, was for many years prominent in the real estate circles of Washington. In recent years he moved offices to Leonardtown, Maryland, where he was active in development of shore property and Tudor Park near Leonardtown. He is survived by his widow, two sons and three sisters. Both sons, W. G., Jr., '26, and John H., '32, are alumni of the University.

●

Major Spalding '09, Receives Promotion

It is now Lieutenant Colonel Basil D. Spalding, '09, of the U. S. Infantry according to the board on recommendations. He is now on duty as instructor at the Fort Benning school, Georgia. Col. Spalding enlisted soon after graduation, rose from the ranks going through every rank in the Army. He has studied and taught at the War College in Washington, and is on his second teaching tour at Fort Benning.

For distinguished service, Colonel Spalding, has been awarded the silver star with an oak leaf cluster, and the purple heart.

"Ram" as his class mates named him is a native Marylander from Harford County. He was labeled the most military man in college and so he turned out to be. Other than study, his favorite occupation was sleep. But with his course in Civil Engineering and "Doc Tolly" as the mogul, his favorite pastime was frequently neglected.

« « OLD LINE ATHLETICS » »

By W. H. ("Bill") HOTTEL

Indoor And Outdoor Sports

WITH participation in the National collegiate championship boxing tourney at Charlottesville on March 31 and April 1 and 2, the only indoor event left on the Maryland calendar, the Terp athletes are busy getting ready for a busy outdoor campaign.

Fifty-two varsity contests, 30 of which are slated for home consumption, have been arranged in baseball, track, lacrosse and tennis.

The nine comes close to having half of the competition, with 23 clashes, 14 of them at College Park. Lacrosse has 6 games at home and 3 abroad; the tennis squad entertains 7 times and travels for 4 matches, while the track combination takes the nomadic honors, 5 of its 8 meets being on foreign soil.

Among the teams to be met in the various pastimes are Harvard, Penn State, Princeton, Navy, Army, Ohio State and Michigan, in addition to the wealth of contests with Maryland's fellow members of the Southern Conference.

Bright Field Day Card

VIRGINIA in track, Washington and Lee in baseball and Catholic U. in tennis will provide the varsity events to go along with the scholastic track games on field day at College Park, May 7.

For the first time in years the lacrosse team will be away that day, engaging Princeton in Tigertown. However, with the stickmen having to wait until the conclusion of the double track affair, the program had proved too lengthy. Incidentally, Princeton and Maryland were bracketed as 1937 champions in collegiate lacrosse.

The outlook is for good teams in all four sports, the lacrosse squad, heavy loser in 1937 stars, having the most problems to overcome.

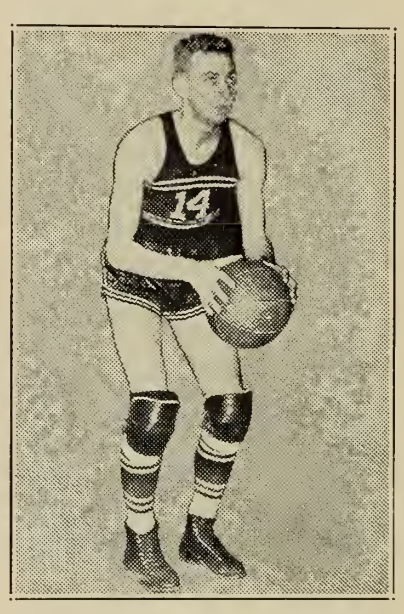
None of the teams will be affected by spring football practice, now being conducted by Coach Frank Dobson. He holds his sessions only for the members of last fall's freshman squad and those who do not aspire in other pastimes.

Basketers Finish Strong

THE comeback of the basket-ball team and the fine showing of the track squad were high spots of the indoor season as the boxing combination, in the throes of rebuilding, did not have a winning season. However, the scrappers did better than was expected.

The basketers after losing 8 of their first 15 games, rallied to take eight straight in the regular season, and then lost out to Duke in the semi-finals of the Southern Conference Tourney at Raleigh after beating The Citadel in the opening round, 45 to 43. The Terps bowed to Duke, 32-35 in a hot contest, and the Blue Devils then went on to the title.

All Southern



George Knepley, Forward

Maryland's basket-ball record is all the more notable because of the fact that Charlie Norton, big soph center and leading scorer, was lost in the middle of the season for scholastic reasons.

George Knepley, guard, received the signal honor of being named on the all-Conference tourney first quint, while Waverly Wheeler, forward, was a second team selection.

Track Season is Spicy

MARYLAND'S relay team proved outstanding in the track season that was featured by the big Baltimore games sponsored by the Terps and the 5th Regiment of Maryland in the latter's spacious armory. Glenn Cunningham, the world's greatest middle distance runner; Charlie Beetham, another ace at the middle distances; Joe McCluskey and Norman Bright, distance stars, and Allen Tolmich and Sam Allen, the country's leading hurdlers, were among those to spice the pretentious meet that drew a capacity crowd.

The Terps scored their third mile relay victory of the season in this meet with an upset triumph over Navy and Georgetown, the last named being a heavy favorite to take the event. The Terps set a University indoor mark in winning in 3.25.6.

Another high spot of the meet was the great mile by Mason Chromister, Maryland sophomore, who was timed in 4.16.9 in running third to Cunningham and Archie San Romani in the featured Governor's mile. He beat out Gene Venzke, the man who has been a consistent second to Cunningham for several years.

Allen Miller, one of Maryland's clever quarter-milers, figured in an unusual finish, running a dead heat with Charlie Curl of Washington and Lee in the 440, in the fast indoor time of 51.8.

In addition to winning the Conference relay title, Maryland was third to Duke and North Carolina in the point scoring. Frank Cronin, in the 440, and Ed Miller, in the high, won individual titles, the latter setting a mark of 6 feet ¾ inch. Chronister was second in the mile and Jim Kehoe placed in the two miles, as he also did in the Baltimore meet.

Alperstein Paces Boxers

BENNY ALPERSTEIN, who won the Southern Conference 125-pound title, and who with several others will compete in the National tourney, gave tone to the interesting boxing season. Nate Askin also did well in the title affair, finishing as runner-up in the 135-pound division. Clemson took home the laurels in the tourney staged at College Park.

The Terps provided plenty of action despite the fact that they won only one meet, tied two and lost three, and with almost the entire team back and strongly bolstered by recruits from the freshman, the 1939 edition should return to championship caliber.

Fencing

Into the hills of Virginia the Terrapins Intramural Fencers journeyed to engage the squad of V. M. I. Maryland won 18 to 9 but their star performer, Bob Neiman, met his first defeat of the season.

There was a bit of human interest in Neiman's match. In prep school Neiman was State saber champion and his roommate was State foil champ, but when the roommates met as representatives of different schools the tables turned. Neiman lost to his chunky in saber but won in the foil match.

●

Wicomico County Will Hear Glee Club

On March 30, the University Glee Club will present a musical concert at Salisbury, Md., sponsored by the Alumni. The Club under the direction of Harlan Randall has been making noteworthy progress in musical recitals. Just recently a very entertaining program was presented on the campus featuring a well known guest artist, Geoffery O'Hara of New York.

It it expected that the Alumni of Wicomico County will organize as a result of the Glee Club's appearance. Dr. Mayo B. Mott, Chairman of the Alumni of this county, expects a record attendance. A. Everett Williams, Esq., a prominent attorney is chairman of the Glee Club's arrangements and he will be assisted by Dr. Philip Insley and Charles Zulick.

The concert will be held at the Auditorium of the State Teachers' College in Salisbury beginning at 8:30 P.M.

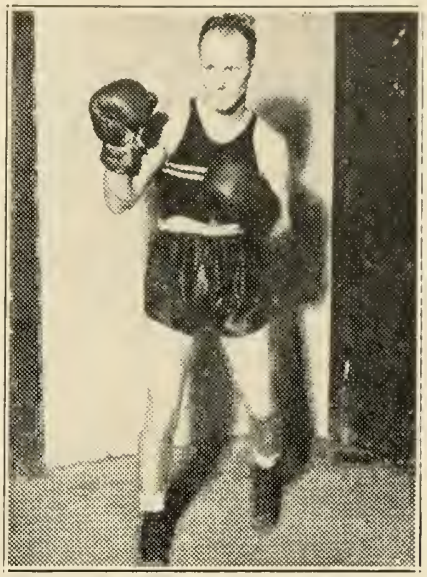
The following evening, March 31, the club will make another Shore appearance at Cambridge under the sponsorship of the Charity Committee of the Rotary Club. Mr. W. R. McKnight, county agent for Dorchester County, is chairman of the arrangements. The concert will be held in the High School Auditorium beginning at 8 o'clock.

Many Alumni in the Dorchester area are taking an active interest in the Club's appearance and there is very indication for a record attendance.

●

Accountant—Woodrow W. Rill, '33, was included in the list of those who have successfully taken the examinations for the degree of Certified Public Accountant. Rill hails from Hampstead, Md.

Boxing Champion



Benny Alperstein, 125-Pounder

Spring Sports

Track

April 9—Virginia Tech, Blacksburg; 11—Washington and Lee, Lexington; 16—V.M.I.; 23—William and Mary, Williamsburg; 29 and 30—Penn Relays, Philadelphia.

May 7—Virginia; 14—Army, West Point; 20 and 21—Southern Conference meet, Durham.

○

Lacrosse

March 29—Swarthmore.

April 2—Mt. Washington; 7—Harvard; 16—Penn State; 23—St. John's; 30—Rutgers, New Brunswick.

May 7—Princeton, Princeton; 14—Navy, Annapolis; 21—Johns Hopkins.

○

Baseball

March 28—Vermont; 29—Ohio State.

April 4—Cornell; 8—Washington and Lee, Lexington; 9—V.M.I., Lexington; 14—Penn State; 15—Michigan; 16—Virginia, Charlottesville; 18—Duke, Durham; 19—William and Mary, Williamsburg; 23—Georgetown; 27—Navy, Annapolis; 28—Lafayette; 30—Washington College, Chestertown.

May 3—Virginia; 4—William and Mary; 7—Washington and Lee; 9—Virginia Tech; 13—North Carolina; 14—Duke; 17—V.M.I.; 20—Washington College.

Tracksters Win

Carrying off top collegiate honors in the fifth annual Catholic University indoor meet was another accomplishment of the 1938 indoor track squad.

Frank Cronin breaks record in the "660" and the relay team again defeats Georgetown in a thrilling race. In the "660" Cronin established a new D. C. A. A. U. record of 1:26.2. This distance was a little longer than his usual distance of "440" but the iron man came back in the relay and ran anchor.

The relay running order was Bill Theis, Allen Miller, Jimmy Kehoe and Cronin. In winning the high jump Ed Miller cleared the bar at 6 ft. ¾ inches which is, however, under his record. Mason Chronister, being somewhat off form, failed to show his usual speed as when he topped Venzke the previous week in Baltimore.

●

Coed Riflists

Four victories in one week is the latest record of the Coed riflists. One defeat puts the count 4 to 1 in favor of the fair sharpshooters in their postal competition on the range.

Ohio State, Indiana, George Washington and Georgia bowed to the Terps while the University of Washington, firing a perfect score of 500, took their match. Scores from 494 to 496 out of a possible 500 was the accomplishments of the Terp's Coeds.

●

Johnny Mitchell Selling Insurance

A former Old Line athlete on the gridiron and the lacrosse field is now in the Insurance business in College Park—John R. Mitchell, '33. John is a member of the Berger and Tippett, Real estate and insurance firm of College Park, representing the Massachusetts Mutual Life Insurance Company. He was formerly in the Investment business in Baltimore.

John has moved his family to College Park and is really going into the business in a big way.

●

Tennis

April 13—William and Mary; 14—Richmond U.; 19—Duke; 23—Western Maryland; 28—William and Mary, Williamsburg; 29—Richmond U., Richmond; 30—V.M.I., Lexington.

May 7—Catholic U.; 11—Navy, Annapolis; 14—Georgetown; 16—Washington and Lee; 18—Penn State at State College.

Petroleum

Out in Dallas, Texas, a graduate of the University of Maryland, Mr. E. Garonzik, LL.B., '09, is president of the Primrose Petroleum Company. He is a native of Baltimore City and moved to Texas shortly after graduation. In 1916 he entered the Oil business and today heads a firm which handles oil and its by products in practically every phase.

Mr. Garonzik's niece, Miss Ruth Garonzik, and a nephew, Mr. Raphael Ehrlich, both are students at the University of Maryland.

●

Personals

Brass and Copper—With the Seaboard Brass and Copper Company of Baltimore we find Hollis F. Bennett, '11. He has recently taken an active interest in some prospective students from Florida who plan on entering the University. Good for Bennett.

o

Construction—Roy S. Eyre, '13, construction engineer for procurement of the Treasury Department was recently transferred from New York to Derry, New Hampshire. He is supervising the construction of a new post office building.

o

Steel—In Vandergrift, Pa., Stanley Lore, '34, and Harry Schramm, '32, are with the Carnegie Steel Corp. Stanley recently visited the campus and stopped in the Alumni Office for a chat. He is making a new use of the Alumni News by cutting out the cover pictures and making a pictorial of the campus. This calls for a constant variety of cover pictures, but with the many new buildings this can go on for some time to come.

o

Army—At Uniontown, Pa., is Bennard Bruns, '36, in the U. S. Cavalry service. Bruns is a member of Theta Chi fraternity.

o

Graduate—Eleanor E. Knowles, '31, now attending Cornell University, got her M. S. degree last year and her next goal is a Ph.D.

o

Birth—On December 10, Mr. and Mrs. M. S. Collins annuonced the birth of a young son named Jackie. Mr. Collins, '28, better known as "Mit," is president of the American Publishing Co. of Washington, D. C. Mrs. Collins was formerly Miss Helen Oyster of Garrett Park, Md. The Collins now have two children.

On West Coast

Louis W. Ennis, '36,
Lieut. U. S. Marine Corps

Washington, D. C.—Robert A. Dunnigan, '35, is with the United States Census Bureau in Washington, D. C. Bob is a former R. O. T. C. Captain and a graduate in Engineering.

o

Married—Miss Edith Louise Stiles, '36, a member of the Gaithersburg High School faculty and Mr. Allie Messer of Laytonsville, Md., were recently married. Mrs. Messer is a graduate of the College of Education. Both Mr. and Mrs. Messer have taken an active part in the 4-H Club work in Montgomery County.

o

Accountant—R. Bernard Graves, '37, is with the Continental Baking Co. in New York City as cost accountant. His activities at Maryland consisted of work on the "Diamondback" and membership in the Scabbard and Blade.

o

Married—Former campus beauty queen takes matrimonial step. Flora Waldman, '37, an A. O. Pi and one of Maryland's former outstanding coed students, married Robert Titus Reid, '36, of Baltimore. The marriage took place December 24 in Washington, D. C., and the newlyweds are living at 2730 Chesapeake St., Washington, D. C.

o

Medical—Leo J. Sklar, '37, now is a student at the Georgetown Medical School. His activities at Maryland were with the Rossbourg Club, International Relations Club, M. C. A., Intramural football and basketball.

Florida

Mary Virgina Taylor, '36, from Perryman, Md., spent the winter in Florida. She was formerly with the Health Center in Washington, D.C., when the opportunity to be a dietician in Florida presented itself. Mary seized the offer and recently wrote the Alumni Office that the work has been quite enjoyable. In prescribing a diet for her clientele for the reduction of weight, she did so well that Mary lost weight herself.

Mary was in Cocoa, Florida; then it was heard that she had been to Tampa, Miami, and elsewhere—'Tis a tough life.

In College, she was active in many student affairs and a member of the Alpha Xi Delta Sorority. Mary expects to be present for Alumni Day—here is a good opportunity to get more first-hand information about the Palmetto State.

●

Jobs

What about jobs for our seniors and graduates? Many of the Alumni can be of tremendous help in this service. The Alumni Office has requested all seniors to fill out blanks in regard to possible employment after graduation indicating the type of work they desire. This permits us to answer promptly any requests received for students with particular training or experience.

Alumni who know of any possibilities should notify the Alumni Office that we might contact the personnel officer and arrange for interviews with students.

We, as fellow alumni, can greatly assist our seniors in this way and, at the same time, establish contacts which might lead to promotions and a better position for a fellow Alumnus.

Any Alumnus who is out of employment, or wishes to better his position, is requested to write the Alumni Office, giving his experience and desires as to other employment.

A constant effort is being made by your Association to perfect this service, but everyone has got to help.

Personal Mention

Birth—Mr. and Mrs. J. Alfred Kay have with them J. Alfred, Jr., born November 21 last year at Trenton, N. J. Mrs. Kay was formerly Eleanor Baumel, '31, of Kappa Kappa Gamma and hails from Royal Oak, Md. Al is a member of the class of '35 and Sigma Nu. He is now engaged in the textile business in Trenton. The Kays live at 1442 W. State St. in Trenton.

o

Birth—Mr. and Mrs. Stanley Stabler are proud parents of William Drew, born December 21. Mrs. Stabler was formerly Miss Gladys Hawkins of Georgia. Mr. Stabler is a member of the class of '29. At the present he is Farm Superintendent of the University's Experimental Farm. Stanley is a member of the Alpha Gamma Rho fraternity. The Stablers reside in College Park.

o

Philadelphia—John T. O'Neill, '31, former president of the Student Government, now a Captain in the District National Guard, has been sent to Philadelphia for a six weeks course in the quarter-master school. His regular job is in the Engineering Division of the War Department. John married Jane Hammack, '31, a member of A. O. Pi. They are residing in College Heights.

o

Pocomoke—Bertha E. Cannon, '33, an A. O. Pi and graduate in Home Economics is married and now living in Pocomoke City, Md. She is now Mrs. G. Russell Carter.

Died—A fatal automobile accident takes the life of Wayne Shepherd, '23, a resident of Berwyn and the son of the late Judge Shepherd, former assistant attorney general under President Wilson.

Shepherd at the time of his death was special consultant for the P. W. A. for Prince George County.

He is a member of Alpha Tau Omega fraternity and was very active in extra-curricular activities as a student.

o

Teaching—Florence Rea, '36, a member of Mortar Board and Tri Delt, now is teaching at Patterson Park Junior High School and is reported to be engaged.

At Patterson Park we find another alumnus as principal. Norman Clark, '12, and still another teacher, Ruth Diggs, '32.

o

Mason—Dr. Ray A. Vawter, '24, a graduate of the Dental School, has been elected worshipful master of Mount Hermon Lodge of Hyattsville. This position was previously held by Chas. E. Prince, '24.

o

Nashville—Major J. P. Crawford, M. D., '93, was the University of Maryland's representative at the inauguration of Dr. O. C Carmichal, of Vanderbilt University on February 5, 1938.

o

Rochester—Roy B. Tansill, '30, is with the Household Finance Corporation in Rochester, N. Y. He was a member of Phi Sigma Kappa, also a member of the "M" Club, having won his varsity award as a member of the baseball team. He was also active in many other extra-curricular activities.

It's a Maryland Tradition!

After the game, in the evening, at lunch, at any and all times Marylanders get together you'll find them at the Varsity Grill—newly renovated. Your school spirit cannot be par until you are a regular patron.

■

The Varsity Grill

E. F. ZALESAK, '25, Proprietor

Boston—Harry Clifton Byrd, Jr., '36, is in Boston, Mass., where he is employed by the Fuller Construction Co. Clifton, a member of Sigma Nu, is under another well-known Sigma Nu, Jerry H. Sullivan, vice-president of the company. Cliff is a graduate in Economics.

o

Died—Prof. Frederic W. Oldenburg, prominent agronomist in the extension service of the University, succumbed following an automobile accident early in January. Professor Oldenburg came to the University in 1917 and has been connected with the Extension Service ever since. He was prominently known throughout the State as a man of eminent character.

Dr. A. W. Valentine, '04.

Cover Picture

The front cover picture is a familiar spring sight on the steps and portico of the Agriculture Building. This picture should bring back many fond memories of days among friends. The old campus "On the Hill" hails your return to the familiar scenes among friends on Saturday, May 21, the annual gathering of all former students.

"Smilin' Through"

The heading seems to be an adequate one to follow the Alumni Reunion announcement. This time it means the title of a play to be presented by the Footlight Club on the evenings of May 12-13-14 in the auditorium. All alumni are invited to attend. Tickets may be had by writing direct to Ralph Williams, Campus. Price of admission is 40 cents.

The Club just finished an excellent presentation of a mystery play entitled, "On the Night of January 16th." The play received many complimentary remarks. Directing the Club is an alumnus of the University—Ralph I. Williams, '33, assistant Dean of Men.

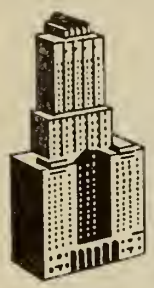
Alumni Board Proposes Amendment

At a recent meeting of the Alumni Board the following amendment was passed after considerable discussion, for presentation at the annual meeting to be held May 21. The Board received a plan for organization from C. V. Koons, chairman of the Organization Committee, and C. Walter Cole, chairman of the Finance Committee.

It is proposed by the Board to amend the by-law providing that alumni dues be increased to $3.00 per year. The purpose of this increase is to assist the various groups in the organization plan to properly promote their meeting. Instead of having group dues the group will receive a proportionate share of the dues received from its members by the General Association. The Board feels that this does not place any extra expenses on alumni members and it will help promote more organized groups.

Annual Spring Dinner For New York Group

ON SATURDAY, MAY 14, the Maryland Alumni Club of New York will hold its Spring Dinner at the Shelton Hotel, 49th Street and Lexington Avenue. A most interesting evening has been planned by the Dinner Committee, headed by Dr. McCall Anderson, General Chairman.



SHELTON HOTEL

Many New York Alumni are planning to attend the Army-Maryland track meet at West Point on the afternoon preceding the dinner. The group plans to leave West Point in ample time to attend the dinner that night in New York.

Reception

Following a reception at 6:30 and the dinner at 7:30 the Club will elect officers for the ensuing year. Harry D. Watts, '02, prominent New York contractor, will act as Toastmaster. The principal speakers will be two outstanding alumni, well-known to all alumni. Dr. L. B. Broughton, '02, recently appointed Dean of the College of Arts and Sciences will address the gathering on "The University's Academic Program." "Swede" Epply, now Dean of Men and Director of Athletics, will speak on "The University's Extra-Curricular Program."

Lieutenant Governor

The Club will be most fortunate in having as a guest of honor the Lieutenant-Governor of the State of New York, Hon. M. William Bray.

Other guests will include E. F. Zalesak, '25, president of the Alumni Association, and George F. Pollock, the Alumni Association's secretary-treasurer.

Maryland March

Another feature of the evening will be the presentation of a new Maryland March written by Dr. Richard Pagnelli, '02, prominent New York physician. Doctor Pagnelli is chairman of the Entertainment Committee and has arranged for Eugene Cibelli, well-known tenor, to sing "Maryland, My Maryland." Other entertainment features are planned for presentation during dinner.

Assisting Drs. Anderson and Pagnelli in their work, are Grace Laeleger, '28, William R. Maslin, '09, J. Temple Knotts, '25, Charles Berry, '34, and John Bourke, '35.

Reservations for the dinner at $1.75 per person may be sent to Miss Sarah E. Morris, Secretary-Treasurer of the Club at 310 East 44th Street, New York City.

SARAH MORRIS
CLUB SECRETARY

Student Government Elections For '38-'39

In recent elections for student government posts, Edwin Johnson, '39, of Germantown, Maryland, was elected president of the Student Government Association. Ed is a member of Phi Delta Theta. Vice-presidency of the Association went to Gus Warfield, '39, of College Park. The only coed post in the Student Government Association, that of secretary, went to Frederica Waldman, '39, of Washington, D. C., a member of Alpha Omicron Pi.

Joe Peaslee, '39, of Washington, a member of Phi Delta Theta, was elected president of the Men's League while Helen Reindollar, '39, of Baltimore, won the presidency of the Women's League. Vice-presidency of the Women's League went to Nancy Anders, '39, of Delta Delta Delta and Bess Paterson, '40, of Towson, Maryland, a member of Kappa Kappa Gamma, was elected secretary.

Outstanding Events

Two of the largest crowds ever to attend special convocations on the campus were present when Maryland Day, March 25, was celebrated and when Mrs. Franklin D. Roosevelt visited the campus to speak to the student body and faculty.

More than seven thousand people were on hand to hear Mrs. Roosevelt. It was necessary to install amplifiers in the stadium to take care of the overflow of Ritchie Coliseum. Mrs. Roosevelt talked on the place for college graduates in the social uplift in many sections of our country.

Maryland Day

On Maryland Day, March 25, the Ritchie Coliseum was jammed to capacity to hear Governor Nice and other State officials speak on the traditions of Maryland originating from the granting of the charter over three hundred years ago. Students from the Montgomery Blair High School depicted the granting of the charter in a costume episode.

The Governor pointed to our responsibility as a citizen of Maryland in his address, saying, "Let us pledge ourselves to the democratic principles under which Maryland was founded."

The program of the day began with a review of the R. O. T. C. unit of 1,000 members by His Excellency, the Governor, and other State officials. Following the exercises a holiday from all classes was declared by President Byrd in observance of Maryland Day.

New York Group Going To Princeton

A large group of Alumni living in metropolitan New York and northern New Jersey are planning to give vociferous support to the Maryland lacrosse team when the Old Line stick wielders meet Princeton on Saturday, May 7, at Princeton.

Maryland and Princeton were co-holders of the National Intercollegiate Lacrosse Championship last year and this match will undoubtedly adhere to the Indian traditions of the game and be a "scalp raiser."

Information regarding plans of the New York group for their trip to Princeton may be obtained from J. Donald Kieffer, President of the New York group, at the American Telephone and Telegraph Company in New York City.

Grand Reunion for All Old Liners »

SATURDAY, MAY 21, "On the Hill" will be the 46th annual reunion of the Alumni Association which was started by Melvin C. Hazen, '88, the first president, who this year will be celebrating the 50th anniversary of his graduation. Mr. Hazen, now chairman of the Board of Commissioners of Washington, D. C., will spend the entire day on the campus and promises a full class attendance. He was also captain of Maryland's first baseball team to make a collegiate record.

Class of '13

Another class which has reached the quarter-century mark is that of 1913. In this class is the one who brought lacrosse to the campus, E. E. Powell. Lacrosse at Maryland is now in its 28th successful year thanks to Mr. Powell. Another alumnus who played a large part in the origin of lacrosse at Maryland will also be on hand, W. Graham Cole, '10. Both Powell and Cole will take part in a ceremony which will start the Hopkins-Maryland game on that day.

Dr. Byrd to Speak

The day's program will begin at 9 A. M. with registration in the University Gymnasium as headquarters. Class reunions will convene at 10:30, the place to be announced at the registration desk. At 12, noon, a buffet luncheon will be served in the gymnasium at a nominal cost, followed by the annual meeting. President Zalesak promises a most interesting meeting with several new innovations in the program. Dr. H. C. Byrd, '08, will be asked to address the Association on the new building program. Group and class reports will also be heard. Music and singing of school songs will be a new feature.

Lacrosse

At 3:30 P. M. the Hopkins-Maryland lacrosse game will begin in Byrd Stadium. Hopkins, one of Maryland's oldest athletic rivals, is especially adept at lacrosse and has held a top perch in former years.

Alumni Dinner

Following the lacrosse game an hour and a half will be for sightseeing about the campus, attending receptions by fraternity and sorority. A chance to make use of the facilities in the men's and women's dormitories will allow tidying up for the Alumni Dinner at 7 o'clock. A special arrangement has been made to have the University Library open as a rendezvous for Old Liners. Here ample rest room facilities are available. The Library is only a stone's throw from the Dining Hall, where the dinner will be held. Following the dinner and mixer, a dance will be held in the University Gym, sponsored by the students and alumni.

Entertainment

Special entertainment will be provided at the dinner by students who played leading roles in the various student functions held on the campus during the past year as well as talented Alumni.

All Alumni are expected to bring their families with them to the Alumni Dinner. Alumni who have sons or daughters now attending the University are especially urged to have them attend the dinner. The classes of '08 and '13 have already had several committee meetings in making arrangements for their reunions.

The day will not be complete without every alumnus!

Phi Sigma Kappa Celebrates Founders Day » » »

On March 19, the Eta Chapter of Phi Sigma Kappa and the Eta Alumni Association held a joint Founders Day Banquet at the Kenwood Country Club. Some thirty or more Alumni and the active chapter were present for the celebration.

The fraternity was founded at the Massachusetts Agricultural College in 1873 and was first established in the University of Maryland in the Baltimore Schools in 1897 and in 1923 the active chapter was transferred to College Park.

Among the Alumni present were: Gilbert Morgan, '07; Edgar F. Russell, '22; Mason Albrittian, '23; Ernest Graves, '23; J. Philip Schaeffer, '23; William E. Zepp, '23; Everett C. Embry, '23; Selwyn L. Powers, '25; Herbert S. Schaeffer, '26; Roger O'Donnell, '27; John L. Bischoff, '31; Herbert O. Eby, '32; C. W. Rinehart, '32; John P. Huebsch, '33; James M. Mason, '33; John McWilliams, '34; William B. Rafferty, '34; C. H. Ludwig, '35; Ralph W. Ruffner, '35; William O. Buckingham, '36; R. L. Lutz, '36; and William M. Reading, '36.

Dentists Organize

When the Southern Maryland State Dental Society was organized recently, Maryland graduates played an important part. Dr. George Clendenin, '24, of Bethesda, was elected president. Prior to this the members of the new organization were members of the District of Columbia branch of the American Dental Society. The new organization is the second largest in the State, being preceded only by Baltimore City.

Kappa's Alumnae Hold Party

The Gamma Phi Alumnæ Chapter of Kappa Kappa Gamma held a supper and bridge party at the Fairfax Hotel in Washington on March 23.

On May 18 the second annual banquet of the same organization will be held at the Continental Hotel in Washington. The active chapter will be guests of the association. Many interesting features of entertainment will be presented by girls of the active chapter.

Vocational Advisor

Stanleigh Jenkins, '28, is the vocational advisor for the Boys Club of Washington, with his office located in the new $20,000 club building at 17th and Massachusetts Ave., S.E. Stanleigh received this appointment in February and now has four clubs under his guidance. He directs the social and recreational activities for more than 4,000 members. In addition he has the care of many underprivileged youths and parole boys from juvenile court of the District of Columbia.

Classmates Marry

Louise Hersperger, '33, a member of Kappa Kappa Gamma and Lloyd Jones, '33, a member of Sigma Phi Sigma, were married in December, 1937. Both are teaching school in the Montgomery County High Schools. Louise was very active in coed athletics. Lloyd is a former diamond star and a member of the "M" Club.

Alumni Cheer Boxers

Nearly fifty Alumni from New York and vicinity cheered the Maryland boxing team in its bout with Rutgers.

Before the bouts a number of Alumni had dinner at the Woodrow Wilson Hotel. Colonel Harvey L. Miller and Captain William H. Maglin, Maryland boxing coaches, were the guests of honor.

James T. Knotts, Jr., '24, was chairman of the committee managing the function and was ably assisted by Chief Beatty, '27, and Ed Juska, '25. J. Donald Kieffer, '30, president of the New York group, presided.

Home Demonstration Agent Appointed

The University Extension Service announces the appointment of Miss Agnes Soper, as Home Demonstration Agent at large for the State. Her duties will be to assist all home demonstration agents and specialists when extra work is being carried on such as camps, training schools, rallies, and achievement days.

Miss Soper is a graduate of the University in 1935, and has had two years' experience teaching and working in the Bureau of Home Economics. She has all credits completed for her Master's degree with the exception of her thesis, which probably will be ready by June.

Miss Soper's official headquarters will be at College Park according to Miss Venia M. Kellar, Assistant Director of the Extension Service.

Maryland Grads Making Good

For several years the Carnegie-Illinois Steel Corporation has been enlisting many college graduates as trainees. This past year 70 boys from various eastern colleges were selected. There have been several layoffs but all four Maryland boys have survived and were recently given promotions. In fact, all Maryland boys who have gone with the company in the past three years are still with them. Joe Bogen and Johnny Dye, '34, have been transferred to the temper mills in the new $60,000,000 urban project. Lewis Gibbs and Gardner Brooks are now in the sales course. Charles Furtney, '37, is a special engineer at the Vandergrift, Pennsylvania plant. Luther Brotmarkle is in the observation corps of the manufacturing division.

●

Old Maid's Club

Boys! Oh! Boys! Here is the Old Maid's Club of Maryland Alumnæ. Call any one of the following to locate the Club's meeting place. They may give you the pass word. The members are: Janet Weidemann. '37, June Barnesley, '37, Ruth Kreiter, '37, and Rosella Gengnagel, '37. They are just last year's graduates.

●

Good At Insurance

A member of the class of '31 and an active undergraduate, James R. Troth, has been recognized as one of the leading representatives of the Home Life Insurance Company of New York. He led the Vernon W. Holleman Agency, in Washington, D. C., and was ninth among all representatives for his Company during the month of March.

Bob is a member of the President's Club, which recognizes accomplishments during the 18-month period prior to January, 1938.

He and his wife, the former Josephine Symons of the class of '33, are now living on "Evelyn Place" in College Park.

●

Births—Captain and Mrs. Joseph Burger, '25-'28, have a new daughter, Eleanor Sedgewick, born on April 4. It is the second for the Burgers, who already have a boy. Captain Burger just recently returned from a tour of duty in China.

Our History Makers

By G. W. FOGG, '26

JOHN DAVIDSON GODMAN

(Dec. 20, 1794-Apr. 17, 1830)

PROBABLY the career of no man testifies so eloquently to the early efficiency and merit of the University of Maryland Medical School as that of John D. Godman. In a short life of 36 years, the last two of which were in the last stages of consumption, he wrote the first original systematic treatise on American Natural History ever published (3 volumes, octavo), he translated medical articles from the French, Latin, and German, he contributed regularly to several periodicals, and spent six years teaching medicine.

He was born in Annapolis, December 20, 1794, the son of a Revolutionary naval officer. Orphaned at five, he was cared for by various relatives until he was 17, when he was bound out as an apprentice to a printer. In 1814 he joined the Navy and was present at the bombardment of Fort McHenry. After the war, he began the study of medicine and graduated from the University of Maryland in 1818 at the head of his class. He received a gold medal for the best Latin thesis.

For the next three years he practiced medicine in Pennsylvania and Maryland. In 1821 he married Angelica, daughter of Rembrandt Peale, and departed to Cincinnati where he taught in the Medical College of Ohio and edited the first issues of *Western Quarterly Reporter of Medical and Physical Science*, the first medical journal published west of the Alleghanies.

He returned to Philadelphia and assumed charge of the Philadelphia School of Anatomy. He remained in Philadelphia the rest of his life, and in addition to teaching he edited the *American Journal of the Medical Sciences*, contributed articles to *Friend*, a Philadelphia magazine, and wrote for the *Encyclopedia Americana*.

His tubercular difficulties became acute, and after a fruitless trip to the West Indies, he returned to his Germantown home which he never left again. He died April 17, 1830, at the age of 36.

He is described by contemporaries as a person of unusually charming personality, a brilliant lecturer, and an indefatigable scholar.

Basketers, Boxers, Riflemen Honored

Maryland honored the members of its indoor sports teams at a banquet in the dining hall at the University on the evening of April 20.

Letters went to 34 in varsity basketball, boxing and rifle and numerals also were presented to freshmen athletes in these pastimes.

Coaches Hennie Miller of boxing, Burton Shipley of basket-ball and Major Jones of rifle made the presentations to their charges.

Boxing Benny Alperstein, Nathan Atkin, Robert Bradley, Junior N. Cox, George Dorr, *John Egan, Jose de Peralta, *Joseph Henderson, Richard Johnson, *Ralph Pearson and *Manager William J. McWilliams.

Basket-ball Francis Beamer, Adam Bungocha, Coleman Headley, Eddie Johnson, George Knepley, *John McCarthy, Pershing Mondorff, Milton Mulitz, William Rea, *Waverly Wheeler, *Logan Schutz, varsity manager, and James E. Collins, freshman manager.

Rifle *R. L. Mattingly, *Ralph Collins, *G. A. Bowman, *F. D. Evans, G. E. Meeks, T. W. Riley, Robert Laughead, W. P. Davis, J. M. Lanigan, *Harry Miller, varsity manager.

(*Seniors and recipients of gold awards.)

●

MARRIAGES

Married—The well known Ed Christmas, 26, and Mary Jane McCurdy, '28, took the matrimonial plunge on December 26. Mary Jane is a member of Kappa Kappa Gamma and the coed honor society Mortar Board. For several years she was assistant director of the Dining Hall and now is with the National Geographic Society in Washington, D. C. Ed, the dining hall mogul, is an ardent admirer of horses and it is believed that he now is in that business. The newlyweds are living in Laurel.

○

Married—Miss Edith Louise Stiles, '36, a member of the Gaithersburg High School faculty and Mr. Allie Messer of Laytonsville, Md., were recently married. Mrs. Messer is a graduate of the College of Education. Both Mr. and Mrs. Messer have taken an active part in the 4-H Club work in Montgomery County.

○

Married—J. Harry McCarthy, Jr., '37, a Sigma Phi Sigma, married Miss Norma Lorenz of Ohio, a Chi Omega from Dennison College. June Wilcoxon, '35, of Washington, D. C., was the maid of honor.

○

Married—Miss Barbara Hobson, and Mr. Ludwig Cominito stepped off recently and united. They now are living in Arlington, Virginia.

Spring Sport Teams Get Off To Good Start » » »

IT WAS MADE evident in the early events of the schedule that the Terp spring athletic combinations would compile a fine record during the campaign that will come to a close the latter part of May, with the exception of one baseball game with Georgetown in Washington on June 4.

When this was written there had been a total of 23 contests staged in baseball, tennis, track and lacrosse and the Terrapins had walked off with 17 victories. While it cannot be expected that this percentage would be maintained to the finish, it is more than likely that a majority of the remaining tilts will be placed on the right side of the ledger.

Tennis Team Sets Pace

The best tennis team that Maryland has had in years was setting the pace with a clean slate of four victories when this was typed for Rosy Pollock's periodical, and no immediate snags were in sight for the racketers, who are being led by two ace sophs, Allie Ritzenberg and Nate Askin.

In fact, with the exception of Navy and Penn State, to be met late in the season, the Terp netmen may be expected to win all their other matches, maybe one of these.

The ball team, save for uncertain pitching,is easily up to the Maryland standard and if the moundsmen, plenty in numbers, hit their stride, the going will be tough for any opponent. Only one real blow was struck the Terps. This was when they dropped a doubleheader to Duke at Durham on Easter Monday and suffered a setback to any hopes they may have entertained of winning the Southern Conference championship.

Notable victories earlier were scored over Vermont, Ohio State, Cornell, Penn State and Virginia.

Track Records Smashed

The track team not only won four of its first five meets but a pair of University records were shattered in the process. Virginia Tech, Washington and Lee, V. M. I. and William and Mary, all Southern Conference foes, were beaten, the only defeat coming from a powerful Michigan State team that came East on an Easter vacation jaunt.

Coleman Headley, that dependable veteran, was one of the record breakers, twice stepping the mile in home meets in 1:56.8, showing better form in his last competitive season for the Terps than ever before in his career.

Jim Kehoe, classy soph distance man, was the other to register a new mark, the Bel Air lad running the two miles in the remarkable time of 9:35.6, clipping nearly 27 seconds off the old record. His triumph was scored in the Michigan State meet. Veteran Frank Cronin, who runs various events and pole vaults, also was doing yeoman service and piling up points as in the past.

FUTURE CONTESTS

Contests to be held by various Maryland teams after Field Day are as follows:

Varsity Baseball

May 9—Virginia Tech
May 13—North Carolina
May 14—Duke
May 17—V. M. I.
May 20—Washington College
June 4—Georgetown, Washington

o

Varsity Lacrosse

May 7—Princeton, Princeton
May 14—Navy, Annapolis
May 21—Johns Hopkins (Alumni Day)

o

Varsity Track

May 14—Army, West Point
May 21—Southern Conference Meet, Durham, N. C.

o

Varsity Tennis

May 11—Navy, Annapolis
May 14—Georgetown
May 16—Washington and Lee
May 18—Penn State, State College

Tough Road For Stickmen

The lacrosse team had registered victories over Swarthmore, Harvard and Penn State to run their streak in collegiate ranks to 19 straight.

Mount Washington, the powerful Baltimore Club team, was the outfit to place a black mark on the Terps' early season record.

Too much, though, cannot be expected of the stickmen in their tough late-season games, as Jack Faber had to rebuild practically his entire defense, and he lost Charlie Ellinger, the best attack man in college for three years.

Navy, which is to be met at Annapolis May 14, appears as the team to beat for the title this year, but games with Rutgers and Princeton that precede the clash with Middies, are testing battles. Princeton lost only to Navy when the Middies broke a tie in the last period.

Varsity squads along with the freshmen aggregations in the same sports, crowd the spacious fields and make an inspiring sight in the art of keeping fit.

In Penn Carnival

Maryland trackmen were to run in two relay races and two individual events in the Penn Carnival at Philadelphia on April 29 and 30.

Edwin Miller was to try his luck in the high jump, Halbert Evans was to compete in the 400-meter high hurdles, a distance medley quartet was to be made up of Frank Cronin running the 440, Coleman Headley the 880, Jim Kehoe the three-quarters and Mason Chronister the mile, and a Class B mile four or a 2-mile team also was to compete.

If the Class B title mile were chosen Cronin, Bill Thies, Alan Miller and Evans represented the Terps. If Coach Geary Eppley decided on a 2-mile team it was composed of Joe Peaslee, Headley, Kehoe and Chronister.

Eppley's decision hinged on the showing of a couple of his athletes in trials.

MARYLAND'S BASEBALL SQUAD

Front row (left to right)—Carl Cline, Oscar Duley, Shorty Chumbris, Bengoechea, Eddie Johnson. Second row—Robert Burns, Joe Crisafull, Waverly Wheeler, Charles Weidinger, Silverman, George Knepley, Earl Springer. Back row—Hugh Keller, Mike Surgent, Bill Bryant, Kyle Ruble, Bill Steiner, John Boyda, Lefty Chumbris, Pershing Mondorff, George Wood, absent.

Record Entry List For Meet Expected

A record list of entries was in prospect for the schoolboy track and field competition that features the annual Field Day at College Park on Saturday, May 7.

Interest was greater than at any time in recent years and a determined attack will be made on the records, some of which stood for long periods.

There will be the complete list of 13 events—100,- 220,- and 440-yard dashes, 880 and mile runs; 120 high and 220 low hurdles, 12-pound shot, high and broad jumps, javelin and discus throws and pole vault—for the open Interscholastic part of the program.

In addition, there will be a special relay race for the members of the Maryland Interscholastic Association for the State championship.

As usual, there also will be eight events closed to the county high schools of the State. These are the 100,- 220,- and 440-yard dashes, the 880-yard run, the 12-pound shot, high and broad jump and a half-mile relay race.

The relay will be run in two sections, one for schools of enrollment of less than 100 and one for those with students exceeding that number.

Gold, silver and bronze medals will be awarded for the first three places in the scholastic events, medals will go to each member of the winning relay, leading teams in each class will get a trophy, while the individual high scorers in each section will receive a gold watch.

Field Day Meet Records

Open Events

100-yard dash—0:09.8, Brooke Brewer (St. Albans), 1915.
120-yard high hurdles—0:15.8, Monroe Emmerich (Tech, D. C.), 1935.
220-yard dash—0:22.4, Brooke Brewer (St. Albans), 1915.
Mile run—4:33.4, Al Crowley (Allentown Prep), 1930.
440-yard dash—0:51, Roy Smith (Long Branch, N. J. High), 1931.
220-yard low hurdles—0:25.8, Monroe Emmerich (Tech, D. C.), 1935.
880-yard run—1:59.4, Steve Reeves (Mercersburg), 1936.
Maryland Interscholastic mile relay—3:34.2, (Baltimore City College), 1937.
12-pound shotput—55 ft. 6½ in., Edward Beetham (Mercersburg), 1937.
High jump—6 ft. 1 in., Edwin Miller (Eastern High, D. C.), 1934.
Discus throw—135 ft. 4½ in., Edward Beetham (Mercersburg), 1937.
Javelin throw—176 ft. 3 in., ...Krupp (Mercersburg), 1937.
Pole vault—11 ft. 3 in., Alvin Webster (Harrisonburg, Va. High), 1935.
Broad jump—23 ft., Lawrence Sullivan (Baltimore Poly), 1916.

County High Events

100-yard dash—0:10.2, Francis McLaughlin (Towson High), 1932.
220-yard dash –0:23.4, Francis McLaughlin (Towson High), 1932.
880-yard run—2:03.3, Tom Fields (Hyattsville High), 1937.
440-yard dash—0:53.2, Jack Archer (Bel Air High), 1933.
12-pound shotput—46 ft. 3⅜ in., Bill Ford (Jarrettsville High), 1937.
High Jump—5 ft. 9⅝ in., Charlie Irwin (Bel Air High), 1936.
Broad jump—21 ft. 8 in., Harry Lewis (Annapolis High), 1935.
Half-mile relay—1:34.8, (Bel Air High), 1934.

Personal Pencilings

Birth—Mrs. Norma Rowe Brogdon, '31, of Luttrell Avenue, Hyattsville, announces the birth of a son, Jarrott Alfred Brogdon, in October, 1937.

O

Kiwanis—Dorothy Allen, '36, has a splendid position as assistant secretary of the Kiwanis Club of Washington, with headquarters in the Mayflower Hotel.

O

Washington, D. C.—Robert A. Dunnigan, '35, is with the United States Census Bureau in Washington, D. C. Bob is a former R. O. T. C. Captain and a graduate in Engineering.

O

Income—With the Income Estates of America in Washington, D. C., we find Captain Roswell R. Boyer, '29, and Ernest H. Shipley, '29. Boyer was formerly with the C.C.C. and the Coast Guard. Shipley was formerly located in Baltimore.

Engagement—Helen Farrington, '33, of Chevy Chase, Md., a member of Kappa Kappa Gamma Sorority, and Danr Larner, are to be married in the Fall.

O

Died—On December 3, Miss Elsie M. Stewart of Lanham, Md., passed away. Miss Stewart was formerly with the Sherwin Williams Company of Washington.

O

Degree — Alvin Hurd Willis, '37, graduate of the engineering school, is now in Austin, Texas, doing work on his master's degree at the University of Texas.

O

Credit—Milo Sonen, '37, former star trackster, is now located with the Retail Credit Company in Washington, D. C. Milo is a member of Phi Sigma Kappa.

O

Married—When this was written, the final step had not been taken but the writer had received an invitation to witness the act. Winifred Kerstetter, '35, and Frederick Howe Cutting, '34, will take the matrimonial step on April 30 at the St. Andrews Episcopal Church in College Park. Winifred is with the Soil Conservation Department of the University and Fred is an engineer for the Davis Safety Engineering Company.

O

Bank—In Cumberland we find Dan Willard, '36, winner of second honors in the College of Arts and Science, in the Second National Bank. Dan has returned to serve his hometown.

O

Investments—Miss Doris Busick, '37, paid the campus a visit. She now is with the Fidelity Investment Association of Baltimore. Miss Busick has also attended Hood College and Alabama University which was a definite part of her educational plan. She was not specializing but merely observing sociology and psychology as demonstrated by people of different sections in so far as this would help her in her educational ambition. She may add Southern California, Maine, or Chicargo to her list.

O

Married—On the evening of April 13, at the hour of seven-thirty, Earl Lester Edwards, '34, and Martha Atkinson Cannon, '35, were married in the Emory Episcopal Church in Washington, D. C. Ed, a practicing attorney in Washington, is a member of the Phi Delta Theta fraternity. Martha, a member of Alpha Omicron Pi, hails from Takoma Park, Md. Several Maryland Alumnae were in the wedding party and quite a large contingent from the campus attended.

O

Visitors—Two recent visitors from among the old timers were C. W. Cairnes, '94, retired commander of the U. S. Coast Guard and W. F. Mattingly, '98. They made a sight seeing trip of the campus and declared they would be on hand for Alumni Day, Saturday, May 21.

O

Birth—Mr. and Mrs. John Wallis Scott, Jr., are the proud parents of a daughter, Jannette Lee, born last fall. Mrs. Scott was formerly Miss Dorothy Shipley, '33, of Westfield, New Jersey. The Scotts now are living in Philadelphia, Pa.

O

Electrolux—A. G. Prangley, '25, a graduate in Engineering and Law, now is with the Electrolux Co., Inc., Old Greenwich, Conn.

YOU CAN HELP

For the aid of some worthy student through the medium of a scholarship, the Alumni Office has inaugurated a magazine subscription service. A student will handle the subscription solicitation and the agent's commission wil be credited to the scholarship fund for the Alumni Association to award as a scholarship.

It will not cost you any more to enter a subscription in this way because any price offered by any publishing company can be met through this office. By entering your subscription through the Alumni Office, you will be contributing to a worthy cause at no additional cost.

Technical, scientific, and popular magazines—all of which are available through this service . If you will take a look at the magazines to which you are now subscribing, you will find an expiration date with your address. Fill out the attached blank giving name and date of expiration; we will do the rest. Do not delay, but write the Alumni Office today.

I am at present subscribing to the following magazines.

Trio Of Maryland Track Record Holders

FRANK CRONIN, of Bel Air, Md.

Cronin holds the University marks of 49.2 for the 440 and 14 feet 4¾ inches for the pole vault. He is a senior. He also runs the 100 and 220 and anchor on the mile relay quartet.

All three of the track aces pictured here will compete against Rutgers when the annual Field Day is held in Byrd Stadium on Saturday, May 7.

COLEMAN HEADLEY,
of College Park, Md.

Headley, completing his final season for the Terps, holds the records of 1:56.8 for the 880 yard run and 4:20.9 for the mile. He also runs on the relay team.

◆ ◆ ◆ ◆ ◆

FIELD-DAY PROGRAM

◆

TRACK: (Field events start at 1 o'clock and running events at 1.30). Thirteen open interscholastic events and eight closed to county high schools of the State, and a duel meet between Rutgers and Maryland varsity teams to be run concurrently

TENNIS: (1.30)—Maryland vs. Catholic University

BASEBALL: (3.30)—Maryland vs. Washington and Lee

TENNIS: (10.30 A. M.)—Maryland Freshmen vs. Tech High

◆ ◆

One admission of 75 cents will be charged for all of the events and it will be necessary to have the ticket for the ball game

◆ ◆

EDWIN MILLER,
of Washington, D. C.

He leaped 6 feet 3¾ inches to establish the University mark and also runs in the sprint events. He is a junior.

DO NOT CIRCULATE

Look this way for MORE PLEASURE

Three things that add up to more smoking pleasure...

Chesterfield's refreshing mildness... good taste... and appetizing aroma

They Satisfy ..millions

□ □

CHARLES P. KRAUTH
1797-1867

CHARLES P. KRAUTH, one of the leaders of early Lutheranism and president of Pennsylvania College, Gettysburg, Pa., and editor of religious periodicals, was born in Montgomery County, Pa., second of eight children of a church organist. His father was a native German and his mother a Pennsylvanian.

During his early youth his family moved from church to church, being at various times in Philadelphia, York, Winchester, Norfolk, and Baltimore.

Krauth entered the University of Maryland Medical School, but before he could graduate he ran out of funds. On his way to borrow some money from his uncle in Frederick, Md., he met the Rev. David Frederick Schaeffer who influenced him to enter the clergy. He was licensed as a Lutheran clergyman at Baltimore in 1819. He served various churches in West Virginia and Philadelphia, but in 1834 he became the first president of Pennsylvania (now Gettysburg) College, a position he held until 1850.

He was married twice; first to Catharine Heiskell, of Staunton, Va., and next to Harriet Brown, of Gettysburg.

During his long ministry he was active in organizing and promoting his church. He was instrumental in founding the Synod of Maryland and Pennsylvania and in establishing the Theological Seminary at Gettysburg. He also contributed to and was editor of several religious periodicals.

Theologically he was conservative, but maintained friendly relations with both sides of the bitter controversies of his period without committing himself to either.

Many who knew him have described him as an ideal Christian scholar and gentleman, and remember him also for one personal eccentricity. In saluting a person he would raise his hat from behind instead of from in front, a habit he never gave up in spite of friendly entreaties.

Edwin T. Dickerson Candidate For Re-election To Supreme Bench

EDWIN T. DICKERSON, '98, Associate Judge of the Supreme Bench of Baltimore City, alumnus of the University and member of the faculty of the Law School, who is a candidate for re-election to the Bench, was born at Dickerson, Montgomery County, November 26, 1878, and entered the University in 1894 as the winner in competitive examination of a scholarship from his county. In 1898 he was graduated at the head of his class with the degree of Bachelor of Arts. Following his graduation, he entered the graduate school of the Johns Hopkins University and in the fall of 1899 entered the Law School of the University of Maryland, from which he was graduated in 1902 with the degree of Bachelor of Laws. He won the scholarship prize for the highest general average in his class and honorable mention for his thesis at graduation from the Law School.

In 1903 the degree of Master of Arts was conferred upon him by the University of Maryland in recognition of his graduate work at the Johns Hopkins University. Following his graduation from the Law School, he passed the State Bar examination with a perfect average, was admitted to the Bar on September 11, 1902, and later formed a partnership for the practice of law with his uncle, the late W. Burns Trundle, which continued until the death of Mr. Trundle on April 19, 1914.

In 1919 he formed a law partnership with Hon. Harry W. Nice, which continued until the election of Mr. Nice as Governor of Maryland. On September 24, 1936, Governor Nice appointed Judge Dickerson an Associate Judge of the Supreme Bench of Baltimore City, to continue until the general election in November, 1938.

In 1907, upon the recommendation of the late Judge Henry Stockbridge, who was arranging a course of lectures for the American Institute of Banking, Judge Dickerson conducted the law courses of the Institute until its work was taken over by the Johns Hopkins University in 1924. From 1924 to 1928 he conducted the law courses offered by the Johns Hopkins University in the Department of Business Economics. In 1907 he was invited by the late Judge Alfred S. Niles to join the

JUDGE EDWIN T. DICKERSON, '98

faculty of the Baltimore Law School and continued with that school until its merger with the Law School of the University of Maryland in 1913. Since 1913 he has been a member of the faculty of the latter school, where he teaches the law of contracts.

In addition to his other work, he conducted coaching classes for the State Bar examination from 1902 until 1920.

He is a member of the Judicial Counsel of Maryland; is one of the seven judges who were appointed advisory members of the section of Judicial Administration of the American Bar Association, to suggest inprovements in the Law of Evidence; is a member of the American Bar Association; the State and City Bar Associations; the University, Sportsmen's and Scimeter Clubs; the Masons, Elks, Odd Fellows, Moose, Kappa Alpha and Gamma Eta Gamma fraternities.

In 1938 he served as general chairman of the celebration of the one hundred and thirty-first anniversary of the granting of the Charter of the University of Maryland.

He is a Democrat, a bachelor, and lives with his sister at 3004 Garrison Boulevard, in Baltimore City.

●

Cuba—Miss Virginia Hoelzel, M.A., '32, formerly with the Washington Missionary College of Takoma Park, is now in Havana, Cuba.

Maryland Graduate Wins First Prize For Biological Research

Arthur H. Bryan, who received his Master's degree in Bacteriology from the University of Maryland in 1934, is the author of the latest 1938 text book in his subject entitled "The principles of Practice of Bacteriology" published by Messrs. Barnes and Noble of New York. He has published in addition some forty odd research papers within the last nine years. Some of the ones presented to the various scientific societies being: "Book Contamination by Bacteria"—*Journal of Industrial Medicine*, "Bacteriological Evaluation of Dentifrices" in the Drug and Cosmetic Industry; "Comparative Antiseptic Action of Ointments and Disinfectants" in the *Journal of the American Pharmaceutical Association;* Oral Hygiene for School Children, *Baltimore Bulletin of Education;* "The Antisceptic Action of Tooth Pastes and Mouth Washes" in the *Journal of American Pharmaceutical Association, etc.* These later articles won him the first prize for Biological research for this year.

Newell Receives New Assignment

Principal economist S. R. Newell, '22, of the Bureau of Agriculture Economist U. S. D. A. has been appointed as a special assistant to the Assistant Chief in charge of Service and Regulatory Work.

In making the announcement Dr. Black states: "Mr. Newell's experience, both in the field and in Washington, in the work of the Division of Crop and Livestock Estimates, and more recently with that of the Division of Marketing Research, will be particularly valuable in his new duties.

"For several months Mr. Newell has devoted considerable time to a study of the organization and methods used for carrying on the various market news services and to the handling of current marketing statistics. His work in this field has been to aid in developing new methods and analyzing problems arising from changing conditions. It is expected that he will continue these and similar studies as well as assist in administration work."

Delta Phi Chapter Sigma Nu Celebrate

One quarter of a century was passed by the Delta Phi Chapter of Sigma Nu at Maryland on April 23 last. A joint celebration by the Alumni and active chapter was held at the Sigma Nu House beginning with dinner followed by a meeting.

Dr. F. B. Bomberger, '95, one of the founders made the principal talk on the spirit of Sigma Nu. E. E. Powell, '13, a charter member of Delta Phi also spoke of the good old days and how the spirit has carried on.

More than fifty alumni attended the occasion.

●

To Wed—Charlie Briddell, '36, will wed Miss Katherine Thompson of Vermont on June 11 at the home of the bride. This romance began in Charlie's sophomore year and success this summer. The marriage will bring together the Mountains of New England and the Eastern Shore of Maryland as Charlie's home is in Crisfield, Md. Ralph Williams, '33, will be Charlie's right bower and best man.

New Curriculum

A new curriculum in practical art will open in the College of Home Economics next year. The course will prepare students for positions as costume designers, fashion critics, departmental buyers of textiles and clothing, interior decorators and stylist or merchandize displayman. Practical art will be furnished through the cooperation of the department stores of Baltimore and Washington.

Members of the University in charge of the course are: Mrs. Frieda McFarland, head of the department of textiles and clothing, Mrs. McFarland's assistant will be Miss Polly Kessinger, a graduate of Penn State College, and Miss Vienna Curtiss, formerly of New York School of Fine and Applied Arts at Columbia University. In addition, she has had experience in interior decoration in Los Angeles and Hollywood.

●

Ministry—In Yorktown, Va., Rev. John Letcher Showell, '06, is rector of Colonial Grace Church. Formerly of Hughesville, Md., Rev Showell moved to Virginia last year.

Peach, '03, Returns From Far East

Just recently an article appeared in the Alumni News by Preston L. Peach, '03, about his experiences in the Federated Malaya States. Peach is principal of a school for boys at Kaula Lumper, some 100 miles north of Singapore, the Great Far East British naval base. At present he is on a furlough until next January and planned his return to the United States to be in time for the Annual Alumni Reunion.

○

Returns—Mr. and Mrs. Frank Blood who were formerly in Utah have returned to Washington. Mrs. Blood was formerly Dorothy Miles, '36, a member of Alpha Omicron Pi Sorority. Frank, a member of the class of '36, is with the U. S. D. A.

○

Air Conditioning—In Baltimore, J. Hanson Mitchell, '98, is the Sunbeam Air Conditioning representative for the Fox Furnace Company. Mr. Mitchell is a former president of the Alumni Association and president of his class.

With St. John's Out Grid Tilt Is Needed

Maryland's 1938 football schedule, once completed and announced nearly a year ago, now is minus one game owing to the request for cancellation by St. John's which is considerably reducing its grid list for next Fall.

St. John's was scheduled for October 15, but the date that now appears open on the card is November 5, as the Western Maryland clash, slated for that time, was moved back into the spot occupied by the Johnnies. This was done because the date conflicted with the Navy-Notre Dame tilt in Baltimore.

Geary Eppley, athletic director, is trying to fill the vacant date, but it is difficult at this time to find a team that will fit into the already difficult card.

As matters stand there are plenty of home tilts, with four slated at College Park and two in Baltimore. However, Coach Frank Dobson believes that it is better to play each Saturday even if you have a hard game each week.

Here is the 1938 card as it stands:

Sept. 24—Richmond U., College Pk.
Oct. 1—Penn State, State College.
Oct. 8—Syracuse U., Syracuse.
Oct. 15—Western Md., at Baltimore.
Oct. 22—Virginia, College Park.
Oct. 29—V. M. I., College Park.
Nov. 5—Open
Nov. 12—Florida, Gainesville.
Nov. 19—Georgetown, College Park.
Nov. 24—W. and L., Balto. Stadium.

Sports Notes

Frank Cronin and Jim Kehoe, two varsity track notables, had brothers compete for Bel Air in the Field Day meet at the University on May 7. Sterling Kehoe, following the footsteps of Jim who had previously won the event for Bel Air, captured the half-mile. Randall Cronin, Frank's brother, could do no better than get a tie for second place in the 440-yard dash.

Bel Air was unable to retain its team title in the class for county high schools of the State, Bethesda-Chevy Chase carrying off the honors with 23 points. In all 450 athletes competed in the interscholastic meet, with Washington-Lee High, of Ballston, Va., taking the open team trophy.

o

Rutgers offered the opposition for the Varsity track team on Field Day in place of Virginia which was originally scheduled. The Cavaliers got mixed up in their dates and the meet listed with Maryland conflicted with the "Big Six" games of the Old Dominion. The Terps beat Rutgers, 78-48.

o

Eddie Johnson, ace on the Terp varsity basket-ball and baseball, has been elected president of the Student Government Association of the University for next year. This is the highest office within the gift of the students.

Track Makes Great Advance in 5 Years

Track and field athletics at Maryland have made a greater advance than any other sport during recent years. This is emphasized by a perusal of the records which show that all of the marks on the books, save two, have been put there during the past five seasons.

Henry (Gump) Matthews, who ran the 220 against Hopkins in Baltimore in 1926 in 21.4, and Earl Zulick, who tossed the shot 46 feet 10¾ inches to win the Southern Conference championship at Birmingham in 1928, are the only two who can look back farther than 1934 and claim a mark.

Frank Cronin, in the 440 and pole vault; Coleman Headley, in the half and mile; Ed Miller, in the high jump, and Jim Kehoe, in the 2-miles, are members of the present University squad who have set records. Headley broke his own half-mile mark and Kehoe smashed the 2-mile record by a wide margin this spring.

A list of the records, given here, should be interesting to the alumni.

Alumni at Penn. Relays—When Maryland tracksters ran at the Penn relay, they were cheered on by Ura Long, '08, a former cinder star, Dick Maurer, '36, Emerson Ogle, '36, and Phil Mossburg, '36.

Terps Defeat Hopkins To Please Old Grads

Maryland completed its varsity sports campaign for 1937-38, with the exception of a ball game with Georgetown in Washington on June 4, when the fine Terp lacrosse ten pleased a large Alumni Day crowd on May 21 by beating Johns Hopkins, 12 to 6.

It was an interesting game of lacrosse despite the big Maryland margin at the finish, as Hopkins led, 3 to 2, at the end of the first half and played spiritedly to the end. Maryland, after being lethargic in the opening half, "went to town" in the last 30 minutes.

Maryland's victory put the Terps right on Hopkins heels in the all-time record for the series. The Terps now have won 9 of the 17 regular contests since they began battling back in 1920, but Hopkins still holds an edge of one game by virtue of victories in 1928 and 1932 in Olympic play-off finals.

The Alumni Day triumph gave Maryland four straight and helped the Terps make up a lot of ground the Jays had gained in their early years of the stick series.

The complete record follows:

1920	Hopkins, 4; Maryland, 1
1923	Hopkins, 4; Maryland, 2
1924	Maryland, 4; Hopkins, 2
1925	Maryland, 3; Hopkins, 1
1926	Hopkins, 10; Maryland, 3
1927	Hopkins, 8; Maryland, 2
1928	Hopkins, 6; Maryland, 1
1928	Hopkins, 6; Maryland, 3 (Olympic play-off)
1929	Maryland, 6; Hopkins, 2
1930	Maryland, 6; Hopkins, 0
1931	Maryland, 8; Hopkins, 6
1932	Hopkins, 7; Maryland, 3
1932	Hopkins, 7; Maryland, 5 (Olympic play-off)
1933	Hopkins, 6; Maryland, 3
1934	Hopkins, 8; Maryland, 5
1935	Maryland, 4; Hopkins, 2
1936	Maryland, 9; Hopkins, 4
1937	Maryland, 9; Hopkins, 6
1938	Maryland, 12; Hopkins, 6

Successful Maryland Mentor

JOHN E. (JACK) FABER

Serving his eleventh year as head coach of lacrosse. He also is assistant in football and basket-ball.

Personal Pencilings

Birth—Mr. and Mrs. Joseph I. Galliker announce the arrival of a baby girl. Mrs. Galliker was formerly Christine Cook, '38, a member of Kappa Kappa Gamma. Joseph, '36, was a member of Delta Sigma Phi and is employed in Washington, D. C.

O

Secretary—Rosalie Carr Grant, '34, is doing secretarial work for the Association of American Railroads in Washington, D. C. She was formerly in the office of the Dean of Law of the University of Pennsylvania.

O

Y. M. C. A.—The Boys' Work Director of the Y. M. C. A. in Plainfield, N. J., is Frank H. Terhune, '27, formerly at Pittsfield, N. J. Frank is married and has one girl, Nancy.

O

Coast Guard—Commander T. G. Crapster, '96, is in charge of the Norfolk Division of the United States Coast Guard.

O

Kodak—In Rochester, N. Y., with the Eastman Kodak Company we find John George Hart, '37.

O

Accountant—James E. Lamb, Jr., '33, formerly assistant to chief underwriter of Federal Housing Administration in Newark, N. J., is now Junior Accountant in Washington, D.C.

O

Medicine—Morris J. Nicholson, '33, M. D., '36, has a fellowship in Anesthesia at Fahey Clinic in Boston, Mass.

O

Steel—At Bethlehem, Pa., we find Dale Patterson, '37, in the Sales Department of the Bethlehem Steel Company.

O

Ministry—The assistant director of the Trinity Episcopal Church in Houston, Texas, is Rev. J. Lawrence Plumley, '33. He graduated in ministry from the University of the South in '36. He was rector in charge of Holy Composter Episcopal Church and St. Paul's Episcopal Church in Freeport, Texas. He was recently married by his brother, Rev. Walter P. Plumley, of Mt. Rainier, Md.

O

Birth—Mr. and Mrs. Eben Jenkins announce the birth of a daughter, Sarah Jean Jenkins, 8 pounds and 3 ounces, on April 20. Mrs. Jenkins was formerly Mary Ingersoll, '32, a member of Kappa Kappa Gamma. They reside in Hyattsville.

O

Birth—Mr. and Mrs. O. R. Carrington announce the birth of a 7-pound son, David Kent, April 10. Mr. Carrington is a Maryland graduate in the class of '28, and Mrs. Carrington was formerly Mildred Hislop, class of '29. They are living in Hyattsville.

O

Teacher—Harry E. Hasslinger, '33, lieutenant in the Field Artillery Reserve, is now teaching at the McDonogh School, McDonogh, Md.

O

Secretary—Jerry Schuh, '37, is doing secretarial work for Pyke Johnson, Sr., of the Auto Manufacturing Association in Washington, D. C. They are located in the Transportation Building.

O

Accountants Hear Alumnus— When the Annual Accountant Frat banquet was recently held, Lee R. Pennington, '15, was the principal speaker. Pennington is field superintendent for the accounting division for the Federal Bureau of Investigation.

O

West Virginia—Dr. W. W. Spelsberg, '25, M.D., is an eye, ear,nose and throat specialist located in Clarksburg, West Virginia.

O

Birth—Mr. and Mrs. Lou Aitcheson announce the arrival of a son born January 18 last, and who will be known from now on as Lou, Jr. Mrs. Aitcheson was formerly Virginia Hester, '36. Mr. Aitcheson is a popular sports writer for the Washington Post. While not a Maryland graduate, Mr. Aitcheson says "he hopes Lou, Jr., will be a Maryland half back some day."

O

Marines—Captain John F. Hough, '25, of the U. S. Marine Corps, recently returned to the U. S. from a tour of duty in China. Prior to his return he came across Colonel O. H. Saunders, '10, of the U. S. Army now in the Philippines. Captain Hough now is stationed at Quantico, Va.

O

Birth — Mr. and Mrs. George E. Deaner, of Hyattsville, Md., have a daughter one year old, Nancy Ellen, who celebrated her birthday on April 14. Mrs. Deaner was formerly Alma Hickox, a member of the class of '32.

O

Shoes—Gerald Groves, '34, of Cumberland, is in the shoe business in Frostburg, Md. Gerald is a member of Sigma Nu.

O

Teaching—Polly Mayhew is teaching Home Economics and doing graduate work at 71 Main St., Nantucket, Mass. She was a graduate in the class of '36 and was a member of Alpha Xi Delta sorority.

O

Married—Miss Katherine E. Goll, '37, and Mr. Ralph Gall, '37, were married Easter Sunday at the home of the bride in Takoma Park, Maryland. Mrs Gall is a grad in Home Economics. Ralph is a grad in Engineering and is employed at the ElectroDynamic Furnace Company in Bayonne, N. J.

O

Married—Miss Eloise Thawley, '38, and Arthur G. Johnson, '37, were married May 8 at Denton, Maryland. Arthur is interested in a confectionary business in Baltimore.

O

Employment Notice—The Alumni Office has received notice that a position is open with a fertilizer, seed and hardware company of prominence in Maryland. Graduates in business administration or economics with some business experience who are interested, are requested to communicate with the Alumni Secretary.

O

Marriage—Miss Fay Reuling, '36, and Rodger Kelley were married May 7 in Baltimore.

O

Shipbuilding—Superintendent of the Machine Shop Division of the Newport News Shipbuilding and Dry Dock Company is John C. Sterling, '16. He is married and has four children.
